Recovering the Self Ernest Dempsey, 2009-12-01 This quarterly journal explores the themes of recovery and healing through poetry memoir essays fiction humor media reviews and psycho education Areas of concern include aging disabilities health abuse recovery trauma PTSD anxiety and depression *Current Perspectives on Developmental Coordination Disorder (DCD), volume II* Kate Wilmut, Catherine Purcell, Emily J. Meachon, 2024-08-12 Developmental Coordination Disorder DCD is detected in approximately 5% of children and describes a

condition in which motor coordination is below the level expected given a child's age or opportunity for learning. Children with DCD display fine and/or gross motor difficulties which persist into adulthood and cannot be better explained by a medical or neurological condition. The difficulties that individuals with DCD experience have a significant impact on activities of daily living, scholastic achievement, interpersonal relationships, and employment. Motor difficulties such as these have been poorly defined and are poorly understood by healthcare and education professionals, rendering treatments and care more difficult. European guidelines from 2012 and further revisions in 2019 have helped to clarify the diagnostic issues, and there has been a significant growth in research in this field over the last four decades. A search for the topic Developmental Coordination Disorder using Web of Science yielded 4153 publications, with 69% of these published in the last 10 years alone. Despite this growth, there still are pending questions in research regarding our understanding of the etiology, the co-occurrence with other developmental disorders, and the lived experience.

[Working with Trauma-Exposed Children and Adolescents](#) Joanna Pozzulo, Craig Bennell, 2018-12-07. Far too often, children and youth experience trauma from rare events such as mass shootings, terrorism attacks, and school lockdowns, to very common occurrences such as bullying, exposure to drugs and alcohol, or various mental health issues. They can experience these events both directly and indirectly from surfing the internet, watching television, or through their friends. Our children spend a large portion of their day at school, interacting with other students, teachers, and school personnel, where these topics are raised and discussed. This edited volume addresses how our teachers and school personnel can help students deal with these potentially traumatic events to reach the most positive possible outcomes. This collection brings together leading experts, including academics and professionals working in the field, to provide the most current evidence-based practices on how to help students who may have experienced or witnessed trauma. It presents research and advice on how to respond to traumatic events regarding bullying, drugs, and alcohol, sexual abuse, mental health, lesbian, gay, bisexual, transgender, and queer (LGBTQ) safety, stranger danger, childhood disruptive behaviors, school shootings, and lockdowns, and terrorism. It also includes a chapter focused on how to implement a school safety program. Schools cannot deal with these issues alone; effective strategies must engage family members and the broader community. Hence, the collection includes a chapter on how schools can partner with families and the communities they reside in to bring about positive change. All this work pays close attention to cultural and religious sensitivity, socioeconomic variabilities, diversity issues, and developmental stages.
