Center, 1966 **Artie Azzetti & Me** Paul Berge, 2009-11-10 Rejection Slip Theater r produced a string of radio drama literary marvels but none more popular than Paul Berge s Artie Azzetti stories about kids growing up in New Jersey during the Vietnam War era 1959 1975 Based on Berge s weekly monologues as host of the radio series Rejection Slip Theater which aired 1993 2003 **Parts of a Whole** Lucas Champollion, 2017-03-09 This book uses mathematical models of language to

explain why there are certain gaps in language things that we might expect to be able to say but can t For instance why can we say I ran for five minutes but not I ran all the way to the store for five minutes Why is five pounds of books acceptable but five pounds of book not acceptable What prevents us from saying sixty degrees of water to express the temperature of the water in a swimming pool when sixty inches of water can express its depth And why can we not say all the ants in my kitchen are numerous The constraints on these constructions involve concepts that are generally studied separately aspect plural and mass reference measurement and distributivity In this book Lucas Champollion provides a unified perspective on these domains connects them formally within the framework of algebraic semantics and mereology and uses this connection to transfer insights across unrelated bodies of literature and formulate a single constraint that explains each of the judgments

**Constraints and Language** Philippe Blache,Henning Christiansen,Verónica Dahl,2014-10-16 The concept of constraint is widely used in linguistics computer science and psychology However its implementation varies widely depending on the research domain namely language description knowledge representation cognitive modelling and problem solving These various uses of constraints offer complementary views on intelligent mechanisms For example in depth descriptions

implementing constraints are used in linguistics to filter out syntactic or discursive structures by means of dedicated description languages and constraint ranking In computer science the constraint programming paradigm views constraints as a whole which can be used for example to build specific structures Finally in psycholinguistics experiments are carried out to investigate the role of constraints within cognitive processes both in comprehension and production with various applications such as dialog modelling for people with disabilities In this context Constraints and Language builds an extended overview of the use of constraints to model and process language This book will be useful for researchers willing to get a grip on the various uses of constraints in natural language processing and also as a class book for academic staff who want to set up advanced courses around the concept of constraint based natural language processing The Disowned Edward Bulwer Lytton Baron Lytton,1840 **The Disowned** Edward G.
