 faith face off But the truth is both sides are right and wrong In one corner Atheists like Richard Dawkins Daniel Dennett and  
 Jerry Coyne They insist evolution happens by blind random accident Their devout adherence to Neo Darwinism omits the  
 latest science glossing over crucial questions and fascinating details In the other corner Intelligent Design advocates like  
 William Dembski Stephen Meyer and Michael Behe Many defy scientific consensus maintaining that evolution is a fraud and  
 rejecting common ancestry outright There is a third way Evolution 2 0 proves that while evolution is not a hoax neither is it  
 random nor accidental Changes are targeted adaptive and aware You ll discover How organisms re engineer their genetic  
 destiny in real time Amazing systems living things use to re design themselves Every cell is armed with machinery for editing  
 its own DNA The five amazing tools organisms use to alter their genetics 70 years of scientific discoveries of which the public  
 has heard virtually nothing Perry Marshall approached evolution with skepticism for religious reasons As an engineer he  
 rejected the concept of organisms randomly evolving But an epiphany that DNA is code much like data in our digital age  
 sparked a 10 year journey of in depth research into more than 70 years of under reported evolutionary science This led to a  
 new understanding of evolution an evolution 2 0 that not only furthers technology and medicine but fuels our sense of  
 wonder at life itself This book will open your eyes and transform your thinking about evolution and God You ll gain a deeper  
 appreciation for our place in the universe You ll see the world around you as you ve never seen it before Evolution 2 0

 discovery of sliding filaments in 1954 An amazing variety of experimental techniques have been employed to investigate the  
 mechanism of muscular contraction and relaxation Some background of these various techniques is presented in order to  
 gain a fuller appreciation of their strengths and weaknesses Controversies in the muscle field are discussed along with some  
 missed opportunities and false trails The pathway to ATP and the high energy phosphate bond will be discussed as well as
