Self Realization And Self Defeat:

Self-realization and Self-defeat Samuel J. Warner, 1966 *Self-Fulfillment* Alan Gewirth, 2009-11-02 Cultures around the world have regarded self fulfillment as the ultimate goal of human striving and as the fundamental test of the goodness of a human life The ideal has also been criticized however as egotistical or as so value neutral that it fails to distinguish between for example self fulfilled sinners and self fulfilled saints Alan Gewirth presents here a systematic and highly original study of self fulfillment that seeks to overcome these and other arguments and to justify the high place that the ideal has been accorded He does so by developing an ethical theory that ultimately grounds the value of self fulfillment in the idea of the dignity of human beings Gewirth begins by distinguishing two models of self fulfillment aspiration fulfillment and capacity fulfillment and shows how each of these contributes to the intrinsic value of human life He then distinguishes between three types of morality universalist particularist and personalist and shows how each contributes to the values embodied in self fulfillment Building on these ideas he develops a Dialectical conception of reason that shows how human rights are central to self fulfillment Gewirth also argues that self fulfillment has a social as well as an individual dimension that the nature of society and the obstacles that disadvantaged groups face affect strongly the character of the self fulfillment that persons can achieve Bold in scope and rigorous in execution *Self Fulfillment* is a powerful new contribution to moral social and political philosophy *Scientific Gestalt* Ray Edwards, 2012-08-15 Goldstein Koffka Kohler Lewin and Wertheimer were scientists who at the turn of the 20th century founded the gestalt approach in psychology Fritz Perls 1944 recognized the potential of the gestalt approach in psychotherapy and founded what is now the widespread system of gestalt therapy Perls understanding of gestalt theory was broadened by Zinker with recognition of stages of development of each gestalt so that what is now termed the Cleveland cycle of experience was recognized Ray Edwards has proposed two innovations First it is shown that completion and grounding of the gestalt cycle of events facilitates re energization of depressed people Second attention to Gendlin's felt senses aided by use of David Groves' clean subset of language facilitates freeing post trauma patients from the effect of recurrent nightmares and or flash backs The relevant felt senses are termed proto figures and are usually phenomena like butterflies in the stomach lumps in the stomach or throat and or clouds are hanging over me This present book sets these innovations in full historical context and reveals the gestalt system to be scientific in character Malcolm Parlett Ph D First Editor of the British Gestalt Journal commented on an earlier version of this book This is a thought provoking read a quirky and vividly argued alternative version of gestalt therapy that challenges most of the assumptions of contemporary Gestalt psychotherapy and will send many a reader flying to a computer to type a rebuttal But Ray Edwards book is definitely worth a look at not least for its acerbic criticisms and references to our past traditions I recommend the self published manuscript by an impressive maverick octagenarian gestalt thinker with strong opinions complete with its copious spelling errors and other forgiveable self indulgences **Interludes in a Time of Change:**

bombing the small fish into fish soup hell in response as did the West in Vietnam in that war every tree every outhouse every shack and every village until they drop so much ordinance that the entire region is brain dead from defoliants and pockmarks and natural calamities while leaving the center untouched would seem insane Yet that was the policy in Vietnam of America And then nothing happened Nothing happened week after week year after year except that America itself was being driven mad doing the same thing and expecting it to come out different That as the President elect said in 1993 was and is insanity But what choice did they all have The pro war liberal American leadership that designed the war in Vietnam did not dare bomb Hanoi the capitol of North Vietnam for fear of triggering World War III with Red China and with Soviet Russia both of whose client North Vietnam was So they tied their own hands figuring that by coming through the back door fish in the sea style piece by piece nobody will notice in China and Russia ergo no World War III So they took a strategy that was insane and made a virtue out of its necessity They tied their own hand And then they blamed the opposition for forcing them to fight with their hands tied behind their backs On the other h

The Ethics of Managed Care Mary R. Majumder, 2001-07-27 The Ethics of Managed Care A Pragmatic Approach Mary R. Anderlik A breakthrough reappraisal of the managed healthcare debate Discussions of managed care frequently begin and end with an opposition between the Hippocratic ethic of dedication to patient welfare and a business ethic of self interest in the service of efficiency Mary R. Anderlik approaches managed care as a problem of organizations Rejecting a simple medicine vs business analysis she directs attention to management as manipulation the neglect of such personal goods as satisfaction in professional accomplishment and organizational moral myopia In this account pragmatic suggests practical idealism not the jettisoning of principle in the interests of expediency In The Ethics of Managed Care Anderlik favors a broad empiricism and a moral vision centered on values of democracy and community She describes how organizations can nourish or destroy openness creativity cooperation and faithfulness and display virtues such as justice integrity responsiveness and efficiency rightly understood She uses community care clinics asthma outreach programs and new contexts for participatory decision making to show the promise of managed care She also explains the complexities of financial arrangements arguing for an end to schemes that reward clinicians for providing less care and profiting from avoiding people who need a lot of it The book concludes with a look at the future of managed care proposing a program for reform Mary R.
