## **Self Ego And Identity Integrative Approaches:**

**Self, Ego, and Identity** Daniel K. Lapsley, F. Clark Power, 2012-12-06 In the midst of the cognitive revolution there has been a veritable explosion of interest in topics that have been long banished from academic consideration under the intellectual hegemony of behaviorism. Most notably, notions of self, ego, and identity are reasserting themselves as fundamental problems in a variety of research traditions within psychology and the social sciences. Theoretical models, review articles, edited volumes, and empirical work devoted to these constructs are proliferating at a dizzying rate. This clearly attests to the renascent interest in these topics, the vitality of these research paradigms, and the promise that these constructs hold for explaining fundamental aspects of human development and behavior. Although the renewed academic interest in self, ego, and identity is obviously an exciting and healthy development, there is always the tendency for research to take on a parochial character. When boundaries are erected among different theoretical perspectives, when empirical findings are viewed in isolation, when theories are too sharply delimited and segregated from other domains of behavior, then what may seem like progressive healthy and content-increasing tendencies in a research paradigm may turn out to be, on closer inspection, merely an inchoate thrashing about. Fortunately, there is an internal dynamic to scientific investigation that tends to combat this degenerating tendency. There is something about the rhythm of science that bids us to transcend parochial theoretical interests and seek the most general theory. **Self, Ego, and Identity** Daniel K. Lapsley, F. Clark Power, 1988-01-01

**The Self: Interdisciplinary Approaches** Jaane Strauss, George R. Goethals, 2012-12-06 A truly remarkable explosion of interest in the self has taken place in the past two decades in psychology and related disciplines. This book presents a wide range of recent work on the self, from self-awareness in chimpanzees to multiple personality disorders, self-esteem in adolescents, as well as fundamental issues going back to the work of James Cooley and others. Three main groups or clusters of themes emerge. The first cluster consists of chapters that discuss the organization and coherence of the self; the second one deals with self-awareness and self-deception; and the third one examines in new ways the question of the relationship between self and other. While it is difficult to predict exactly where future work on the self will lead, scholars' work points in some significant directions and provides a firm reference in the field. Discussions on Ego Identity Jane

Kroger, 2014-09-19 Identity has been a topical issue in both popular and social science literatures for the past forty years. The writings of Erik Erikson on the identity formation process of late adolescence have provided an important theoretical foundation to clinical counseling and educational practices. As the literature on adolescent development has burgeoned over the last three decades, so have efforts to understand more systematically the means by which young people find their occupational, religious, political, sexual, and relational roles in life. One of the most popular research traditions to spring from Erikson's clinical observations has been the ego identity status approach developed by James Marcia. This approach has expanded Erikson's concept of identity to describe four distinct styles by which adolescents and adults deal with identity.

defining issues The present volume reflects the most recent efforts of social scientists who have contributed further to the work that Erikson and Marcia began an exhaustive analysis of the issues inherent in the adolescent identity formation process

Self and Identity Richard D. Ashmore, Lee Jussim, 1997-05-15 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress World class social scientists from psychology sociology and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey

**The Development of Social Cognition** Suzanne Hala, 2013-11-12 The Development of Social Cognition presents a lively up to date examination of both the classical issues and contemporary understanding of theory and research in social cognitive development The initial chapters highlight one of the central theoretical tensions in the field which is whether the development of understanding people is fundamentally different from understanding things Subsequent chapters are devoted to development across specific areas of social cognition from infancy through to adolescence The text ends with a comprehensive examination of the development of moral aspects of social cognition

*The Moral Self* Gil G. Noam, Thomas E. Wren, 1993 This follow up to The Moral Domain carries forward the exploration of new ways of modeling moral behavior This follow up to The Moral Domain carries forward the exploration of new ways of modeling moral behavior Whereas the first volume emphasized the work of Lawrence Kohlberg and the tradition of cognitive development The Moral Self presents a paradigm that also incorporates noncognitive structures of selfhood The concerns of the sixteen essays include the diversity of moral outlooks the dynamics of creating a moral self cognitive and noncognitive prerequisites of the psychological development of autonomy and moral competence and motivation and moral personality Contributors and Content

*Theology, Psychology and the Plural Self* Léon Turner, 2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts

*Social Cognition in Adolescence* Willem Koops, Harke A. Bosma, 2004 The special issue aims to develop a greater understanding of the relationship between social cognitive development in adolescence and social behaviour to discuss the mediating effects of other aspects of development in adolescence such as the parallel emergence of ideas concerning personal identity patterns of relationship development within or outside the family and to examine new approaches to the study of social development in adolescence Finally it considers the problems practical methodological and ethical associated with intervention in adolescence and how the approaches which are adopted may be guided by our understanding of young people's social cognitive development
