Dark Side of the Tune: Popular Music and Violence Professor Bruce Johnson, Professor Martin Cloonan, 2013-01-28 Written against the academically dominant but simplistic romanticization of popular music as a positive force this book focuses on the dark side of the subject It is a pioneering examination of the ways in which popular music has been deployed in association with violence ranging from what appears to be an incidental relationship to one in which music is explicitly applied as an instrument of violence A

preliminary overview of the physiological and cognitive foundations of sounding hearing which are distinctive within the sensorium discloses in particular their potential for organic and psychic violence The study then elaborates working definitions of key terms including the vexed idea of the popular for the purposes of this investigation and provides a historical survey of examples of the nexus between music and violence from pre Biblical times to the late nineteenth century The second half of the book concentrates on the modern era marked in this case by the emergence of technologies by which music can be electronically augmented generated and disseminated beginning with the advent of sound recording from the 1870s and proceeding to audio internet and other contemporary audio technologies Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural confrontations from the local to the global particularly through violence The authors present a taxonomy of case histories in the connection between popular music and violence through increasingly intense forms of that relationship culminating in the topical examples of music and torture including those in Bosnia Darfur and by US forces in Iraq and Guant namo Bay This however is not simply a succession of data but an argumentative synthesis Thus the final section debates the implications of this nexus both for popular music studies itself and also in cultural policy and regulation the ethics of citizenship and arguments about human rights

Reverberations Michael Goddard, Benjamin Halligan, Paul Hegarty, 2012-05-31 Noise permeates our highly mediated and globalised cultures Noise as art music cultural or digital practice is a way of intervening so that it can be harnessed for an aesthetic expression not caught within mainstream styles or distribution This wide ranging book examines the concept and practices of noise treating noise not merely as a sonic phenomenon but as an essential component of all

communication and information systems The book opens with ideas of what noise is and then works through ideas of how noise works in contemporary media to conclude by showing potentials within noise for a continuing cultural renovation through experimentation Considered in this way noise is seen as an essential yet excluded element of contemporary culture that demands a rigorous engagement Reverberations brings together a range of perspectives case studies critiques and suggestions as to how noise can mobilize thought and cultural activity through a heightening of critical creativity Written by a strong international line up of scholars and artists Reverberations looks to energize this field of study and initiate debates for years to come *A Cultural History of Sound, Memory, and the Senses* Joy Damousi, Paula Hamilton, 2016-12-08 The past 20 years have witnessed a turn towards the sensuous particularly the aural as a viable space for critical exploration in History and other Humanities disciplines This has been informed by a heightened awareness of the role that the senses play in shaping modern identity and understanding of place and increasingly how the senses are central to the memory of past experiences and their representation The result has been a broadening of our historical imagination which has previously taken the visual for granted and ignored the other senses Considering how crucial the auditory aspect of life has been a shift from seeing to hearing past societies offers a further perspective for examining the complexity of historical events and experiences Historians in many fields have begun to listen to the past developing new arguments about the history and the memory of sensory experience This volume builds on scholarship produced over the last twenty years and explores these dimensions by coupling the history of sound and the senses in distinctive ways through a study of the sound of violence the sound of voice mediated by technologies and the expression of memory through the senses Though sound is the most developed field in the study of the sensorium many argue that each of the senses should not be studied in isolation from each other and for this reason the final section incorporates material which emphasizes the sense as relational *Musicians and their Audiences* Ioannis Tsioulakis, Elina Hytönen-Ng, 2016-12-19 How do musicians play and talk to audiences Why do audiences listen and what happens when they talk back How do new and old technologies affect this interplay This book presents a long overdue examination of the turbulent relationship between musicians and audiences Focusing on a range of areas as diverse as Ireland Greece India Malta the US and China the contributors bring musicological sociological psychological and anthropological approaches to the interaction between performers fans and the industry that mediates them The four parts of the book each address a different stage of the relationship between musicians and audiences showing its processual nature from conceptualisation to performance and through mediation to off stage discourses The musician audience conceptual division is shown throughout the book to be as problematic as it is persistent **Choose the Life You Want: The Mindful Way to Happiness** Tal Ben-Shahar, 2014-03-11 What kind of life do you want for yourself What choices will create this kind of life In his New York Times bestseller Happier positive psychology expert Tal Ben Shahar taught us how to become happier through simple exercises Now in Choose the Life You Want he has a new life changing lesson to
