laser focused examination of a really wonderful expressive art form *Understanding Caricature* offers artists aspiring artists students journalists bloggers etc a lively guide to an old and respected art form A great caricature is one that not only captures the subject's look and personality but amplifies them significantly They are almost always funny and very often but not always mean spirited Eyes ears nose mouth hairline cheeks eyebrows teeth chin There's no facial feature or any other body part for that matter that can escape the sardonic scrutiny of caricaturist and illustrator Greg Houston But though he cleverly twists exaggerates and distorts each subject's image he always makes sure the person remains recognizable an absolute must for successful caricature Whether on assignment or simply drawing for his own perverse pleasure Houston loves skewering the high and mighty movie stars moguls politicians and assorted other VIPs especially when they misbehave Caricature says Houston is a very sharp weapon for the powerless to use against the powerful and he can teach you to wield it too After defining caricature differentiating it from other forms of portraiture and delving into its centuries long history Houston gets down to the nitty gritty of how to do it He focuses sequentially on the face the hair the body and what he calls accoutrements distinctive items of clothing that help viewers immediately identify celebrities You yourself will learn to poke artistic fun at the famous through a series of demonstrations that let you follow Houston as he constructs caricatures of Jake Gyllenhaal Masie Williams Dwayne Johnson Rainn Wilson and other notable victims of his wicked pen But Houston doesn't focus solely on his own approach A whole chapter of *Understanding Caricature* is devoted to other contemporary caricaturists and the signature mediums they work in ranging from traditional oils and watercolors to digital drawing and

painting to sculpture and even puppet making And the book s final chapter displays the work of students who ve studied with Houston at his Baltimore academy Brilliant in their own right these pieces also demonstrate how any artist with Houston s guidance can become a skilled practitioner of the caricaturist s art

Learn How to Draw Human Figures - For the Absolute Beginner John Davidson,2013-05-15 Learn How to Draw Human

Figures For the Absolute Beginner Table of Contents Introduction Drawing Tools Body Proportions Body Shape Polygonal Form Ball Joints Arms Legs Muscle Structure Heads Clothing Proportioning the body structure properly is important when drawing a person A disproportionate body will mislead the portrayed perspective of your subject Or worse the subject might look distorted and deformed Knowing the proper length for your subject the person or character you are drawing can be easily achieved by drawing the head first In this way the traditional method in laying out the proper proportion of the body can be initiated The traditional method of approximating the body proportion of a subject is by using its head s size The height of an average man is approximately eight to ten head s size tall while a women s height is about seven to nine head s size If your subject character is eight heads tall then the proportions should be as follows The distance of the head face to crotch is about four heads long The arms including the hands from the shoulders are closely four heads long An average opened hand is usually equal to or almost one head size While the length of a small hand can be compared to the length of the eyebrows to chin The wrists are aligned or right above the level of crotch The lower extremities legs are about four heads long Adjustments are most effective by decreasing or increasing the length of each part by half head size depending on your preferred height The wideness of the chest is usually two horizontal head s size or more two and half depending on the body built you prefer for your subject A subject having less than two head s size will make its actual head look too big or a body proportion too skinny Take note that these proportions are just an approximation of an average person s body structure The measurements can change depending on the body type you prefer to portray such as a long legged subject would obviously have legs longer than four heads or perhaps a shorter upper body to give his or her lower extremities more length Adjustments are done according to the certain body characteristic of your subject based on his her function or purpose The body proportion should also match the age of your subject A person that is eight heads tall effectively portrays an average adult but it is most unlikely the case when portraying a pre teen Considering that the subject will have a smaller head which will be used to approximate his her height the number of heads used to convey how tall he she is must be decreased as well Considering that an average man is eight heads tall A young adult can be seven to seven and half heads tall A teenager can be six to seven heads tall A young child can be five to six and half head tall A toddler can be four to five heads tall Notice how the head measurements adjust according to their age An individual s growth gradually decreases as he she reaches adulthood But certain measurements and alignments are still implied no matter how old the subject is such as the comparative length per head s size of arms and legs and the same level of wrists to the crotch

Faces and Portraits For the Absolute Beginner John Davidson, 2013-05-15 Learn to Draw Faces and Portraits For the Absolute Beginner TABLE OF CONTENTS Introduction Drawing Tools Basic Head Layout Facial Features Eyes Nose Mouth Measuring Via Eye Size Front view Quarter view Side view Profile Basic head layout There are few characteristics of a head that is relative to almost everyone this similarity in measurements will be your guide if you are to construct a face when

drawing a portrait The eyes are positioned below above or right at the center of the head s perfect center level It is usually aligned with the upper tip of the ear The head s space above and below the eyes location are equal The nose wings are usually aligned with the tear ducts and its nose ball is aligned with the ear lobes this similarity changes depending on the person s age as the ears grow bigger Both tips of the mouth are nearly aligned with the center of both eyes Although you will surely encounter a person that has a little difference on these measurements it would be easier for you to identify his or her unique proportion value if you have the knowledge about what is most usual The familiarity to different angles of the head is essential when drawing faces Head shapes differ in every angle The position of each facial feature gradually changes as the head makes a quarter turn And as it turns further on one side their sizes slightly change and the features reveal their unseen angles thus totally changing their shape A head facing in a perfect front view would have two equal sides most of the time while a head in a quarter angle view shows the outline of the nose bridge which cannot be portrayed perfectly when in front view The lips would reveal its thickness as it loses the exposure of its further tip And the further ear and eye will lose its exposure as the head turns further on the side These natural gradual adjustments happen when the head moves horizontally Unlike horizontal movements when a head moves in a diagonal direction it changes the diagonal thickness of the head dynamically thus the facial features follow Each facial feature comes closer together as the head leans further The nostrils become totally exposed as the nose ball clearly establish its distance from the plane face surface The thickness of the lower lip can be easily conveyed as it overlaps the upper lip and the eye shapes would appear flat When the head moves downwards the nose depending on its height would overlap the lips and the eyebrows depending on its thickness would slightly overlap the eyes The height of the neck would be hidden as the top of the head becomes clearly conveyed totally changing or rather hiding the face s horizontal height The facial ridges of males are more defined and prominent compared to females especially the nose bridge Brow Bridge and the jaw line But there are few cases in which the shape of a man s profile looks more feminine than usual or vice versa In this case you have to rely on the facial features he or she have to clearly portray his or her gender such as thick eyebrows or any facial hairs for men or pouty glossy lips and long eyelashes for women

The Science of Living With Honesty and Integrity John Davidson, 2013-05-15 The Science of Living With Honesty and Integrity Table of Contents Introduction Earning Good Karma Quite an honest man Let My Conscience Speak for Me Black Gray and White Inflexibility And Compromise Walk Quietly by by the Other Side Conclusion Author Bio Introduction Integrity is telling myself the truth And honesty is telling the truth to other people Spencer Johnson I was reading a story by a French writer in the 17th century and I found this line very amusing The more he talked about his honesty the faster we counted our spoons Well cynicism is definitely not something new in the 21st century It has passed down the ages and especially when Shakespeare said The lady doth protest too much methinks when he wrote Hamlet in 1602 Here was a clear sighted person who knew that somebody was trying to persuade herself and trying to pretend to the world that what she was saying was her

own belief and the truth as she saw it How many of us are self deceivers Some of us will not and cannot face reality Some of us are ready to blame others for our shortcomings Some of us are quite prepared to fight for what we consider to be the truth because we have expounded it and we want other people to share our beliefs and thoughts Be honest with yourself Once you have faced reality you can be honest with others Honesty especially when you are able to face reality and you can understand that you are in the wrong or you are in the right is something very few people can do They would rather stick their heads in the sand hoping against hope that the problem is going to go away Of course they were not responsible for that particular problem It just happened I was reading a Novel by Amanda Quick in which the whole family decided that they belonged to Bad blood which was frivolous spendthrift and definitely not responsible That is why they could fob off all their extravagances and stupid behavior to this excuse we cannot help it our ancestors were like that and they passed on their habits to us This was Regency England Even today we have plenty of people using the same excuse because they are definitely not honest enough to admit it that they do not have the strength or the willpower or the inclination to make something of themselves They would rather go with the wind and pretend helplessly that they really cannot do something because well they are not capable of doing that They belong to a genetically imperfect family they do not have any money they have always been pulled down by circumstances and situations and other such puerile and feeble excuses These are just ways and means in which they can shirk their responsibilities These people are slackers and freeloaders They are not honest to themselves or to others however much they may pretend to be honest in the given sense of the word They also do not have personal integrity
