Selective Nontreatment Of Handicapped Newborns:

Selective Nontreatment of Handicapped Newborns Robert F. Weir, 1984 Who decides and on what basis how to treat a child with severe birth defects Any decisions made on such cases are painful and complex and have far reaching consequences for society at large Addressing the medical legal and ethical aspects of the issue Robert Weir presents the first serious survey of the major arguments regarding selective non treatment which have been advanced by physicians attorneys and the judicial system Selective Nontreatment of Handicapped Newborns ,1985 **Selective Nontreatment of Handicapped Newborns** Susan A. Sullivan, 1987 **Prenatal Testing and Disability Rights** Erik Parens, Adrienne Asch, 2000-09-28 As prenatal tests proliferate the medical and broader communities perceive that such testing is a logical extension of good prenatal care it helps parents have healthy babies But prenatal tests have been criticized by the disability rights community which contends that advances in science should be directed at improving their lives not preventing them Used primarily to decide to abort a fetus that would have been born with mental or physical impairments prenatal tests arguably reinforce discrimination against and misconceptions about people with disabilities In these essays people on both sides of the issue engage in an honest and occasionally painful debate about prenatal testing and selective abortion The contributors include both people who live with and people who theorize about disabilities scholars from the social sciences and humanities medical geneticists genetic counselors physicians and lawyers Although the essayists don t arrive at a consensus over the disability community s objections to prenatal testing and its consequences they do offer recommendations for ameliorating some of the problems associated with the practice Institutional Ethics Committees Anne Fox Kiger, 1989

To Treat Or Not to Treat Richard C. Sparks,1988 A thorough survey of the ethical literature regarding the treatment or nontreatment of handicapped newborns

Infant Mortality, Morbidity, and Childhood Handicapping Conditions

Elizabeth L. Watkins,Leslie R. Melnick,1986

Paediatric Forensic Medicine and Pathology J. K. Mason,2013-12-19

Hardness of Heart/hardness of Life Larry Stephen Milner,2000 Infanticide is one of the most common yet least understood of all human crimes Although academic articles document isolated aspects of this problem a single unified analysis of infanticide has not been completed until now In Hardness of Heart Hardness of Life Larry Milner provides the first exhaustive survey of infanticide drawing on historical data from around the world He then uses this survey as a basis for investigating why infanticide has been present in every form of human society throughout history Both comprehensive and compelling this important study will intrigue students of human psychology social welfare and child abuse and will promote further research on this alarmingly overlooked atrocity Current Bibliographies in Medicine ,1988 Ethical Issues in Neurology James L. Bernat,2008 Written by an eminent authority from the American Academy of Neurology s Committee on Ethics Law and Humanities this book is an excellent text for all clinicians interested in ethical decision making The book features outstanding presentations on dying and palliative care physician assisted suicide and voluntary active euthanasia

medical futility and the relationship between ethics and the law New chapters in this edition discuss how clinicians resolve ethical dilemmas in practice and explore ethical issues in neuroscience research Other highlights include updated material on palliative sedation advance directives ICU withdrawal of life sustaining therapy gene therapy the very low birth weight premature infant the developmentally disabled patient informed consent organizational ethics brain death controversies and fMRI and PET studies relating to persistent vegetative state The Human Body and the Law David W. Meyers, 1990 An account of many aspects of medical practice and the law Dealing with such controversial areas as genetic engineering fetal rights transplantation euthanasia artificial reproduction and medical examination Meyers gives a breakdown of current debates and legal decisions in England Scotland and the US First published in 1970 Annotation copyrighted by Book News Disability and Equality Law ElizabethF. Emens, 2017-07-05 This interdisciplinary collection of essays addresses the theoretical practical and legal dimensions of equality for persons with disabilities The issues covered include the central problem of defining disability and impairment the dilemma of same versus different treatment the balance between autonomy and external influence and support linkages to other anti discrimination categories such as race and sex the place of disability theory within identity politics and issues of life death and our most intimate relationships The articles reflect a wealth of international viewpoints and interdisciplinary areas which include philosophy economics memoirs cultural studies empirical studies and legal scholarship The selection also includes classic texts which set out foundational ideas such as the social model of disability or the goal of integration alongside essays that critique these conceptual mainstays This volume brings into sharp focus a wide range of contentious and complex issues in the field of disability studies and is of interest to researchers and students from a wide range of fields **Cumulated Index Medicus** .1983 Spirit Children Aaron R. Denham, 2017-05-23 An ethnography of the spirit children phenomenon in northern Ghana placing infanticide in both a deeply nuanced local context and a global public health framework The Staff of Oedipus Martha L. Rose, 2010-02-11 Ancient Greek images of disability permeate the Western consciousness Homer Teiresias and Oedipus immediately come to mind But The Staff of Oedipus looks at disability in the ancient world through the lens of disability studies and reveals that our interpretations of disability in the ancient world are often skewed These false assumptions in turn lend weight to modern day discriminatory attitudes toward disability Martha L Rose considers a range of disabilities and the narratives surrounding them She examines not only ancient literature but also papyrus skeletal material inscriptions sculpture and painting and draws upon modern work including autobiographies of people with disabilities medical research and theoretical work in disability studies Her study uncovers the realities of daily life for people with disabilities in ancient Greece and challenges the translation of the term adunatos unable as disabled with all its modern associations Routledge <u>Library Editions: Special Educational Needs</u> Various, 2021-07-29 This set of 62 volumes originally published between 1951 and 1999 amalgamates a wide breadth of literature on Special Educational Needs with a particular focus on inclusivity class

management and curriculum theory This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of Education and those undertaking teaching qualifications *Practical Decision Making in Health Care Ethics* Raymond J. Devettere, 2016 In this revised fourth edition of the classic textbook Devettere updates most chapters adding new cases on the following overriding advance directives the palliative care movement prenatal life and abortion neonatal testing and mandatory vaccinations facial transplantations genetic testing and legal issues surrounding the Affordable Care Act

Making All the Difference Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents refusal to authorize it How does the law apply to a neighborhood that objects to a group home for developmentally disabled people Does equality mean treating everyone the same even if such treatment affects some people adversely Does a state requirement of employee maternity leave serve or violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system s ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By

illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference Global Bioethics Van Rensselaer Potter,2012-01-01 Van Rensselaer Potter created and defined the term bioethics in 1970 to describe a new philosophy that sought to integrate biology ecology medicine and human values Bioethics is often linked to environmental ethics and stands in sharp contrast to biomedical ethics Because of this confusion and appropriation of the term in medicine Potter chose to use the term Global Bioethics in 1988 Potter's definition of bioethics from Global Bioethics is Biology combined with diverse humanistic knowledge forging a science that sets a system of medical and environmental priorities for acceptable survival
