Global Marxism

Simin Fadaee, 2024-09-10 A cutting edge exploration of how Marx's ideas have been adopted and adapted by revolutionary thinkers in the Global South For much of the twentieth century the ideas of Karl Marx provided the backbone for social justice around the world But today the legacy of Marxism is contested with some seeing it as Eurocentric and irrelevant to the wider global struggle In Global Marxism Simin Fadaee argues that Marxism remains a living tradition and the cornerstone of revolutionary theory and practice in the Global South She explores the lives ideas and legacies of a group of revolutionaries who played an exceptional role in contributing to counter hegemonic change Figures such as Ho Chi Minh Kwame Nkrumah Ali Shariati and Subcomandante Marcos did not simply accept the version of Marxism that was given to them they adapted it to local conditions and contexts In doing this they demonstrated that Marxism is not a rigid set of propositions but an evolving force whose transformative potential remains enormous This global Marxism has much to teach us in the never ending task of grasping the changing historical conditions of capitalism and the complex world in which we live

Marxism in the Chinese Revolution Arif Dirlik, 2005-06-07 Representing a lifetime of research and writing by

noted historian Arif Dirlik the essays collected here explore developments in Chinese socialism and the issues that have occupied historians of the Chinese revolution for the past three decades Dirlik engages Chinese socialism critically but with sympathy for the aspirations of revolutionaries who found the hope of social political and cultural liberation in Communist alternatives to capitalism and the intellectual inspiration to realize their hopes in Marxist theory The book's historical approach to Marxist theory emphasizes its global relevance while avoiding dogmatic and Eurocentric limitations These incisive essays range from the origins of socialism in the early twentieth century through the victory of the Communists in mid century to the virtual abandonment by century's end of any pretense to a socialist revolutionary project by the leadership

of the Chinese Communist Party All that remains of the revolution in historical hindsight are memories of its failures and misdeeds but Dirlik retains a critical perspective not just toward the past but also toward the ideological hegemonies of the present Taken together his writings reaffirm the centrality of the revolution to modern Chinese history They also illuminate the fundamental importance of Marxism to grasping the flaws of capitalist modernity despite the fact that in the end the socialist response was unable to transcend the social and ideological horizons of capitalism Revolution! It Ain't No New Thing Andrew Harris,2021-01-27 Revolution It Ain't No New Thing is an extraordinarily well written expos uncovering promising possibilities of another era of American generational consciousness evolution Using analogical arguments to support his bold new assertions and predictions Dr Harris examines in great historical detail the evolution of political consciousness and how it has evolved over many millennia In the prologue he defines political consciousness as being both individual and group awareness derived from a common set of beliefs and values or value regimes He further details how ancient civilization s political societies evolved dating back to Babylon Prussia Egypt and the Middle East to the founding of America s democratic republic and today s societal efforts toward a more perfect union Revolution It Ain't No New Thing exposes an unambiguous contrast between revolution and evolution Whereas an act of revolution always ushers in a complete political regime change evolution involves a modification of an existing political regime by changing its political and civic polity In order to drive home this point Andrew tells his personal story of being politically radicalized as a young Black boy in the suburbs of New York City during the civil rights movement In chapter 6 he brilliantly conceives a political conceptual framework entitled The EING Factors exclusivism inclusivism nationalism and globalism that identifies and contextualizes different political regime eras beginning with the American Revolutionary War the Great Depression and World War II the civil rights movement to today s millennial generation crisis Dr Harris concludes by addressing some questions surrounding how America can prepare for a new political consciousness evolution providing several key empirical observations and a fresh new perspective on instituting realistic changes The Consciousness Revolution Stanislav Grof,1999 The Algebra of Revolution John Rees,2005-06-23 The Algebra of Revolution is the first book to study Marxist method as it has been developed by the main representatives of the classical Marxist tradition namely Marx and Engels Luxembourg Lenin Lukacs Gramsci and Trotsky This book provides the only single volume study of major Marxist thinkers views on the crucial question of the dialectic connecting them with pressing contemporary political and theoretical questions John Rees s The Algebra of Revolution is vital reading for anyone interested in gaining a new and fresh perspective on Marxist thought and on the notion of the dialectic **From Ah Q to Lei Feng** Wendy Larson,2008-10-16 When Freudian sexual theory hit China in the early 20th century it ran up against competing models of the mind from both Chinese tradition and the new revolutionary culture Chinese theorists of the mind both traditional intellectuals and revolutionary psychologists steadily put forward the anti Freud a mind shaped not by deep interiority that must be excavated by professionals but shaped

instead by social and cultural interactions Chinese novelists and film directors understood this focus and its relationship to Mao's revolutionary ethos and much of the literature of twentieth century China reflects the spiritual qualities of the revolutionary mind From Ah Q to Lei Feng investigates the continual clash of these contrasting models of the mind provided by Freud and revolutionary Chinese culture and explores how writers and filmmakers negotiated with the implications of each model

Conflict, War and Revolution Paul Kelly, 2022-01-04 Violence and war were ubiquitous features of politics long before the emergence of the modern state system Since the late 18th century major revolutions across the world have further challenged the idea of the state as a final arbiter of international order This book discusses ten major thinkers who have questioned and re shaped how we think about politics violence and relations between states Thucydides Augustine Machiavelli Hobbes Locke Rousseau Clausewitz Lenin and Mao and Schmitt Conflict war and revolution have generally been seen in political thought as problems to be managed by stable domestic political communities In different ways all the paradigmatic thinkers here acknowledge them instead as inevitable dimensions of human experience manifested through different ways of acting politically while yet offering radically distinct answers about how they can be handled This book dramatically broadens the canon of political thought by considering perspectives on the international system that challenge its historical inevitability and triumph Drawing on history theology and law as well as philosophy Paul Kelly introduces thinkers who challenge fundamentally the ways in which we should think about the nature and scope of political institutions and agents He illuminates many troubling contemporary conflicts with a critical and historical perspective This book is primarily intended for second year and upwards undergraduate students in general political theory and international theory and advanced international relations students Each chapter is also downloadable on its own for use in courses considering only some of the ten theorists covered Written in an accessible way Conflict War and Revolution will also interest advanced general readers with interests in the historical thought underpinnings of political ideas and today's international politics

Revolution of Consciousness Paul Wesley Norberg,2015-03-17 Our planet and civilization in dire peril an intellectual and spiritual challenge a generation awakened to its transcendent fate Humanity has been warned time is running very short to respond effectively to the perils of the uncontrolled heating of the Earth and a subsequent climate catastrophe This leads to the question Why Why would a species capable of such complex technological innovation create such a dilemma for itself and the rest of life In one word consciousness We carry survival motivations of consciousness from our evolutionary ascent The ego or sense of self is at the heart of the matter The more captured an individual is by the ego the more narrow is their world view The big picture is not being considered effectively this myopic view is held by too many

and leads to our dysfunctional industrial behavior Worldwide the planet suffers greatly for this What is needed is for an effective few to transcend this myopic consciousness level to what some consider a spiritual level or realm where a much larger understanding of creation emerges Ecological Wisdom is one of the fundamental qualities a person acquires For some it is an epiphany Our world desperately needs this effective few perhaps 4% or 5% of us to awakened and with vigor lead the rest away from the destructive path we are currently on This is one story of how this revolution of consciousnesses might occur
