Summary of Anthony Weston's A Rulebook for Arguments Everest Media, 2022-05-04T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The first step in making an argument is to ask yourself what you are trying to prove Your conclusion is the statement for which you are giving reasons The statements that give your reasons are your premises 2 Arguments are like any other form of movement They may be graceful or clumsy sharp or confused clean or muddled You want clarity and efficiency even grace if you can manage it 3 The premise of an argument is the statement that is being argued for It is important to make sure that your premises are strong since they will be the foundation of your conclusion If you are not sure about the reliability of a premise you may need to do some research and or give an argument for the premise itself 4 Do not use emotionally loaded words to describe your own side If you can t understand how someone could hold the view you are criticizing it is probably because you don t understand it yet

Russel Murray,2011-10-20 **Accountability Citizenship** Stephen P. Tryon,2013-02-18 Read this book if you want to be able to speak with your friends about your social and political beliefs with confidence Striving to maintain a centrist perspective Tryon presents a tool kit to empower citizen participation in the American political process Technological changes in the way we present and process information coupled with inherent features of the free press have changed the nature of the individual citizen s engagement with our elected public servants Accountability Citizenship explains how we can restore accountability in government by accepting our personal accountability for some simple tasks we must do as individual citizens living in the age of information The book is non partisan Readers are asked only to agree on the very basics that the government of the United States is supposed to represent the people of the United States The author

makes a compelling case that changes in our information distribution technologies and business models discourage effective political participation by citizens In the early days of our republic information distribution was based on newspapers subscription based and geographically aligned with the representative structure of Congress Over the past forty years deregulation of television and radio along with the information technology revolution have disrupted this alignment But we can restore accountability through the three steps of accountability citizenship being appropriately positive appropriately informed and appropriately engaged
