March 3, 1931

Thank you for the "New". We think it is about the finest thing you've done. ... I think the great work of science. Ludwig, no, agree with your theories.

Sincerely, Chas. E. Kauff

January 3, 1932

... Your verse on "Time" I'd rather have than a load of love or in operation. It is fine. The last verse - carries one high and leaves him standing there. Sometimes you might to have a little collection of your poems printed.

Sincerely, Chas. E. Kauff

January 26, 1932

We have been so full you for weeks a [notice of the "New"] a few poems, with and deep and rise for with others want to "see it and read". Mrs. Hall and I like them. There have been some Friday evening and Mrs. Hall read it and told to us. They were both impressed with its idea and the way you have expressed it. I think it is of a high order.

Sincerely, Mrs. [Mary] [Kauff]

network of interrelated ideas which I have developed off and on over the past eight or ten years The underlying theme is the  
psychological interplay of order and chaos Or to put it another way the interplay of deduction and induction I will try to  
explain the relationship between logical orderly conscious rule following reason and fluid self organizing habit governed  
unconscious chaos infused intuition My previous two books The Structure of Intelligence and The Evolving Mind briefly  
touched on this relationship But these books were primarily concerned with other matters SI with constructing a formal  
language for discussing mentality and its mechanization and EM with exploring the role of evolution in thought They danced  
around the edges of the order chaos problem without ever fully entering into it My goal in writing this book was to go  
directly to the core of mental process where angels fear to tread to tackle all the sticky issues which it is considered prudent  
to avoid the nature of consciousness the relation between mind and reality the justification of belief systems the connection  
between creativity and mental illness All of these issues are dealt with here in a straightforward and unified way using a  
combination of concepts from my previous work with ideas from chaos theory and complex systems science      Paperbound
