Theoretical Schools and Circles in the Twentieth-Century Humanities Marina Grishakova, Silvi Salupere, 2015-04-10

Schools and circles have been a major force in twentieth century intellectual movements They fostered circulation of ideas within and between disciplines thus altering the shape of intellectual inquiry This volume offers a new perspective on theoretical schools in the humanities both as generators of conceptual knowledge and as cultural phenomena The structuralist semiotic phenomenological and hermeneutical schools and circles have had a deep impact on various disciplines ranging from literary studies to philosophy historiography and sociology The volume focuses on a set of loosely interrelated groups with a strong literary linguistic and semiotic component but extends to the fields of philosophy and history the interdisciplinary conjunctions arising from a sense of conceptual kinship It includes chapters on unstudied or less studied groups such as Tel Aviv School of poetics and semiotics or the research group Poetics and Hermeneutics The volume presents a significant supplement to the standard historical accounts of literary critical and related theory in the twentieth century It enhances and complicates our understanding of the twentieth century intellectual and academic history by showing schools and circles in the state of germination dialogue controversy or decline in their respective historical and institutional settings while reaching simultaneously beyond those dense settings to the new cultural and ideological situations of the twenty first century

N.S. Trubetzkoy N. S. Trubetzkoy, 2001 Edited and with an introduction by Anatoly Liberman Translated by Marvin Taylor and Anatoly Liberman N S Trubetzkoy 1890 1939 is generally celebrated today as the creator of the science of phonology While his monumental *Grundzüge der Phonologie* was published posthumously and contains a summary of Trubetzkoy's late views on the linguistic function of speech sounds there has until now been no practical way to trace the development of his thought or to clarify the conclusions appearing in that later work With the publication of *Studies in General Linguistics and Language Structure* not only will linguists have that opportunity but a collection of Trubetzkoy's work will appear in English for the first time Translated from the French German and Russian originals these articles and letters present Trubetzkoy's work in general and on Indo European linguistics The correspondence reprinted here also for the first time in English is between Trubetzkoy and Roman Jakobson The resulting collection offers a view of the evolution of Trubetzkoy's ideas on phonology the logic in laws of linguistic geography and relative chronology and the breadth of his involvement with Caucasian phonology and the Finno Ugric languages A valuable resource this volume will make Trubetzkoy's work available to a larger audience as it sheds light on problems that remain at the center of contemporary linguistics

Central and Eastern European Literary Theory and the West Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century but its relation to Western literary scholarship is complex This book sheds light on the

entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations both official and informal encounters For the longest time however intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West A few literary theories nevertheless made it into Western scholarly discourses via exiled scholars Some of these scholars such as Mikhail Bakhtin become widely known in the West and their thought was transposed onto new Western cultural contexts others such as Olga Freidenberg were barely noticed outside of Russian and Poland This volume draws attention to the schools circles and concepts that shaped the development of theory in Central and Eastern Europe as well as the histoire croisée the history of translations transformations and migrations that conditioned its relationship with the West

Semiotics and City Poetics Mary Coghill, 2022-12-05 Roman Jakobson stands alone in his semiotic theory of poetic analysis which combines semiotics linguistics and structuralist poetics This groundbreaking book proposes methods for developing Jakobson's theories of communication and poetic function It provides an extensive range of examples of the kinds of Formalist praxis that have been neglected in recent years developing them for the analysis of all poetry but especially the poetry of our urban future Throughout the book the parameters of a city poetic genre are proposed and established the book also develops the theory of the function of shifters and deixis with special reference to women as narrators It also instantiates an experimental poetic praxis based on the work of one of Jakobson's great influences Charles Sanders Peirce Steadfastly adhering to the text in itself this volume reveals the often surprising hitherto unconsidered structural and semiotic patterns within poems as a whole

Semiotic Perspectives Sándor Hervey, 2016-11-18 First published in 1982 this book looks at a wide variety of issues concerning the vast field of study that is semiotics It begins by tracing the beginnings of modern semiotics in the works two pioneering figures Saussure and Peirce in order to present fundamental assumptions notions and distinctions which provide an essential background to the more recent developments The author then goes on to look at Behavioural Semiotics Luis Prieto's idea of l'Acte Semique Austin's theory of Speech Acts and Searle's elaborations Barthes move away from philosophical and scientific approaches in his ideology of Socio Cultural Signification Functionalism and Axiomatic Functionalism style as a form of communication semiotics of the cinema and communicative behaviour in non human species

The Writing of Spirit Sarah M. Pourciau, 2017-05-01 Contemporary thought has been profoundly shaped by the early twentieth century turn toward synchronic models of explanation which analyze phenomena as they appear at a single moment rather than diachronically as they develop through time But the relationship between time and system remains unexplained by the standard account of this shift Through a new history of systematic thinking across the humanities and sciences The Writing of Spirit argues that nineteenth century historicism wasn't simply replaced by a more modern synchronic perspective The structuralist revolution consisted rather in a turn toward time's absolutely minimal conditions

and thus also toward a new theory of diachrony Pourciau arrives at this surprising and powerful conclusion through an analysis of language scientific theories over the course of two centuries associated with thinkers from Jacob Grimm and Richard Wagner to the Russian Futurists in domains as disparate as historical linguistics phonology acoustics opera theory philosophy poetics and psychology The result is a novel contribution to a pressing contemporary question namely what role history should play in the interpretation of the present

A Story as Sharp as a Knife Robert Bringhurst, 2011-03-15 The Haida world is a misty archipelago a hundred stormy miles off the coasts of British Columbia and Alaska For a thousand years and more before the Europeans came a great culture flourished in these islands The masterworks of classical Haida sculpture now enshrined in many of the world's great museums range from exquisite tiny amulets to magnificent huge housepoles Classical Haida literature is every bit as various and fine It extends from tiny jewels

crafted by master songmakers to elaborate mythic cycles lasting many hours The linguist and ethnographer John Swanton took dictation from the last great Haida speaking storytellers poets and historians from the fall of 1900 through the summer of 1901 His Haida hosts and colleagues had been raised in a wholly oral world where the mythic and the personal interpenetrate completely They joined forces with their visitor consciously creating a great treasury of Haida oral literature in written form Poet and linguist Robert Bringhurst has worked for many years with these century old manuscripts which have waited until now for the broad recognition they deserve Boris Eikhenbaum Carol Joyce Any,1994 This is the first book length study of Boris Eikhenbaum 1886 1959 a leading Russian Formalist and a pathbreaking Tolstoy scholar The author carefully traces Eikhenbaum s intellectual trajectory from his pre Formalist philosophical criticism through Formalism to his later biographical criticism of Tolstoy and Lermontov Eikhenbaum s contribution to Formalism has not heretofore received clear definition and the author shows that his ideas and influence were even greater than previously supposed His shift away from Formalism with its emphasis on purely literary analysis toward a criticism that emphasized the writer as a cultural figure is seen as a response to both political exigency and personal need Although by the late 1910 s Formalism had become poetics non grata in the Soviet Union the author demonstrates that Eikhenbaum also had compelling intellectual reasons to move away from Formalism which had reached a dead end The author asserts that Eikhenbaum prolonged his scholarly life by concentrating on nineteenth century Russian authors whose moral opposition to mainstream Russian intellectual thought served as a model for his own ethical stance in Stalin s Russia This is particularly true of his monumental three volume work on Tolstoy which in its own way has been as influential as his Formalist writings Throughout the author relates Eikhenbaum s critical thinking to such current literary issues as intention perception meaning reader reception deconstruction and the New Historicism *Selected Writings: Slavic epic studies* Roman Jakobson,1962 **Prague**

Morphosyntactic Variation in Medieval Celtic Languages Elliott Lash,Fangzhe Qiu,David Stifter,2020-10-12 This book showcases the state of the art in the corpus based linguistics of medieval Celtic languages Its chapters detail theoretical advances in analysing variation change in the Celtic languages and computational tools necessary to process analyse the data Many contributions situate the Celtic material in the broader field of corpus based diachronic linguistics The application of
