## **Revision Of The Tribe Antirrhineae Scrophulariaceae:**

*A Revision of the Tribe Antirrhineae* David Andrew Sutton, 1988 The tribe Antirrhineae includes the Snapdragons and Toadflaxes and belongs to the Figwort family It is the most distinctive tribe of the Scrophulariaceae and is treated in some classifications as an independent family This volume is the first worldwide treatment of this plant group for almost 150 years It draws on a database of about 4 000 plant names and more than 1 300 publications on the taxonomy of the Antirrhineae The descriptions cover 27 genera representing 328 species including 27 new taxa that are detailed here for the first time Also for the first time scanning electron microscopy has made it possible to accurately survey the highly variable seed morphology for the group which provides a rich source of characters for testing existing classifications In addition new methods have been devised by the author for describing the complex morphology of the seeds Major areas of taxonomic controversy discussed in this volume include the generic limitation and supraspecific classification of *Linaria* Nearly 900 photomicrographs and line drawings of new species and subspecies illustrate the text

The Scrophulariaceae of Eastern Temperate North America Francis Whittier Pennell, 1935 This study was originally planned to follow certain regional papers with a similar account of the family Scrophulariaceae figwort or foxglove family for the Middle Atlantic N Central States But it soon seemed preferable to include the southern Appalachians the whole Atlantic Coastal Plain The flora of the northern states has been profoundly modified by the glacial epoch any understanding of the composition distribution of our northern

flora should also consider the adjoining southern territory where vegetation was little or not affected from which the north was again populated So it was decided to include again the South Atlantic the West Gulf States The plan of this study is both more thorough more comprehensive than earlier efforts Illus *Systematics of Antirrhinum (Scrophulariaceae) in the New World* David Malcolm Thompson,1988 *Progress in Botany* H.-Dietmar Behnke,Karl Esser,Klaus Kubitzki,Michael Runge,Hubert Ziegler,2012-12-06 *Biological Control Programmes in Canada 2001-2012* Peter G Mason,David R Gillespie,2013-10-21 Canada is a world leader in biological control research Reporting the status of biocontrol agents released in Canada over the last decade this book presents case studies by target pest that evaluate the impact of biocontrol and recommend future priorities In addition to a new chapter on future targets and an appendix listing established agents this edition contains information of interest to a global audience and chapters that address effects of invasive species and climate change The European Garden Flora Flowering Plants James Cullen,Sabina G.
