Rules Reasons And Norms Selected Essays:

Rules, Reasons, and Norms Philip Pettit, 2002 The essays selected here come in three packages The first set of essays is concerned with the rule following response dependent character of thought the second with the many factors to which choice is rationally responsive and by reference to which choice can be explained consistently being under the control of such reason giving thought and the third with the implications of this multiple sensitivity for how best to regulate human institutions with a view to securing a desirable normative order **Rules, Reasons, and Norms** Philip Pettit, 2002

Russell, Idealism, and the Emergence of Analytic Philosophy Peter Hylton, 2003 **Philip Pettit: Five Themes from his Work** Simon Derpmann, David P. Schweikard, 2015-12-11 This volume documents the 16th Münster Lectures in Philosophy and examines five themes that are prominent in the work of philosopher and political theorist Philip Pettit These themes are Epistemology and Semantics Philosophy of Mind Consequentialism Group Agency and Republicanism The book provides insight into Pettit's work and demonstrates the central role his work plays in a number of contemporary philosophical debates Pettit's contributions to the philosophy of mind and action rational choice theory the philosophy of the social sciences as well as metaethics normative ethics and political philosophy are main points of reference and have advanced ongoing and initiated new discussions The book shows that a striking feature of Pettit's work has been the depth of his analyses and arguments regarding individual topics ranging from rule following to free will from group agency to social ontology and the methodology of the social sciences from a defense of consequentialism to the revival of the republican tradition in the theory of democracy and to value theory but also their systematic overall coherence The book contains Pettit's lecture Freedom and Other Robustly Demanding Goods nine critical papers on Pettit's philosophy and a reply article entitled Self Defense on Five Fronts A Reply to My Commentators Reason and Value: Themes from the Moral Philosophy of Joseph Raz R. Jay Wallace, Philip Pettit, Samuel Scheffler, Michael Smith, 2004-03-04 Reason and Value collects 15 new papers by leading contemporary philosophers on themes from the work of Joseph Raz Raz has made major contributions in a wide range of areas including jurisprudence political philosophy and the theory of practical reason but all of his work displays a deep engagement with central themes in moral philosophy The subtlety and power of Raz's reflections on ethical topics make his writings a fertile source for anyone working in this area Especially significant are his explorations of the connections between practical reason and the theory of value which constitute a sustained and penetrating treatment of a set of issues at the very center of moral philosophy as it is practiced today The contributors to the volume acknowledge the importance of Raz's contributions by engaging critically with his positions and offering independent perspectives on the topics that he has addressed The volume aims both to honour Raz's accomplishments in the area of ethical theorizing and to contribute to an enhanced appreciation of the significance of his work for the subject **When Minds Converse** Philip Pettit, 2025-02-11 When Minds Converse argues that we do not speak because our human minds are special our minds are

special because we can speak It maintains that six capacities characteristic of our species emerge as social skills in conversing with one another and that we internalize those skills in mentally communing with ourselves in thought Philip Pettit defends a society first view of the human mind and more broadly the human soul gesturing at how this philosophical anthropology can support universal ideals of equality respect and freedom Three of the abilities the book targets involve informational processing Our capacity to update our beliefs and other attitudes intentionally seeking out the judgments that we ought to make and the attitudes we ought to hold Our capacity to rely on intentional reasoning looking for the grounds on which to support judgments and looking at what our judgments in turn support And our ability to direct perception intentionally as we recruit it to the service of those capacities and learn to distinguish between appearance and reality The other three capacities addressed have a relational character Our ability to establish and uphold standards and values for one another and for ourselves making tacit commitments to live by them Our ability to ascribe and assume accountability holding one another and ourselves responsible to those norms and values And our ability to assume the status of persons embracing the implications of those commitments in the persona we hold out to others and indeed to ourselves Pettit offers an empirically informed but philosophical defence of his view In an extended thought experiment a conceptual genealogy he explores the likely unplanned effects that the first appearance of language would have on the minds of humanoid creatures otherwise like us The argument is that they would evolve a range of conversive practices and that the skills elicited by those practices are good models of the capacities targeted here The genealogy does not try to explain how those practices and skills evolved among our forebears but relying on the lessons of the thought experiment seeks to shed light on their nature and role in our social and mental life

Encyclopedia of Global Justice Deen K. Chatterjee, 2012-01-23 This two volume Encyclopedia of Global Justice published by Springer along with Springer's book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas [The Birth of Ethics](#) Philip Pettit, 2018-10-15 Imagine a human society perhaps in pre history in which people were generally of a psychological kind with us had the use of natural language to communicate with one another but did not have any properly moral concepts in which to exhort one another to meet certain standards and to lodge related claims and complaints

According to *The Birth of Ethics* the members of that society would have faced a set of pressures and made a series of adjustments in response sufficient to put them within reach of ethical concepts Without any planning they would have more or less inevitably evolved a way of using such concepts to articulate desirable patterns of behavior and to hold themselves and one another responsible to those standards Sooner or later they would have entered ethical space While this central claim is developed as a thesis in conjectural history or genealogy the aim of the exercise is philosophical Assuming that it explains the emergence of concepts and practices that are more or less equivalent to ours the story offers us an account of the nature and role of morality It directs us to the function that ethics plays in human life and alerts us to the character in virtue of which it can serve that function The emerging view of morality has implications for the standard range of questions in meta ethics and moral psychology and enables us to understand why there are divisions in normative ethics like that between consequentialist and Kantian approaches

Humanizing Mental Illness Abigail Gosselin, 2021-08-15 Mental illness stigma is rooted in a perceived lack of agency but stigma itself undermines agency While most philosophical accounts of the matter are concerned with the question of how much agency a person with mental illness has this book asks how we can enhance the agency of people with mental illness Humanizing Mental Illness explains and explores these connections arguing that all of us can and should adjust our social practices to enhance the agency of people with mental illness This agency is complicated and nuanced as it is often directly constrained due to a person's symptoms and indirectly constrained due to stigma Abigail Gosselin both a scholar in the field of social philosophy and a person with a psychiatric disability illustrates the importance of social interaction for developing and exercising agency By overcoming mental illness stigma and by adopting certain epistemic and moral virtues we can interact with people who have mental illness in ways that help enhance their agency and enable them to flourish Humanizing Mental Illness demonstrates that we need to challenge our explicit and implicit biases and learn to interact with mental illness in more intentional supportive and inclusive ways

Institutional Supports for the International Rule of Law Charles Sampford, Ramesh Thakur, 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system

Wittgenstein's Metametaphysics and the Realism-Idealism Debate Marius Bartmann, 2021-06-12 This book develops a new Wittgenstein interpretation called Wittgenstein's Metametaphysics The basic idea is that one major strand in Wittgenstein's early and later philosophy can be described as undermining the dichotomy between realism and idealism The aim of this book is to contribute to a better understanding of the relation between language and reality and to open up avenues of dialogue to overcome deep divides in the research literature In the course of developing a comprehensive and in depth interpretation the author provides fresh and original analyses of the latest issues in Wittgenstein scholarship and gives new answers to both major exegetical and philosophical problems This makes the book an illuminating study for scholars and advanced students alike

Preference Change Till Grüne-Yanoff, Sven Ove Hansson, 2009-06-11 Changing preferences is a phenomenon often invoked but rarely properly accounted for Throughout the history of the social sciences researchers have come against the possibility that their

subjects preferences were affected by the phenomenon to be explained or by other factors not taken into account in the explanation. Sporadically attempts have been made to systematically investigate these influences but none of these seems to have had a lasting impact. Today we are still not much further with respect to preference change than we were at the middle of the last century. This anthology hopes to provide a new impulse for research into this important subject. In particular we have chosen two routes to amplify this impulse. First we stress the use of modelling techniques familiar from economics and decision theory. Instead of constructing complex all encompassing theories of preference change the authors of this volume start with very simple formal accounts of some possible and hopefully plausible mechanism of preference change. Eventually these models may find their way into larger empirically adequate theories but at this stage we think that the most important work lies in building structure. Secondly we stress the importance of interdisciplinary exchange. Only by drawing together experts from different fields can the complex empirical and theoretical issues in the modelling of preference change be adequately investigated.

Deliberative Democracy and its Discontents Jose Luis Marti, Samantha Besson, 2017-03-02
 Drawing on political legal national post national as well as American and European perspectives this collection of essays offers a diverse and balanced discussion of the current arguments concerning deliberative democracy. Its contributions focus on discontent provide a critical assessment of the benefits of deliberation and also respond to the strongest criticisms of the idea of democratic deliberation. The essays consider the three basic questions of why how and where to deliberate democratically. This book will be of value not only to political and democratic theorists but also to legal philosophers and constitutional theorists and all those interested in the legitimacy of decision making in national and post national pluralistic polities.

The History of Understanding in Analytic Philosophy Adam Tamas Tuboly, 2022-02-10
 Interpretive understanding of human behaviour known as *verstehen* underpins the divide between the social sciences and the natural sciences. Taking a historically orientated approach this collection offers a fresh take on the development of understanding within analytic philosophy before during and after logical empiricism. In doing so it reinvigorates debates on the role of the social sciences within contemporary epistemology. Bringing together leading experts including Martin Kusch Thomas Uebel Karsten Stueber and Giuseppina D'Oro it is an authoritative reference on the logical empiricists philosophy of social science. Charting the various reformulations of *verstehen* as proposed by Wilhem Dilthey Max Weber R.G. Collingwood and Peter Winch the volume explores the reception of the social sciences prior to logical empiricism before surveying the positive and negative critiques from Otto Neurath Felix Kaufmann Viktor Kraft and other logical empiricists. As such chapters reveal that *verstehen* was not altogether rejected by the Vienna Circle but was subject to various conceptual uses and misuses. Along with systematic historical coverage the book situates *verstehen* within contemporary interdisciplinary developments in the field shedding light on the 21st century turn to understanding among analytic philosophers and opening further lines of inquiry for philosophy of social science.

Oxford Handbook of Neuroethics Judy Illes, Barbara J. Sahakian, 2011-04-07
 This handbook

presents a pioneering review of a topic central to the sciences and humanities It presents a range of chapters considering key issues discussion and debate at the intersection of brain and ethics **Revising Fiction, Fact, and Faith** Nathaniel Goldberg,Chris Gavalier,2020-07-01 This book addresses how our revisionary practices account for relations between texts and how they are read It offers an overarching philosophy of revision concerning works of fiction fact and faith revealing unexpected insights about the philosophy of language the metaphysics of fact and fiction and the history and philosophy of science and religion Using the novels of J R R Tolkien as exemplars the authors introduce a fundamental distinction between the purely physical and the linguistic aspects of texts They then demonstrate how two competing theories of reference descriptivism and referentialism are instead constitutive of a single semantic account needed to explain all kinds of revision The authors also propose their own metaphysical foundations of fiction and fact The next part of the book brings the authors philosophy of revision into dialogue with Thomas Kuhn s famous analysis of factual and specifically scientific change It also discusses a complex episode in the history of paleontology demonstrating how scientific and popular texts can diverge over time Finally the authors expand their philosophy of revision to religious texts arguing that rather than being distinct such texts are always read as other kinds that faith tends to be more important as evidence for religious texts than for others and that the latter explains why religious communities tend to have remarkable historical longevity Revising Fiction Fact and Faith offers a unique and comprehensive account of the philosophy of revision It will be of interest to a wide range of scholars and advanced students working in philosophy of language metaphysics philosophy of literature literary theory and criticism and history and philosophy of science and religion
