Productivity Tips

- Creating a Bitmap Image of a PowerPoint Slide**
Converting a slide to a bitmap image file is a handy way to share that individual slide with another person, or to use it as an illustration in a report. To save a slide as a bitmap:
 - Click the slide you wish to save as an image.
 - Select View > Notes Page.
 - Right-click the image of the slide, and select Copy. An image of the slide is now copied to the clipboard.

- Launch Paint (or any graphics editor), and select Edit > Paste.
- Save the image as a bitmap file.
- Keeping Presentation Files Small**
Occasionally, a presentation file will increase in size when it is saved, even if very little has been changed. If so, the added size can be reduced by selecting File > Save As, and saving a new copy of the presentation. This can sometimes reduce file size by as much as 50%.
- Showing Slides Out of Order During a Presentation**
A PowerPoint slide show does not always need to be played in the same order. Any time during a presentation, you may type the slide number and press ENTER to jump to that slide. It is recommended to print out a copy of your slide show for reference, to more easily navigate between the slides.

Basic Tasks

- Starting PowerPoint 2003**
