Determinations Michael D. Nolan,2011 This comprehensive two volume work is a collection of determinations from OPIC the US governmental political risk insurance provider in the form of its Memoranda of Determinations from 1966 through to 2010 An important part of international investment law and policy is the political risk insurance coverage provided to international investors by their home states and multilateral organizations such as the World Bank These programs are of crucial importance to the growth of international investment flows and the development of international investment law The insurance claim decisions and as a result this area of international law has received disproportionately little attention This

reference work is the first to make the underlying primary material available to the investment law political risk and academic communities The authors have made the claims determinations more accessible with the inclusion of headnote summaries for all determinations The determinations reflect the decisions of OPIC under US and international law and therefore have a significant impact on its future claims determinations They reveal what types of claims have been honored for expropriation political violence or convertibility transferability restrictions Users of political risk insurance worldwide will find this collection invaluable in understanding what events are and are not in fact covered and deciding whether to obtain insurance coverage These OPIC determinations will also contribute to the development of arbitral jurisprudence regarding government actions that are alleged to be in violation of investment protections found in investment treaties and investment law They are additionally of interest in the context of the presentation and determination of future OPIC claims and decision making by other political risk insurance providers

The Mythology of All Races ... ,1920 *Classic Maya Provincial Politics* Lisa J. LeCount,Jason Yaeger,2010-09-15 Most treatments of large Classic Maya sites such as Caracol and Tikal regard Maya political organization as highly centralized Because investigations

have focused on civic buildings and elite palaces however a critical part of the picture of Classic Maya political organization has been missing The contributors to this volume chart the rise and fall of the Classic Maya center of Xunantunich paying special attention to its changing relationships with the communities that comprised its hinterlands They examine how the changing relationships between Xunantunich and the larger kingdom of Naranjo affected the local population the location of their farms and houses and the range of economic and subsistence activities in which both elites and commoners engaged They also examine the ways common people seized opportunities and met challenges offered by a changing political landscape The rich archaeological data in this book show that incorporating subject communities and people and keeping them incorporated was an on going challenge to ancient Maya rulers Until now archaeologists have lacked integrated regional data and a fine grained chronology in which to document short term shifts in site occupations subsistence strategies and other important practices of the daily life of the Maya This book provides a revised picture of Maya politics one of different ways of governing and alliance formation among dominant centers provincial polities and hinterland communities
