Britain in the Twentieth Century Charles More,2014-05-22 In a century of rapid social change the British people have experienced two world wars the growth of the welfare state and the loss of Empire Charles More looks at these and other issues in a comprehensive study of Britains political economic and social history throughout the twentieth century This accessible new book also engages with topical questions such as the impact of the Labour party and the role of patriotism in British identity      Planning Twentieth Century Capital Cities David Gordon,2006-09-27 This book examines the plans for sixteen important capital cities around the world each with its own fully illustrated chapter written by an expert on the urban development of that city      *The Agrarian History of England and Wales* Edward John T. Collins,Joan Thirsk,2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns      **Rural Planning Futures** Mark Scott,John Sturzaker,Nick Gallent,Gavin Parker,Amy Burnett,Ian Mell,2025-04-09 Rural Planning Futures charts the critical societal challenges that are reshaping rural places across the UK and Ireland The book evaluates current planning processes and

explores the prospects for an enhanced cross sectoral and holistic future practice that mediates rural change towards more resilient and sustainable outcomes Rural places and planning have for too long been viewed as marginal to both the theory and practice of planning However rural places are central to addressing critical global challenges from climate action through nature recovery energy transitions and food security to water quality while also facing more localised conflicts around housing the siting of infrastructure and the challenge of sustaining local services The policy response to these complex challenges has too often been fragmented siloed and fixated on the short term By illustrating how key rural capitals are linked and integrated this book argues for a reset of the rural planning narrative and for the urgent disruption of established ways of working Using innovative case studies the chapters detail how planning for rural places must be guided by the pursuit of social value rather than protecting private interests This book is essential reading for undergraduate and graduate students in planning geography rural studies landscape studies and regional studies

**An Environmental History of Twentieth-Century Britain** John Sheail, 2017-03-14 Environmental history the history of the relationship between people and the natural world is a dynamic and increasingly important field In *An Environmental History of Twentieth Century Britain* John Sheail breaks new ground in illustrating how some of the most pressing concerns came to be recognised and a response made Much use is made of archival sources in tracing a number of key issues including Management of change by central and local government The manner in which natural processes were incorporated in projects to protect personal and public health and ultimately environmental health New beginnings in forestry The emergence of a third force alongside farming and forestry in the countryside Management of a transport revolution and mitigation of environmental hazards Such instances of policy making are reviewed within the wider context of a growing awareness both on the part of government and business of the role of environmental issues in the creation of wealth and social well being for us all *An Environmental History of Twentieth Century Britain* is essential reading for all those concerned with these issues

*Planning on the Edge* Nick Gallent, Johan Andersson, Marco Bianconi, 2006-09-27 More than a tenth of the land mass of the UK comprises urban fringe the countryside around towns that has been called planning's last frontier One of the key challenges facing spatial planners is the land use management of this area regarded by many as fit only for locating sewage works essential service functions and other un neighbourly uses However to others it is a dynamic area where a range of urban and rural uses collide *Planning on the Edge* fills an important gap in the literature examining in detail the challenges that planning faces in this no man's land It presents both problems and solutions and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country Its findings are presented in three sections the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe including commerce energy recreation farming and housing managing the urban fringe more effectively in the future Students professionals and researchers alike will benefit from the book's

structured approach while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience

**Politics and Preservation** John Delafons, J. Delafons, 2005-08-12 This book traces the policy history of urban conservation and its relationship to the town planning process and both are set in their political context Part One deals with the origins of conservation and its cultural background Part Two deals with the post war legislation and the increasing scope of conservation Part Three deals with churches and their separate control system and Part Four brings the story up to the present time New issues such as sustainable conservation and the latest government policy are addressed in the conclusion This book will aid current practice and help to inform future directions

**Introduction to Rural Planning**

Nick Gallent, Meri Juntti, Sue Kidd, Dave Shaw, 2008-01-14 Providing an overview of rural spatial planning for students on planning geography and related programmes this book charts the major patterns and processes of rural change affecting the British countryside its landscape its communities and its economies in the twentieth century The authors examine the role of planning in shaping rural spaces not only the statutory comprehensive planning that emerged in the post war period but also planning and rural programme delivery undertaken by central regional and local policy agencies The book is designed to accompany a typical teaching programme in rural planning and considers the nature of rural areas and the emergence of statutory planning in England the agents of rural policy delivery and the potential for current planning practice to become a policy hub at the local level co ordinating the actions and programmes of different agents economic change in the countryside and the influence planning has in shaping rural economies social change the nature of rural communities and recent debates on housing and rural service provision environmental change the changing fortunes of farming landscape protection and the idea of a multi functional landscape made by forces that can be shaped by the planning process key areas of current concern in spatial rural planning including debates surrounding city regions the rural the challenge of managing rural change in the twenty first century through new planning and governance processes A comprehensive coverage of the forces processes and outcomes of rural change whilst keeping planning s influence and role in clear view at all times

**Planning Middle Eastern Cities** Yasser Elsheshtawy, 2004-08-02 Middle Eastern cities cannot be lumped together as a single group Rather they make up the urban kaleidoscope of the title as the diversity of the six cities included here shows They range from cities rich in tradition Cairo Tunis and Baghdad to neglected cities Algiers and Sana a to newly emerging oil rich Gulf cities Dubai The authors are all young Arab scholars and architects local to the cities they describe providing an authentic voice with an understanding no outsider could achieve These contributors move away from an exclusively Islamic reading of Arab cities which they regard as outdated and counterproductive Instead they explore issues of identity and globalization in the context of the struggles and solutions offered by each city from the late nineteenth century to the present day Their focus is on how the built environment has changed over time and under different influences

The Anatomy of the Village Thomas Sharp, 2013-07-24 Thomas Sharp was a key figure in mid C20 British planning whose renown stems from

two periods in his career First he came to attention as a polemical writer in the 1930s on planning issues including as a virulent opponent of garden cities His prose tempered over time and this phase perhaps culminated in Town Planning first published in 1940 and reputed to have sold over 250 000 copies Subsequently the plans he produced for historic towns in the 1940s such as Oxford were very well known and were influential in developing ideas of townscape Started as an official manual on village planning The Anatomy of the Village followed on from the Scott Report for which Sharp had been one of the Secretaries When the Ministry decided not to proceed with the publication Sharp himself published in it 1946 It became one of Sharp s best known works with lucid prose and generous illustration by photograph and beautiful line drawings of village plans The aim of The Anatomy of the Village was to set out the main principles of village planning especially in relation to physical design Anatomy became a key text in thinking about villages in the post war period a period when there was great concern that settlements should develop in more sensitive ways than inter war ribbon and suburban development patterns The problems of poor quality development unrelated to settlement form was to continue to stimulate books such as Lionel Brett s Landscape in Distress and campaigns from the Architectural Review Reading the text today it still has much to offer while some of its assumptions about the level of services a village might support clearly belong to another era its beautiful and simple typological analyses of village form continue to be of relevance

**The Women's Land Army in First World War Britain** B. White, 2014-07-16 Between 1917 and 1919 women enlisted in the Women s Land Army a national organisation with the task of increasing domestic food production Behind the scenes organisers laboured to not only recruit an army of women workers but to also dispel public fears that Britain s Land Girls would be defeminized and devalued by their wartime experiences An Environmental History of the UK Defence Estate, 1945 to the Present Marianna

Dudley, 2012-05-03 This book brings to attention the history of places that have traditionally remained under the radar in discussions of war and the environment through site based studies of five training areas in southwest England and Wales Salisbury Plain Lulworth Dartmoor Sennybridge and Castlemartin At these sites the big events of the twentieth century are written into landscapes that absorb their impact and reflect change in intriguing ways Here however environment is more than a canvas on which historical forces play out it has an agency of its own as the depiction of the surprising nature and robust habitats of the training areas recognises An Environmental History of the UK Defence Estate 1945 to the Present critically examines the gradual greening of the MoD as it developed policies of military environmentalism It includes the histories of the ghost villages created by forced evictions and charts the rise and fall of anti military protest movements It depicts heated confrontations mass trespasses and demands for public access alongside conservation work and training activities situating the human histories of these sites within their environmental history and taking the reader behind the barbed wire in the first study of its kind

**Planning Europe's Capital Cities** Thomas Hall, 2003-12-16 During the nineteenth century many of Europe s capital cities were subject to major expansion and improvement schemes From Vienna s

Ringstrasse to the boulevards of Paris the townscapes which emerged still shape today's cities and are an inalienable part of European cultural heritage In *Planning Europe's Capital Cities* Thomas Hall examines the planning process in fifteen of those cities and addresses the following questions when and why did planning begin and what problems was it meant to solve who developed the projects and how and who made the decisions what urban ideas are expressed in the projects what were the legal consequences of the plans and how did they actually affect subsequent urban development in the individual cities what similarities or differences can be identified between the various schemes how have such schemes affected the development of urban planning in general His detailed analysis shows us that the capital city projects of the nineteenth century were central to the evolution of modern planning and of far greater impact and importance than the urban theories and experiments of the Utopians
