The Monthly Religious Magazine, 1864 *Cooperative Buildings* Norbert Streitz, Shin'ichi Konomi, Heinz-Jürgen Burkhardt, 2007-08-03 This volume constitutes the proceedings of the First International Workshop on operative Buildings CoBuild 98 Integrating Information Organization and Architecture held in Darmstadt Germany on February 25-26 1998 The idea for this workshop and actually the term cooperative building was created during the activities of initiating the consortium Workspaces of the Future for conducting an interdisciplinary R D program in cooperation with partners from industry We discovered that there was no appropriate forum to present research at the intersection of information technology organizational innovation and architecture The theme Integrating information organization and architecture reflects the challenges resulting from current and future developments in these three areas In

the future work and cooperation in organizations will be characterized by a degree of dynamics flexibility and mobility that will go far beyond many of today's developments and examples. The introduction of information and communication technology has already changed processes and contents of work significantly. However, the design of work environments, especially physical work spaces as offices and buildings, remained almost unchanged. It is time to reflect these developments in the design of equally dynamic flexible and mobile work environments. The papers of this volume show that this is an interdisciplinary endeavor requiring a wide range of perspectives and the utilization of results from various areas of research and practice.
