Suicide by Proxy in Early Modern Germany Kathy Stuart,2023-07-24 Suicide by Proxy became a major societal problem after 1650 Suicidal people committed capital crimes with the explicit goal of earning their executions as a short cut to their salvation Desiring to die repentantly at the hands of divinely instituted government perpetrators hoped to escape eternal damnation that befell direct suicides Kathy Stuart shows how this crime emerged as an unintended consequence of aggressive social disciplining campaigns by confessional states Paradoxically suicide by proxy exposed the limits of early modern state power as governments struggled unsuccessfully to suppress the tactic Some perpetrators committed arson or blasphemy or confessed to long past crimes usually infanticide or bestiality Most frequently however they murdered young children believing that their innocent victims would also enter paradise The crime had cross confessional appeal as illustrated in case studies of Lutheran Hamburg and Catholic Vienna

The Unpolitical Massimo Cacciari,2009 Massimo Cacciari is one of the leading public intellectuals in today s Italy This collection of essays on political topics provides the best introduction in English to his thought to date This carefully curated collection includes chapters on Hofmannsthal Luk cs Benjamin Nietzsche Weber Derrida Schmitt Canetti and Aeschylus Written between 1978 and 2006 these essays engagingly address the most hidden tradition in European political thought the unpolitical Far from being a refusal of politics The Unpolitical represents a merciless critique of political reason and a way out of the now impracticable consolations of utopia and harmonious community A lucid and engaging Introduction by Alessandro Carrera sets these essays in the context of Cacciari s work generally and in the broadest context of its historical and geographical backdrop

Bernini Claude Douglas Dickerson (III),Gian Lorenzo Bernini,Anthony Sigel,Ian Wardropper,2012 The brilliantly expressive clay models created by Gian Lorenzo Bernini 1598 1680 as sketches for his works in marble offer extraordinary insights into his

creative imagination Although long admired the terracotta models have never been the subject of such detailed examination This publication presents a wealth of new discoveries including evidence of the artist s fingerprints imprinted on the clay resolving lingering issues of attribution while giving readers a vivid sense of how the artist and his assistants fulfilled a steady stream of monumental commissions Essays describe Bernini s education as a modeler his approach to preparatory drawings his use of assistants and the response to his models by 17th century collectors Extensive research by conservators and art historians explores the different types of models created in Bernini s workshop Richly illustrated Bernini transforms our understanding of the sculptor and his distinctive and fascinating working methods Publisher s website [Cassell's Magazine](#) ,1902 [Sir Rudolf Peierls](#) Sabine Lee,2009 This edition of the private and scientific correspondence of Sir Rudolf Peierls gives a unique insight into the life and work of one of the greatest theoretical physicists of the 20th century Rudolf Peierls scientific work contributed to the early developments in quantum mechanics and he is well known and much appreciated for his contributions to various disciplines including solid state physics nuclear physics and particle physics As an enthusiastic and devoted teacher he passed on his knowledge and understanding and inspired the work of collaborators and students alike As an effective administrator he was responsible almost single handedly for the establishment of an outstanding successful centre of theoretical physics in Birmingham and later contributed much to theoretical physics in Oxford [Rudolf Nureyev](#) Patricia Boccadoro,2023-09-28 Following an unorthodox first meeting in London in 1964 Patricia Boccadoro subsequently got to know Rudolf Nureyev on a personal basis In this amusing informative book she recounts how exciting it was to see him dance in those heady London years before giving a lucid account of his directorship of the Paris Opera Ballet **Loyola's Greater Narrative** Frédéric Conrod,2008 The Baroque imagination has its roots in Ignatius of Loyola s Spiritual Exercises 1547 which defined for the Counter Reformation era the parameters in which Catholic believers must confront the Enemy and the temporal corruption he embodies in order to enter a state of grace and obtain salvation Through complex interactions of different imaginative functions Loyola s text is able to superpose a variety of simultaneous narrative levels In order to reformulate the greater narrative the Magisterium of the Roman faith beyond what is revealed in Scripture the Spiritual Exercises require their exercitant to become an active participant in this narrative through constant visual contact with orders of corruption that is spaces in which virtue can be confronted with physical decay and sin Through these spaces Counter Reformation Rome La Roma Ignaziana would redefine the economy of salvation and diffuse the visual dynamics of the Spiritual Exercises throughout the Catholic world In their writings Spanish Golden Age authors Miguel de Cervantes and Baltasar Graci n use the rising modernity of the novel to transform Loyola s notion of orders of corruption by adapting it to the secular world Their encoded criticism of Loyolan imagination contributed to the epistemological crisis that marks the Baroque age but also prepared the way for the crucial debates that would take place during the Enlightenment such as the deconstruction of the Catholic greater narrative reflected in Loyola This book concludes with a discussion of the

eventual negation of Loyolan imagination in the novels of the Marquis de Sade which undermine the Roman faith by parodying the Baroque forms of spiritual visual experience and negate the Loyolan projection into orders of corruption

Sir Rudolf Peierls: Selected Private And Scientific Correspondence (Volume 2) Sabine Lee, 2009-05-12 This edition of the private and scientific correspondence of Sir Rudolf Peierls gives a unique insight into the life and work of one of the greatest theoretical physicists of the 20th century. Rudolf Peierls' scientific work contributed to the early developments in quantum mechanics and he is well known and much appreciated for his contributions to various disciplines including solid state physics, nuclear physics and particle physics. As an enthusiastic and devoted teacher, he passed on his knowledge and understanding and inspired the work of collaborators and students alike. As an effective administrator, he was responsible almost single handedly for the establishment of an outstanding successful centre of theoretical physics in Birmingham and later contributed much to theoretical physics in Oxford. A meticulous collector of correspondence, Sir Rudolf left a fascinating collection of letters in some cases spanning more than seven decades. This collection includes correspondence with his parents, his wife, the Russian born physicist Genia Kannegieser, life long friends such as Hans Bethe and many great physicists including Wolfgang Pauli, Niels Bohr, Werner Heisenberg, Lev Landau and George Placzek to name but a few. The second volume, which covers the years 1945 to 1995, contains fascinating documents from the early postwar period when Peierls, like many of his colleagues elsewhere, attempted to rebuild academic life in the aftermath of the Second World War. Materials from the 1950s provide evidence for the significance of the research undertaken by Peierls' group at Birmingham and for the positive impact of his determined implementation of international exchange on the development of theoretical physics. Later documents illustrate the role played by Peierls in nuclear disarmament and as a link between East and West through his own personal contacts and within international organisations such as the Pugwash Movement. The extensive apparatus provides an invaluable background which allows the reader to put the documents into their multi faceted social, political and scientific context.
