Dyker, S. Radošević, 2012-12-06 This book uses a range of S T and structural indicators to analyse the transformation process in particular the transformation of science technology and industry in the former communist countries The book originates from a sense of the tremendous need for quantitative indicators for assessing trends and performance in the post socialist

economies S T systems in the region have passed through the first phase of rapid deterioration or as it is called by some analysts implosion After ten years of transfonnation we are witnessing a process of increasing differentiation of these countries in tenns of general patterns of growth and structural change as well as specific lines of restructuring in their S T systems The question of sources of growth or indeed of stagnation is an increasingly urgent one from both the policy and academic perspectives In that context there is a pressing need for in depth assessment of restructuring patterns in science technology and industry in the region as a basis for understanding how restructuring in S T is linked to industrial restructuring and to general economic and social transfonnation As the contributions to this volume show there is now a critical mass of quantitative data across the post socialist countries which deserves to be studied more thoroughly in a comparative manner The changes of the last ten years have produced varying patterns of adjustment which are now clearly visible in S T and structural indicators OECD Science, Technology and Industry Outlook 2012 OECD,2012-09-13 Based on the latest information and indicators in science and innovation the OECD Science Technology and Industry Outlook 2012 reviews key trends in STI policies and performance in OECD countries and major emerging economies and across a number of thematic areas Impact of the Enlargement of the European Union Towards the Associated Central and Eastern European Countries on RTD-innovation and Structural Policies ,1999 Frameworks for Industrial Policy in Central and Eastern Europe Brigitta Widmaier,Wolfgang Potratz,1999 The central issue of this book is based on the need for Central and Eastern European economies to push ahead with endogenous development The text outlines variables and problems in such areas as the structural changes in industry and the industrial policies of countries Research at Central and East European Universities Marek Szymoński,Iwona Guzik,1997 OECD Reviews of Innovation Policy: Kazakhstan 2017 OECD,2017-07-10 This report provides an independent and comparative assessment of the overall performance of Kazakhstan s innovation system since independence with recommendations on improving performance drawing on the experience of other OECD countries in innovation processes systems and policies While Research in Education ,1972
