Peripheral Vascular Disease For Cardiologists:

Peripheral Vascular Disease for Cardiologists John Spittell, 2008-04-15 Cardiologists today must have adequate basic training in vascular medicine in order to care for patients with peripheral vascular diseases. However, the topic of peripheral vascular disease has been inadequately addressed in most training programs and particularly in the literature directed toward cardiologists. This text, the first of its kind, is intended to broaden their knowledge base and clinical skills in the recognition and management of the common peripheral vascular disorders occurring in cardiovascular practice. *Peripheral Vascular Disease for Cardiologists* will provide a practical clinical framework rather than using the usual textbook format, hence fitting effectively within training programs in cardiology and internal medicine. **Peripheral Vascular Disease, An**

McManus, Daniel Fisher, 2010-10-22 Peripheral vascular disease (PVD) affects more than 30 million people worldwide, most often individuals over age 65. Despite this, PVD remains a disease with which many clinicians are unfamiliar. *Peripheral Vascular Disease* helps medical professionals of different backgrounds and training apply resources adequately to benefit individual patients.
