Self-determined Learning Theory Deirdre K. Mithaug,Martin Agran,James E. Martin,Michael L. Wehmeyer,2002-12-18 This volume brings together four semi autonomous bodies of research choice self determination self regulation and self management to form a new theory of self engaged learning entitled Self Determined Learning Theory This theory explains why and how students self engage It identifies the factors that give students the sense of control over their learning that is needed for sustained adaptive and ultimately successful learning It begins by describing the characteristics of disengaged learners then describes and illustrates self determined learning theory within both normal and special populations It then examines the theory s predictive value across several special population contexts and then concludes with a critique of the theory s credibility and worth Divided into three sections theory construction theory verification and theory evaluation this volume is organized using the four steps of a previous book Learning to Theorize A Four Step Strategy Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing Step 3 evaluates the credibility and worth of the explanation constructed in Step 2 Step 4 adjusts existing beliefs so they are consistent with the new theory Although aimed primarily at leaders in special education it should also appeal to researchers and scholars in psychology educational psychology and school psychology who are interested in the applications of self regulated learning theory in this case to special populations *Systematic Instruction of Functional Skills for Students and Adults with Disabilities* Keith Storey,2022-03-01 This book provides an overview of systematic instructional strategies and is written in a format so that teachers and other service providers can immediately put the information to use It specifically focuses upon systematic instruction for individuals with disabilities school age and adults and is generic across age groups as well as disability labels The book focuses on improving instructional practices for students and adults with disabilities Practitioners may understand the importance of placing individuals in different settings e g inclusive classrooms supported

employment sites but not understand how to improve their skills once they are in that setting This book is intended to give teachers and other service providers the instructional skills for improving the skills of the individuals that they are serving The most unique feature of the text is that it is written specifically for practitioners in the field teachers and adult service providers as well as those in training rather than being written for other academics An advantage of this book is that those preparing teachers and others can easily use it in methods courses as it covers instructional methodology that is seldom covered in detail in most texts College instructors will find the book a good choice for their classes based upon the consistent format throughout the book the readability of the book for students the comprehensive coverage of systematic instruction and the direct applicability to applied settings Others providing instruction supervision and training to direct service providers will find this book useful such as those working in schools as well as those in transition and adult service settings

Direct Behavior Rating Amy M. Briesch,T. Chris Riley-Tillman,Sandra M. Chafouleas,2016-06-01 Grounded in state of the art research this practical guide comprehensively shows how to harness the potential of direct behavior rating DBR as a tool for assessment intervention and communication in schools DBR can be used rapidly and efficiently in PreK 12 classrooms to support positive behavior and promote self management The authors and contributors provide concrete examples of ways to implement DBR strategies within multi tiered systems of support MTSS The evidence base supporting each strategy is reviewed More than 30 reproducible checklists and forms include step by step implementation blueprints daily report cards and more Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1 2 x 11 size

Developmental Aspects of Health Compliance Behavior Norman A. Krasnegor,Leonard Epstein,Suzanne B. Johnson,Sumner J. Yaffe,Leonard H. Epstein,2013-05-13 While in the late 1970s and early 1980s health compliance research on adults represented a vigorous field of study a marked decline of interest on the topic set in during the last part of the 1980s By contrast research on health compliance involving pediatric populations was less popular during the same period however interest in this topic as evidenced by the contributions to this volume is on the increase Four main themes relating to theory measurement prevention and intervention emerge and are interwoven among the chapters These themes help to bind and unify the volume into a conceptual whole because although the sections are divided along thematic lines contributors often include elements of some or all of the themes in their chapters This state of affairs reflects the interdependence of these thematic issues and suggests how important they are for the state of the art

Self-Regulated Learning and Academic Achievement Barry J. Zimmerman,Dale H. Schunk,2013-05-13 This volume brings together internationally known researchers representing different theoretical perspectives on students self regulation of learning Diverse theories on how students become self regulated learners are compared in terms of their conceptual origins scientific form research productivity and pedagogical effectiveness This is the only comprehensive comparison of diverse classical theories of self regulated learning in print The first edition of this text published in 1989 presented descriptions of such

differing perspectives as operant phenomenological social learning volitional Vygotskian and constructivist theories In this new edition the same prominent editors and authors reassess these classic models in light of a decade of very productive research In addition an information processing perspective is included reflecting its growing prominence Self regulation models have proven especially appealing to teachers coaches and tutors looking for specific recommendations regarding how students activate alter and sustain their learning practices Techniques for enhancing these processes have been studied with considerable success in tutoring sessions computer learning programs coaching sessions and self directed practice sessions The results of these applications are discussed in this new edition The introductory chapter presents a historical overview of research and a theoretical framework for comparing and contrasting the theories described in the following chapters all of which follow a common organizational format This parallel format enables the book to function like an authored textbook rather than a typical edited volume The final chapter offers an historical assessment of changes in theory and trends for future research This volume is especially relevant for students and professionals in educational psychology school psychology guidance and counseling developmental psychology child and family development as well as for students in general teacher education

Historical Foundations of Entrepreneurial Research Hans Landström, Franz Lohrke, 2010-01-01 The authors present an historical perspective on the development of empirical research into entrepreneurship

Self-regulation of Learning and Performance Dale H. Schunk, Barry J. Zimmerman, 2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks

Self-Management of Hypertension

Dawn Peters-Bascombe, 2015-09-28 Research shows that African Caribbean populations with hypertension have poorer health outcomes. This exploratory and descriptive study described and analyzed self-management behavior among male and female hypertensive residents of a village in St Vincent and the Grenadines (SVG). This qualitative study took place in Lowmans Windward village in SVG. In-depth semi-structured interviews were conducted with a purposive snowball sample of 15 females and 15 males. Most participants were poor but all had access to governmentally funded health care. Non-adherence to medical recommendations on physical activity and dietary intake was evidenced among all participants. Over 80% of participants did not own a blood pressure monitoring equipment. Females rendered more support to their spouses than they themselves received from husbands. More than 60% of participants used herbs and home remedies to control their blood pressure. More males reported social support than females. Results generally show that self-management of hypertension behaviors among both female and male residents of SVG are not extensive and that preventive behaviors can be enhanced with adequate dietary intake, daily physical activity, and frequent self blood pressure monitoring.

Chronic Physical Illness: Self-Management And Behavioural Interventions Newman, Stanton, Steed, Elizabeth, Mulligan, Kathleen, 2008-12-01 Nursing

The Patient as Agent of Health and Health Care Mark Daniel Sullivan, 2017. Proposals for patient-centered care for chronic illness have not understood or incorporated the capacity of patients to be active agents of health and health care. Patients can not only make treatment choices but help define their clinical problem and its resolution. This book examines patient action as the principal path to health and an essential component of it.

Exploring the Interaction between Health-promoting and Health Risk Behaviours in Health Huixuan Zhou, Feng Jiang, Yi-lan Tang, 2024-05-28. Health-related behaviours play positive or negative roles in people's health. For instance, health risk behaviours such as sedentary behaviours (e.g., binge watching TV and playing computer games), the use of alcohol, tobacco, or other substances, and lack of sleep have been found to negatively affect the physical and mental health of people. On the other hand, some studies show that health-promoting behaviours such as physical activity and healthy dietary habits can mitigate or reverse the negative effects of health risk behaviours on health outcomes. In the meantime, some studies indicate that the harmful effects of some health risk behaviours may not be mitigated by health-promoting behaviours. For instance, some studies show that sedentary behaviours and physical activity are independently associated with some physical and mental health outcomes. Interventions to increase physical activity with and without decreasing sedentary time lead to different health outcomes. Clearly, more

research is needed to show the interaction between health promoting behaviours and health risk behaviours in health which could shed light on the management of health related behaviours
