Revaluation Of Womens Work:

The Revaluation of Women's Work Sheila Lewenhak, 2013-11-05 This book provides a survey and analysis of the different ways in which women's work is valued throughout the world. It challenges the narrow definition of work as paid work as that excludes so many of women's activities. It looks at ways in which women's worth has been consistently undervalued in industrial as well as non-industrial countries in socialist as well as free enterprise economies. These practices distort the national product of countries heavily dependent on women's labour but above all they are among the most obvious marks of the exploitation of women. Technological changes are already altering established female-male divisions of labour. Transnational enterprises often located in Special Economic Zones are reducing differences between industrial and non-industrial countries. Valuing women's work correctly whether unpaid in the home or underpaid outside it is part of the battle against discrimination and poverty. Men who do similar work also benefit. It is the crucial step towards the achievement of male-female equality. The book will be particularly valuable for those concerned with the issues in trade unions, women's groups, international agencies and NGOs and for course in economics and social studies. *The Revaluation of Women's Work* Sheila Lewenhak, 1988-01 *The Revaluation of Womens' Work* Sheila Lewenhak, 2009 First Published in 2009 Routledge is an imprint of Taylor Francis, an informal company. **Working for Women?** Celia Briar, 2020-03-09 Originally published in 1997 *Working for Women* examines the ways in which women's patterns of paid and unpaid work have been mediated by the policies of governments throughout the 20th century. It looks at the state in defining what is women's work and men's work and at equal pay and opportunities policies. This book will appeal to academics of sociology, gender and women's studies. Doing "Women's Work" Christine L. Williams, 1993-08-19 This book summarizes the state of our knowledge on the effects of men in women's professions, effects on the men on their views of masculinity on the occupations and on the women they work with. Do men get preferential treatment in these positions? Do they receive higher salaries? Or are they treated the same as their women colleagues? Through a series of statistical and demographic analyses as well as case studies of men in professions such as teaching, secretarial work, care giving and stripping, the contributors give a glimpse of the role of these men in bolstering or undermining the gendered assumptions of occupational sex segregation in the workplace.
