The Palgrave Handbook of Agricultural and Rural Development in Africa Evans S. Osabuohien, 2020-07-06 This handbook examines agricultural and rural development in Africa from theoretical empirical and policy stand points It discusses the challenges of the United Nations Sustainable Development Goals SDGs and assesses how poverty and other development concerns can be addressed in rural communities through agricultural transformation Additionally the handbook extends the Post 2015 Development Agenda and it emphasizes the importance of the agricultural sector as it is closely related to the issues of food sustainability poverty reduction and employment creation The contributors suggest multiple evidence based policies to develop the rural areas through the transformation of the agricultural sector which can significantly benefit the African continent *Priorities and Strategies in Rural Poverty Reduction* Diana Alarcón González, 2004 *Poverty Alleviation Pathways for Achieving Sustainable Development Goals in Africa* Thokozani Simelane, 2020-10-28 The inability to eradicate poverty among societies demands a synergistic approach This calls for the development of multi pronged pathways for transitioning towards sustainable development goals Many of these have been developed and tested across the world Some have proved to be effective in illuminating the underlying cause of the world s inability to eradicate poverty This is being driven by the fact that sustainable development as a global development concept represents a multidimensional phenomenon that includes many different indicators of human development This volume which derives from the papers presented at the seventh Africa Unity for Renaissance Conference that was held at Freedom Park Pretoria South Africa seeks to supplement existing pathways by highlighting Africa s approach to poverty alleviation which can possibly be attained through enhanced nutrition food security energy and gender equity Evidence presented reflects strengths weaknesses and opportunities on how Africa can transition towards sustainable development goals The information provided is useful to countries interested in assisting Africa to develop pathways for achieving sustainable development goals within the scope of Agenda 2063 The book is a good reference for policy makers academics government authorities and students interested in research and developmental studies *Perspectives on Poverty in India* The World Bank, 2011-04-13 The book examines India s experience with poverty reduction in a period of rapid economic growth Marshalling evidence from multiple sources of survey data and drawing on new methods the book asks how India s structural transformation from rural to urban and from agriculture to nonfarm sectors is impacting poverty Our analysis suggests that since the early 1990s urban growth has emerged as a much more important driver of poverty reduction than in the past We focus in particular on the role of small and medium size conurbations in India both as the urban sub sector in which urban poverty is overwhelmingly concentrated and as a sub sector that could potentially stimulate rural based poverty reduction Second in rural areas we focus on the nature of intersectoral transformation out of agriculture into the nonfarm economy Stagnation in agriculture has been accompanied by dynamism in the nonfarm sector but there is much debate about whether the growth

seen has been a symptom of agrarian distress or a source of poverty reduction Finally alongside the accelerating economic growth and the highly visible transformation that is occurring in India s major cities inequality is on the rise This is raising concern that economic growth in India has by passed significant segments of the population The third theme on social exclusion asks if despite the dramatic growth historically grounded inequalities along lines of caste tribe and gender have persisted This book would be of interest for policymakers researchers non governmental organizations and international agencies from India and abroad who wish to know more about India s experience of the last two decades in reducing poverty

Productivity Growth in Agriculture Keith Owen Fuglie, Sun Ling Wang, V. Eldon Ball, 2012 This volume is written primarily for agricultural economists doing research on productivity It includes discussions of the theoretical underpinnings of productivity measurement as well as the many practical considerations that go into translating this theory into actual measures of aggregated outputs and inputs The unifying concept of agricultural productivity used across the chapters of this volume is aggregate total factor productivity TFP of the sector The volume also contains detailed analysis of the underlying causes of agricultural productivity growth Part I chapters 2-6 examines agricultural productivity in high income and transition countries Part II chapters 7-11 examines agricultural productivity growth and its driving forces in five important agricultural producers in Asia and Latin America Part III chapters 12-14 focuses on measuring and identifying constraints to agricultural productivity growth in sub Saharan Africa Part IV chapters 15-16 gives a global perspective on agricultural productivity

Transforming Food Systems for a Rising India Prabhu Pingali, Anaka Aiyar, Mathew Abraham, Andaleeb Rahman, 2019-05-14 This open access book examines the interactions between India s economic development agricultural production and nutrition through the lens of a Food Systems Approach FSA The Indian growth story is a paradoxical one Despite economic progress over the past two decades regional inequality food insecurity and malnutrition problems persist Simultaneously recent trends in obesity along with micro nutrient deficiency portend to a future public health crisis This book explores various challenges and opportunities to achieve a nutrition secure future through diversified production systems improved health and hygiene environment and greater individual capability to access a balanced diet contributing to an increase in overall productivity The authors bring together the latest data and scientific evidence from the country to map out the current state of food systems and nutrition outcomes They place India within the context of other developing country experiences and highlight India s status as an outlier in terms of the persistence of high levels of stunting while following global trends in obesity This book discusses the policy and institutional interventions needed for promoting a nutrition sensitive food system and the multi sectoral strategies needed for simultaneously addressing the triple burden of malnutrition in India

Structural Transformation and Rural Change Revisited Bruno Losch, Sandrine Freguin-Gresh, Eric Thomas White, 2012-06-18 Based on new evidence from in depth field surveys this book addresses the unique situation of countries that remain deeply engaged in agriculture and proposes a set of policy orientations which could

facilitate the process of rural change **Agro-industries for Development** ,2009-01-01 The development of competitive agro industries is crucial for creating employment and income opportunities as well as enhancing the quality of and demand for farm products This book addresses strategies required for improving agro industrial competitiveness in ways that can generate employment and fight poverty in the developing world *Success in Agricultural Transformation* Isabelle Tsakok,2011-08-01 To lift and keep millions out of poverty requires that smallholder agriculture be productive and profitable in the developing world Do we know how to make this happen Researchers and practitioners still debate how best to do so The prevailing methodology which claims causality from measures of statistical significance is inductive and yields contradictory results In this book instead of correlations Isabelle Tsakok looks for patterns common to cases of successful agricultural transformation and then tests them against other cases She proposes a hypothesis that five sets of conditions are necessary to achieve success She concludes that government investment in and delivery of public goods and services sustained over decades is essential to maintaining these conditions and thus successfully transform poverty ridden agricultures No amount of foreign aid can substitute for such sustained government commitment The single most important threat to such government commitment is subservience to the rich and powerful minority **Undernutrition, Agriculture and Public Provisioning** Swarna Sadasivam Vepa,Brinda Viswanathan,2020-04-21 Using quantitative techniques this volume provides empirical evidence on the crucial role of public provisioning of food water sanitation and health care in reducing undernutrition among women and children in India The linkages are cogently explored and connected to the sustainable development goals Key data comes from recent large secondary sources at district household and individual levels and the econometric methodologies are clearly explained Taken as a whole it highlights the effects of public provisioning on malnutrition and identifies the relative importance of agricultural growth in resolving the nutrition problems in rural and semi urban areas of India This edited volume will be valuable reading for advanced graduate students researchers and practitioners in development economics development studies and nutrition and public health
