## Seeking An Alliance:

*Seeking an Alliance*, **A Theory of Foreign Policy** Glenn Palmer, T. Clifton Morgan, 2011-10-30 This book presents a general explanation of how states develop their foreign policy The theory stands in contrast to most approaches which assume that states want to maximize security by assuming that states pursue two things or goods through their foreign policy change and maintenance States in other words try both to change aspects of the international status quo that they don't like and maintain those aspects they do like A state's ability to do so is largely a function of its relative capability and since national capability is finite a state must make trade offs between policies designed to achieve change or maintenance Glenn Palmer and Clifton Morgan apply their theory to cases ranging from American foreign policy since World War II to Chinese foreign policy since 1949 to the Suez Canal Crisis The many implications bear upon specific policies such as conflict initiation foreign aid allocation military spending and alliance formation Particularly useful are the implications for foreign policy substitutability The authors also undertake statistical analyses of a wide range of behaviors and these generally support the theory A Theory of Foreign Policy represents a major advance over traditional analyses of international relations Not only do its empirical implications speak to a broader range of policies but more importantly the book illuminates the trade offs decision makers face in selecting among policies to maximize utility given a state's goals [America's Entangling Alliances](#)

Jason W. Davidson, 2020-11-02 America's Entangling Alliances challenges the belief that the US resists international alliances By documenting thirty four alliances categorized as defense pacts military coalitions or security partnerships Davidson finds that the US demand for allies is best explained by looking at variance in its relative power and the threats it has faced

**Managing Network Resources** Ranjay Gulati, 2007-03-15 Today's firms are increasingly embedded in networks of alliances that influence their behavior and performance Ranjay Gulati examines the network resources that arise from these ties how successful firms manage these and how they influence strategy access to resources and perceptions of a firm's legitimacy *Flattering Alliances* Peter Lindström, Svante Norrhem, 2015-01-01 Taking a fresh look at the history of diplomacy this book looks at the fight for hegemony between France and Austria after the Peace of Westphalia 1648 showing how their clashes dragged the Scandinavian kingdoms into European top level politics and forced them to take part in the play constantly negotiating risks and profits Historians Peter Lindström and Svante Norrhem discuss how the Great Powers were binding allies to their side and how the Scandinavian countries and their political elites responded Many of the diplomatic strategies were solidified through family alliances patronage and economic politics something quite different from what is expected from today's diplomatic neutralities **Alliance Brand** Mark Darby, 2006-07-11 As pressure continues to build on organisations to achieve more with less partnering offers tremendous promise as a strategic solution However up to 70% of such initiatives fail to meet their objectives In this book alliance expert Mark Darby argues that in the age of the extended enterprise firms must display a positive reputation and hard results from their alliances in order to attract the best

partners and stand out from the growing crowd of potential allies Building on this he introduces the Alliance Brand concept explores its critical success factors and shows in detail how to apply it in your organisation Darby's straightforward advice and comprehensive maps and tools will guide you on the journey to fulfilling the promise of partnering The results are higher revenues and reduced alliance failure rates along with lower costs and fewer risks Alliance brands also have more satisfied staff and partners and a transparent audit friendly process to satisfy increasing governance concerns This leads to sustainable alliance success and ultimately partner of choice status in your chosen industries and markets That's a compelling return on investment That's an Alliance Brand

Gibling, 2008-10-15 The inaugural title in the Correlates of War series from CQ Press this 2 volume set catalogs every official interstate alliance signed from the Peace of Westphalia in 1648 through the early twenty first century ranking it among the most thorough and accessible reviews of formal military treaties ever published Maps and introductions showcase the effects of alliances on the region or international system in century specific chapters while individual narratives and summaries of alliances simultaneously provide basic information such as dates and member states as well as essential insights on the conditions that prompted the agreement Additionally separate and or secret articles are highlighted for additional context and interest Supplementary features of this two volume set include A timeline cataloging major events in political and military history Guides listing allegiances by region and by century An alphabetical treaty index Maps illustrating political boundaries across the centuries International Military Alliances is an indispensable resource for any library serving students of law politics history and military science **The Chancelleries of Europe** Alan Palmer, 2013-12-19 In the author's own words this is a book about chaps and maps More formally The Chancelleries of Europe is a study of traditional diplomacy at its peak of influence in the nineteenth century and the first years of the twentieth At the Congress of Vienna in 1814 15 the five Great Powers Austria Britain France Prussia and Russia established a system of international intercourse that safeguarded the world from major war for exactly a hundred years The successive crises that challenged this supranational system the unification of Italy and Germany the scramble for colonies in Africa and for trade concessions in Asia the decline of the Ottoman Empire and the emergence of Japan are well known Less attention has been given to the way the system functioned and to changes imposed on its character by the spread of speedier communications It is these gaps in our understanding of the international politics of the century that the author seeks to fill The book therefore studies the clashes of personality between crowned heads of the old empires and between rival statesmen and ambassadors seeking

advancement It compares the growth of personnel and specialist departments in the various foreign ministries assesses the impact of domestic politics on external affairs the power of the pressure groups like the British China Association and the Russian Far Eastern Committee the proto spin fed to favoured newspapers and in contrast the growing unease of press and public at hidden negotiations and the concealment of diplomatic expedients and alliances But the book also notes changes in the way diplomacy was conducted in the wake of technological inventions such as the semaphore towers of the early years and the electric telegraph and undersea cables of the second half of the century Moments of high drama skullduggery and bathos prove that the reading of diplomatic history is not the dull dreary drudge many abhorred in their schooldays

*Arguing about Alliances* Paul Poast, 2019-11-15 Why do some attempts to conclude alliance treaties end in failure From the inability of European powers to form an alliance that would stop Hitler in the 1930s to the present inability of Ukraine to join NATO states frequently attempt but fail to form alliance treaties In *Arguing about Alliances* Paul Poast sheds new light on the purpose of alliance treaties by recognizing that such treaties come from negotiations and that negotiations can end in failure In a book that bridges Stephen Walt's *Origins of Alliance* and Glenn Snyder's *Alliance Politics* two classic works on alliances Poast identifies two conditions that result in non agreement major incompatibilities in the internal war plans of the participants and attractive alternatives to a negotiated agreement for various parties to the negotiations As a result *Arguing about Alliances* focuses on a group of states largely ignored by scholars states that have attempted to form alliance treaties but failed Poast suggests that to explain the outcomes of negotiations specifically how they can end without agreement we must pay particular attention to the wartime planning and coordinating functions of alliance treaties Through his exploration of the outcomes of negotiations from European alliance negotiations between 1815 and 1945 Poast offers a typology of alliance treaty negotiations and establishes

what conditions are most likely to stymie the attempt to formalize recognition of common national interests *The Scourge of War* Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war. In doing so, Singer and his colleagues transformed the face of twentieth century political science. Their work provoked some of the most important debates in modern international relations about the rules governing territory, international intervention and the so called democratic peace. Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict. Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field. The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists. Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign.

**Strategic Alliances Among Health and Human Services Organizations** Darlyne Bailey, Kelly McNally Koney, 2000-05-17 Many of today's nonprofit health and human service organizations are developing coalitions, mergers and other types of interorganizational alliances. These newly formed partnerships are created to gain a greater capacity within the organization and establish community driven initiatives. While new strategies can enhance the scope and quality of organizations, they may also represent organizations' own survival. Through well developed examples, this book examines the formation and maintenance of strategic alliances. From the motives that lead organizations to form relationships to practical tips on how to sustain, recreate and end partnerships, this text is a useful reference for both beginners and seasoned practitioners.

**Global Organized Crime** Dina Siegel, H. Bunt, D. Zaitch, 2012-12-06 In the current processes of political, economic and cultural changes, serious cross border forms of organized crime receive unprecedented attention as spectacular global media events, as threats of all sorts and as priority targets of criminal policy and political agendas. Most books on global organized crime focus on one particular region, topic or event and are written from one specific theoretical and disciplinary framework. The renowned scholars who have contributed to this volume present up to date expertise on regions as distant and different as Russia, Colombia, the Netherlands, Israel, Peru and Britain. They tackle phenomena such as international drug trafficking, alien and women smuggling, terrorism, East European organized crime and financial crimes. They show not only how these issues are interrelated but also the way in which they interact with social, economic and political legitimate structures. The contributors critically question the policies and strategies currently pursued. They explore different theoretical arguments from the perspective of their own disciplines which include economics, criminology, political science and anthropology.

**Why Terrorist Groups Form International Alliances** Tricia Bacon, 2018-04-04 Terrorist groups with a shared enemy or ideology have ample reason to work together even if they are primarily pursuing different causes. Although partnering with another terrorist organization has the potential to bolster operational effectiveness,

efficiency and prestige international alliances may expose partners to infiltration security breaches or additional counterterrorism attention Alliances between such organizations which are suspicious and secretive by nature must also overcome significant barriers to trust the exposure to risk must be balanced by the promise of increased lethality resiliency and longevity In *Why Terrorist Groups Form International Alliances* Tricia Bacon argues that although it may seem natural for terrorist groups to ally groups actually face substantial hurdles when attempting to ally and when alliances do form they are not evenly distributed across pairs Instead she demonstrates that when terrorist groups seek allies to obtain new skills knowledge or capacities for resource acquisition and mobilization only a few groups have the ability to provide needed training safe haven infrastructure or cachet Consequently these select few emerge as preferable partners and become hubs around which other groups cluster According to Bacon shared enemies and common ideologies do not cause alliances to form but create affinity to bind partners and guide partner selection Bacon examines partnerships formed by the Popular Front for the Liberation of Palestine Al Qaida and Egyptian jihadist groups among others in a series of case studies spanning the dawn of international terrorism in the 1960s to the present *Why Terrorist Groups Form International Alliances* advances our understanding of the motivations of terrorist alliances and offers insights useful to counterterrorism efforts to disrupt these dangerous relationships
