*The Role Of Markets In The World Food Economy* D. Gale Johnson, G. Edward Schuh, 2019-07-11 This book extends the discussion of world food problems by giving explicit recognition to the potential role of markets The authors highlight the contribution of prices to the solution of food problems in low income countries for example by providing adequate incentives to farmers to expand production assuring that food supplies can be obtained through trade when needed and giving appropriate signals to consumers They also document the negative effects on food supply and national welfare of the actual price policies of many Third World governments While recognizing the problems involved in defining and measuring hunger as well as in improving the food supply the authors consider the outlook for future food availability as favorable in terms of continued modest improvement in per capita food supplies at prices adjusted for inflation that are likely to continue the slow decline of recent decades One focus of their comments is the positive roles that governments can and should play in the world food economy especially in support of research creation of human capital and provision of appropriate rural infrastructure

*Developing States, Shaping Citizenship* Erin Hern, 2019-05-20 At the nexus of political science development studies and public policy *Developing States Shaping Citizenship* analyzes an overlooked driver of political behavior citizens past experience with the government through service provision Using evidence from Zambia this book demonstrates that the quality of citizens interactions with the government through service provision sends them important signals about what they can hope to gain from political action These interactions influence not only formal political behaviors like voting but also collective behavior political engagement and subversive behaviors like tax evasion Lack of capacity for service delivery not only undermines economic growth and human development but also citizens confidence in the responsiveness of the political system Absent this confidence citizens are much less likely to participate in democratic processes express their preferences or comply with state revenue collection Economic development and political development in low capacity states Hern argues are concurrent processes Erin Accampo Hern draws on original data from an original large N survey interviews Afrobarometer data and archival materials collected over 12 months in Zambia The theory underlying this book s framework is that of policy feedback which argues that policies once in place influence the subsequent political participation of the affected population This theory has predominantly been applied to advanced industrial democracies and this book is the first explicit effort to adapt the theory to the developing country context
