The Self We Live by James A. Holstein, Jaber F. Gubrium, 2000 Taking issue with contemporary trivialisations of the self this book traces a course of development from the early pragmatists to contemporary constructionist considerations Stories We Live by Dan P. McAdams, 1993-01-01 This book should be value for all those who are interested in enhancing their self understanding It should also serve as useful classroom text for undergraduates and advanced students in personality and social psychology counselling and psychotherapy Categories We Live By Ásta, 2018-07-05 We are women we are men We are refugees single mothers people with disabilities and queers We belong to social categories and they frame our actions self understanding and opportunities But what are social categories How are they created and sustained How does one come to belong to them sta approaches these questions through analytic feminist metaphysics. Her theory of social categories centers on an answer to the question what is it for a feature of an individual to be socially meaningful In a careful probing investigation she reveals how social categories are created and sustained and demonstrates their tendency to oppress through examples from current events To this end she offers an account of just what social construction is and how it works in a range of examples that problematize the categories of sex gender and race in particular The main idea is that social categories are conferred upon people sta introduces a conferralist framework in order to articulate a theory of social meaning social construction and most importantly of the construction of sex gender race disability and other social Sexual Deceit Kelby Harrison, 2013-03-14 Sexual Deceit is an extended ethical analysis of the phenomenon of categories sexual identity passing i e socially presenting as X when one understands oneself as Y where the variables represent any contemporary sexual identity alongside identity passing in the contexts of race gender and briefly religion and class The analysis of passing utilizes and challenges traditional moral understandings of identity falsification complicating our understandings of moral obligations under systemic oppression Tracing the intervention of social construction theory on contemporary political understandings of LGBT communities and activism Sexual Deceit argues against social construction models of identity notably performativity promulgated by the work of Judith Butler and consumed and repeated by many scholars and theory educated queer people A new model of identity is constructed based on a phenomenological concept of style that provides for a socially adjustable yet rooted notion of sexual identity. The ethical implications of sexual identity passing are considered in the context of eschatological images of social justice and within practical matters such as military service leadership and sexual harassment law The Collected Works of Witness Lee, 1965, volume 1 Witness Lee, 2021-05-28 The Collected Works of Witness Lee 1965 volume 1 contains messages and fellowship given by Brother Witness Lee primarily from January through July 1965 A portion of this volume contains messages given in December 1963 and in March 1966 During the period from January through July 1965 Brother Lee traveled extensively In mid February through mid March he visited cities in Texas Louisiana North Carolina South Carolina Kentucky and Ohio From the middle to
