Self And Identity Perspectives Across The Lifespan:

Self and Identity Terry Honess, Krysia M. Yardley, 2003-08-16 This volume reflects the renewal of interest in Self and Identity among social scientists. It adopts an interdisciplinary approach to explore different perspectives across the lifespan from the neonate to the elderly adult. Self-Perspectives across the Life Span Richard P. Lipka, Thomas M.

Brinthaupt, 1992-07-01 When and how is the self acquired and what characterizes its development and change over the life span? What are the implications of using different methodologies to study the self with different age groups? This book addresses these and related questions. The authors offer research on early and middle childhood, late childhood and adolescence, and adulthood and old age. Among the issues considered are the relationship between cognitive complexity and self evaluation in childhood, the pivotal socio-emotional tasks that confront the adolescent, and effects of situational and structural factors on the self-esteem of adolescents and adults, and age and gender differences in the ideal and undesired selves of young and older adults. These contributions illustrate the different theoretical and methodological issues that are associated with differing stages of the life span and provide a summary of the current knowledge base of the self across the life span. Unlike previous books on study of the self, this one provides a systematic analysis of the theoretical and methodological issues and a selection of several alternative methodologies for studying the self across the life span.

Advances in Psychology Research Alexandra Columbus, 2005 Advances in Psychology Research presents original research results on the leading edge of psychology. Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum. **Understanding Early Adolescent Self and Identity** Thomas M. Brinthaupt, Richard P. Lipka, 2012-02-01

What are the major self and identity concerns for early adolescents? What are the applications and interventions that can address those concerns, helping to ease the transition into later adolescence and adulthood? Providing a broad and interdisciplinary approach to studying the self, the contributors emphasize the practical implications of their work for understanding early adolescent self and identity and for designing interventions that facilitate development and adjustment. The book consists of four major sections in which contributors address conceptual issues, school transitions, peer and behavioral problems, and intervention programs. **Self and Identity--psychosocial Perspectives** Krysia M.

Yardley-Matwiejczuk, Krysia Yardley, Terry Honess, 1987 This study of self is a growing concern within psychology and related disciplines, particularly in social and clinical psychology, psychiatry, and personality studies. Self and Identity Yoshihisa

Kashima, Margaret Foddy, Michael Platow, 2002-04-01 This edited volume outlines the latest meta-theoretical and theoretical contexts of self research. Self and Identity examines theoretical accounts of human experience within the contemporary socio-cultural milieu and attempts to answer the question of what it means to be human. It provides a clear structure within which to conceptualize contemporary empirical research on self and identity in terms of personal, social, and symbolic aspects. In so doing, it identifies the symbolic aspect as an emerging area of contemporary significance. Featuring contributions from a

distinguished group of scholars and therapists the book is organized into four parts The editors provide section introductions to demonstrate how each chapter relates to the book's overall theme as well as how the chapter authors responded to the editors' charge to go beyond the social cognitive theory of the self Part I describes the current meta-theoretical context of self research the editors' interpretation of the social cognitive approach to the self and an emerging alternative theory the Connectionist Approach Part II highlights personal perspectives on selfhood Part III focuses on social perspectives and Part IV reviews symbolic processes The concluding chapter reviews the book's major themes with overlapping themes and intellectual disputes The book is intended for graduate students and researchers in social and personality psychology interested in self and identity and self research It may also be used as a supplemental text in advanced level courses on self and identity

Coping and Self-Concept in Adolescence H.A. Bosma, A.E. (Sandy) Jackson, 2012-12-06 Self concept and coping behaviour are important aspects of development in adolescence Despite their developmental significance however the two areas have rarely been considered in relation to each other This book is the first in which the two areas are brought together it suggests that this interaction can open the way to new possibilities for further research and to new implications for applied work with adolescents Two separate chapters review research carried out in each of the areas These are followed by a series of more empirically focussed chapters in which issues such as changes in relationship patterns difficult school situations leaving school use of leisure anxiety and suicidal behaviour are examined in the context of self concept and coping The final chapter seeks to identify some of the central themes emerging from this work and discusses possible research and applied implications

Davidson,2017-07-05 Useful work has been done in recent years in the areas of music psychology philosophy and education yet this is the first book to provide a wide assessment of what practical benefits this research can bring to the music practitioner With 25 chapters by writers representing a broad range of perspectives this volume is able to highlight many of the potential links between music research and practice The chapters are divided into five main sections Section one examines practitioners use of research to assist their practice and the ways in which they might train to become systematic researchers Section two explores research centred on perception and cognition while section three looks at how practitioners have explored their everyday work and what this reveals about the creative process Section four focuses on how being a musician affects an individual s sense of self and the how others perceive him or her The essays in section five outline the new types of data that creative researchers can provide for analysis and interpretation The concluding chapter discusses that key question what makes music affect us in the way it does The research findings in each chapter provide useful sources of data and raise questions that are applicable across the spectrum of music related disciplines Moreover the research methodologies applied to a specific question may have broader application for readers wishing to take on research themselves *Handbook of Adoption* Rafael A. Owens,Sheldon Stryker,Norman Goodman,2006-11-02 Self esteem is an academic and popular phenomenon vigorously researched and debated sometimes imbued with magical qualities other times vilified as the bane of the West s preoccupation with self Though thousands of articles have been devoted to the topic and bookshops work to feed the public s appetite for advice on revealing enhancing and maintaining self esteem conflicting claims and findings have placed the field in disarray In a very real sense self esteem is a victim of its own popularity This book seeks to add clarity to a concept earlier examined by such notable self theorists as Morris Rosenberg but eminently worthy of re examination and extension We do this by asking some leading thinkers on self esteem theory measurement and application to assess what we know about self esteem and link it to important aspects of society and the human experience **Narcissism and the Interpersonal Self** John Fiscalini,Alan L. Grey,1993 This study discusses narcissism and problems of the self from the perspective of psychoanalysis The contributors define the major differences between the interpersonal viewpoint and other schools of psychoanalysis in terms of both diagnosis and treatment Displacement, Identity and Belonging Alexandra J. Narrative Development in Adolescence Kate C. McLean, Monisha Pasupathi, 2009-11-11 Monisha Pasupathi and Kate C McLean Where Have You Been Where Are You Going Narrative Identity in Adolescence How can we help youth move from childhood to adulthood in the most effective and positive way possible This is a question that parents educators researchers and policy makers engage with every day In this book we explore the potential power of the stories that youth construct as one route for such movement Our emphasis is on how those stories serve to build a sense of identity for youth and how the kinds of stories youth tell are informed by their

broader contexts from parents and friends to nationalities and history Identity development and in particular narrative identity development concerns the ways in which adolescents must integrate their past and present and articulate and anticipate their futures Erikson 1968 Viewed in this way identity development is not only unique to adolescence and emergent adulthood but also intimately linked to childhood and to adulthood The title for this chapter borrowed from the Joyce Carol Oates story highlights the precarious position of adolescence in relation to the construction of identity In this story the protagonist poised between childhood and adulthood navigates a series of encounters with relatively little awareness of either her childhood past or her potential adult futures Her choices are risky and her future at the end looks dark
