Review of the Army's Technical Guides on Assessing and Managing Chemical Hazards to Deployed Personnel
National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on
Toxicology, Subcommittee on the Toxicological Risks to Deployed Military Personnel, 2004-08-03 To guide mission planning
military decision makers need information on the health risks of potential exposures to individual soldiers and their potential
impact on mission operations To help with the assessment of chemical hazards the U S Army Center for Health Promotion
and Preventive Medicine developed three technical guides for characterizing chemicals in terms of their risks to the mission
and to the health of the force The report reviews these guides for their scientific validity and conformance with current risk
assessment practices The report finds that the military exposure guidelines are appropriate with some modification for
providing force health protection but that for assessing mission risk a new set of exposure guidelines is needed that predict
concentrations at which health effects would degrade the performance of enough soldiers to hinder mission accomplishment

members Despite major engineering advances in controlling the spacecraft environment some water and air contamination is inevitable Several hundred chemical species are likely to be found in the closed environment of the spacecraft and as the frequency complexity and duration of human space flight increase identifying and understanding significant health hazards will become more complicated and more critical for the success of the missions To protect space crews from contaminants in potable and hygiene water NASA requested that the National Research Council NRC provide guidance on how to develop water exposure guidelines and subsequently review NASA's development of the exposure guidelines for specific chemicals This book presents spacecraft water exposure guidelines SWEGs for antimony benzene ethylene glycol methanol methyl ethyl ketone and propylene glycol Annual Command History United States.
