## **Selected Works Volume I:**

**Collected Works, Volume I** Adolf Grünbaum, 2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science. This volume is the first of three collecting his most essential and highly influential work. The essays collected in this first volume focus on three related areas. They discuss scientific rationality, the problem of what it takes for a theory to be called scientific, and ask whether it is plausible to draw a clear distinction between science and non-science as was famously proposed by Karl Popper. They delve into the debate between determinism and indeterminism in both science and in the humanities. Grünbaum defends the position of the Humane Determinist, which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies. The second volume is devoted to Grünbaum's writings on the Philosophy of Physics and Space Time, and the third to his lectures on the Philosophy of Psychology and Psychoanalysis, including his 1985 Gifford Lectures which are to be published for the first time. **Collected Works, Volume 1** V. I.

Lenin, 2017-10-03 Among the most influential political and social forces of the twentieth century, modern communism rests firmly on philosophical, political, and economic underpinnings developed by Vladimir Ilyich Ulyanov, later known as Lenin. For anyone who seeks to understand the twentieth century, capitalism, the Russian Revolution, and the role of Communism in the tumultuous political and social movements that have shaped the modern world, the works of Lenin offer unparalleled insight and understanding. Taken together, they represent a balanced cross-section of his revolutionary theories of history, politics, and economics; his tactics for securing and retaining power; and his vision of a new social and economic order. This first volume contains four works: *New Economic Developments in Peasant Life*, *On the So-Called Market Question*, *What the Friends of the People Are and How They Fight the Social Democrats*, and *The Economic Content of Narodism and the Criticism of It in Mr. Struve's Book*, written by Lenin in 1893-1894 at the outset of his revolutionary activity during the first years of the struggle to establish a workers' revolutionary party in Russia. **Wilhelm Dilthey: Selected Works, Volume III** Wilhelm

Dilthey, 2021-07-13 This volume provides Dilthey's most mature and best formulation of his Critique of Historical Reason. It begins with three *Studies Toward the Foundation of the Human Sciences* in which Dilthey refashions Husserlian concepts to describe the basic structures of consciousness relevant to historical understanding. The volume next presents the major 1910 work *The Formation of the Historical World in the Human Sciences*. Here Dilthey considers the degree to which carriers of history—individuals, cultures, institutions, and communities—can be articulated as productive systems capable of generating value and meaning and of realizing purposes. Hegel's idea of objective spirit is reconceived in a more empirical form to designate the medium of commonality in which historical beings are immersed. Any universal claims about history need to be framed within the specific productive systems analyzed by the various human sciences. Dilthey's drafts for the *Continuation of the Formation* contain extensive discussions of the categories most important for our knowledge of historical life, meaning.

value purpose time and development He also examines the contributions of autobiography to historical understanding and of biography to scientific history The finest summary of Dilthey s views on hermeneutics can be found in *The Understanding of Other Persons and Their Manifestations of Life* Here Dilthey differentiates understanding relative to three kinds of manifestations of life After giving his analysis of elementary understanding he examines the role of induction in higher understanding and interpretation and the relevance of transposition and re experiencing for grasping individuality

*Hollywood's American Tragedies* Mandy Merck, 2007-11-01 Theodore Dreiser's dissection of the American dream An American Tragedy was hailed as the greatest novel of its generation Now a classic of American literature the story is one to which Hollywood has repeatedly returned Hollywood's obsession with this tale of American greed justice religion and sexual hypocrisy stretches across the history of cinema Some of cinema's greatest directors Sergei Eisenstein Josef von Sternberg and George Stevens have attempted to bring this classic story to the screen Subsequently both Jean Luc Godard and Woody Allen have returned to the story and to these earlier adaptations Hollywood's American Tragedies is the first detailed study of this extraordinary sequence of adaptations What it reveals is a history of Hollywood from its politics to its cinematography and much deeper of American culture and the difficulty of telling an American tragedy in the land of the American dream
