**Running and Breathing** Justin O'Brien, 2002 Dr O'Brien's unique style of running incorporates special yogic breathing techniques. This method he created has helped many athletes from marathoners and national swimmers to international tennis players and Olympic stars. It will enhance your running, increase your endurance, and help you have fun with your workout. Runner's World Running on Air Budd Coates, Claire Kowalchik, Editors of Runner's World Magazine, 2013-04-09

Renowned running coach Budd Coates presents *Runner's World Running on Air*, a revolutionary yet simple training method based on rhythmic breathing to help runners at all experience levels improve their performance, prevent injury, and experience the joy of running. Validating his method through a mix of accessible science, Eastern philosophy, and the experiences of test subjects, Coates shows readers how focusing on their breathing brings their minds and bodies into harmony and helps them run stronger, faster, and more comfortably. Rhythmic breathing increases lung volume, improves awareness and control, helps prevent injury and side stitches, improves running for those with asthma, allows runners to quickly set a pace for quality training and racing, and helps athletes manage muscle cramps. This book reviews the basics of rhythmic breathing, teaching readers how to perform it while walking and eventually while running. Weeklong sample schedules from different programs show readers how to apply the rhythmic breathing scale to any workout. Coates also touches on the importance of stretching, cross training, and core training, and provides detailed training plans and schedules.
