Self Determination And The Social Education Of Native Americans:

Self-Determination and the Social Education of Native Americans Guy B. Senese, 1991-06-19 Self determination a crucial conceptual development in American Indian social and educational policy and the force behind current Indian policy programs is critically analyzed in this volume by a scholar educator who has worked closely with Native Americans Guy B Senese explores the wide gulf between the rhetoric and the reality of self determination in contemporary Native American education an area that has received little scrutiny by students of American education policy Senese contends that many aspects of Native American self determination policy work against the full realization of that policy and are in fact contradictory Arguing that self determination is not a unified coherent policy moving toward more community and tribal self government and economic self help Senese makes a strong case for his theory that the policy has been a vehicle to promote a smooth transition toward a termination of the tribal federal relationship This book is an excellent addition to the developing literature that questions the pluralist assumptions of the late twentieth century liberal progressive social policy Each of the volume s three parts addresses a basic assumption of Native American social education policy Part I shows how self determination policy grew as a response to the moral requirements of reservation development in a political climate of American patriotism Part II shifts the focus more directly to schooling including a discussion of the concept of community control and the 1975 Self Determination and Educational Assistance Act The concluding section analyzes the dialogue that resulted from the fragmentation of Native Americans who were divided over the meaning of self determination How the concepts of trust and sovereignty have created grounds for the expropriation of the meaning of self determination is also explored This volume s analysis of American Indian social and educational policy makes it required reading in the areas of Ethnic Studies Educational Policy Studies Ethnohistory and Sociology of Education The work is an important addition to the Education and Ethnic Studies collections of public and university libraries

A Critical Pedagogy for Native American Education Policy Lavonna L. Lovern, F.E. Knowles, 2015-10-14 A Critical Pedagogy for Native American Education Policy is an application of critical pedagogical theory to historical and recent Native American educational policy Focusing primarily on the Mvskoke Creek the authors provide a detailed historic timeline that is tied to the functionalist view of sociology as it is reflected in the institution of education in general Knowles

and Lovern examine the policy from the critical perspective with the application of Habermas and Freire They argue that the functionalist mode of education has furthered the cause of colonization and its attendant cultural destruction The emancipatory possibilities presented by the work of Habermas and Freire are mined for their application to the deficits created by the historical and continued colonization of Native Americans *Native Activism in Cold War America* Daniel M. Cobb, 2008-10-24 The heyday of American Indian activism is generally seen as bracketed by the occupation of Alcatraz in 1969 and the Longest Walk in 1978 yet Native Americans had long struggled against federal policies that threatened to undermine tribal sovereignty and self determination This is the first book length study of American Indian political activism during its seminal years focusing on the movement s largely neglected early efforts before Alcatraz or Wounded Knee captured national attention Ranging from the end of World War II to the late 1960s Daniel Cobb uncovers the groundwork laid by earlier activists He draws on dozens of interviews with key players to relate untold stories of both seemingly well known events such as the American Indian Chicago Conference and little known ones such as Native participation in the Poor People s Campaign of 1968 Along the way he introduces readers to a host of previously neglected but critically important activists Mel Thom Tillie Walker Forrest Gerard Dr Jim Wilson Martha Grass and many others Cobb takes readers inside the early movement from D Arcy McNickle s founding of American Indian Development Inc and Vine Deloria Jr s tenure as executive director of the National Congress of American Indians to Clyde Warrior s leadership in the National Indian Youth Council and describes how early activists forged connections between their struggle and anticolonialist movements in the developing world He also describes how the War on Poverty s Community Action Programs transformed Indian Country by training bureaucrats and tribal leaders alike in new political skills and providing activists with the leverage they needed to advance the movement toward self determination This book shows how Native people who never embraced militancy and others who did made vital contributions as activists well before the American Indian Movement burst onto the scene By highlighting the role of early intellectuals and activists like Sol Tax Nancy Lurie Robert K Thomas Helen Peterson and Robert V Dumont Cobb situates AIM s efforts within a much broader context and reveals how Native people translated the politics of Cold War civil rights into the language of tribal sovereignty Filled with fascinating portraits Cobb s groundbreaking study expands our understanding of American Indian political activism and contributes significantly to scholarship on the War on Poverty the 1960s and postwar politics and social movements Sociocultural Influences and Teacher Education Programs Dennis M. McInerney, Shawn Van Etten, 2003-06-01 In this volume we describe exemplary programs in teacher education that attempt to address some of the issues alluded to above Our authors address theoretical perspectives on the importance of teacher education for improving educational outcomes the achievement gap between different groups and in particular the significant achievement gap between indigenous students and other minorities and mainstream groups and how this might be overcome by better trained teachers and how teachers learn to be effective teachers and are these skills of effective
