The Way of a Child A. C. Harwood, 2013-05-17 Despite the development of modern educational theories and the ingenious methods devised to hold a child's attention today education and even childhood appear to be facing something of a crisis The fact that boredom or even extreme violence can be spoken of in connection with little children is a sad reflection on our times Are children in danger of losing the natural human fantasy that is the source of all creative imagination in later life Are we in danger indeed of losing childhood altogether Although first published in 1940 Cecil Harwood's little book has become a classic introduction to the perennial themes of child development and growth and to the basic principles of Rudolf Steiner Waldorf education Cecil Harwood 1898 1975 was one of the founding members of the first Waldorf school in the English speaking world and worked for many years as a Steiner teacher His sensitive awareness and respect for the innate wisdom of childhood shine through this book As he demonstrates a sympathetic and loving picture of this natural childhood wisdom is a prerequisite of any good educational endeavour

The Education of the Child Rudolf Steiner,1996 **Educating Children Today** Rudolf Steiner,2013-04-16 Vague and general phrases cannot provide the basis for a genuine art of education which depends on real knowledge of the human being It is not that such phrases are wrong but that they are as useless as saying that all parts of a machine must be made to work together harmoniously To make a machine work you have to apply real detailed knowledge not phrases and truisms For the art of education likewise what is important is specific insight into the way the human being is constituted and how each aspect develops In his earliest and most succinct statement regarding education Rudolf Steiner describes the stages of childhood development and explains why it is important to introduce aspects of the curriculum at specific times He relates developmental steps in children to the births of the non physical aspects of the human being the etheric body that

accompanies the change of teeth the astral body that becomes apparent at puberty and the birth of the I that heralds the individual's maturation to adulthood Without this knowledge says Steiner well meaning but misguided educational theory and practise can cause harm

Aspects of Human Evolution Rudolf Steiner, 1987 8 lectures Berlin May 29 July 24 1917 CW 176 How to Keep Your Soul Alive after Twenty Seven This could have been the title of this book The author shows that the natural development of the soul stops at around the age of twenty seven After that nothing happens for our inner being unless we learn to make it happen Part of the tragic nature of our time is that more and more people allow their soul life to die at twenty seven so that the remainder of their life becomes a kind of mummification Steiner explains how by exerting our thinking and feeling we can keep our soul alive and growing This is ultimately the only way we can make this incarnation a satisfactory one Through such effort we can continue to develop inwardly until a very advanced age each year becoming richer and more interesting than the one before Aspects of Human Evolution is a book that gives real meaning to the idea that we live in a state of becoming This book is a translation from German of *Menschliche und menschheitliche Entwicklungswahrheiten Das Karma des Materialismus* vol 176 in the Bibliographic Survey *Understanding Child*
