Woodward, 2013-03-14 Based on ethnographic research in Contra Costa County California CCC Pimping the Welfare System highlights a welfare program implemented after welfare reform that differed in significant ways from the predominant work first approach implemented by most welfare programs

The book argues that by imparting dominant economic social and cultural capital CCC's welfare program empowered participants and improved their quality of life and life chances. Successfully transmitting these types of capital however was dependent upon the discourses practices and pedagogy deployed by welfare workers as well as the policies practices and resources of the welfare program. In particular CCC's welfare workers encouraged the acquisition and use of dominant capital that which is desired by the labor market by acknowledging and respecting the various types of capital welfare participants already had and by encouraging participants to make strategic choices about deploying different types of capital. This book calls into question monolithic understandings of economic social and cultural capital and encourages a new conceptualization of capital that resists framing poor women as fundamentally lacking. In addition it points to ways welfare administrators and welfare workers can develop more empowering programs even within the confines of federal state and local regulations.
