Semantic Issues In Ecommerce Systems:

Semantic Issues in E-Commerce Systems Karl Aberer, 2002-12-31 Semantic Issues in e Commerce Systems comprises the proceedings of the Ninth Working Conference on Database Semantics which was sponsored by the International Federation for Information Processing IFIP and held in Hong Kong in April 2001 This volume will be essential for researchers and practitioners working in the areas of database management information retrieval and data mining and user interfaces as applied to e commerce

Engineering Knowledge in the Age of the Semantic Web Enrico Motta, Nigel Shadbolt, Arthur Stutt, Nick Gibbins, 2011-03-22 The central themes of the 14th International Conference on Knowledge Engineering and Knowledge Management EKAW 2004 were ontological engineering and the Semantic Web These provide the key foundational and delivery mechanisms for building open Web based knowledge services However consistent with the tradition of EKAW conferences EKAW 2004 was concerned with all aspects of eliciting acquiring modelling and managing knowledge and its role in the construction of knowledge intensive systems Indeed a key aspect of the Knowledge Acquisition Workshops KAWs held in the US Europe and Asia over the past 20 years has been the emphasis on holistic knowledge engineering addressing problem solving usability socio technological factors and knowledge modelling rather than simply analyzing and designing symbol level inferential mechanisms The papers included in this volume are thus drawn from a variety of research areas both at the cutting edge of research in ontologies and the Semantic Web and in the more traditionally grounded areas of knowledge engineering A Semantic Web service can be seen as the addition of semantic technologies to Web services to produce Web accessible services that can be described using appropriate ontologies reasoned about and combined automatically Since Web services can be seen as Web accessible computational objects much of the work in this area is also concerned with problem solving methods PSMs

The Functional Approach to Data Management Peter M.D. Gray, Larry Kerschberg, Peter J.H. King, Alexandra Poulovassilis, 2013-06-29 It is over 20 years since the functional data model and functional programming languages were first introduced to the computing community Although developed by separate research communities recent work presented in this book suggests there is powerful synergy in their integration As database technology emerges as central to yet more complex and demanding applications in areas such as bioinformatics national security criminal investigations and advanced engineering more sophisticated approaches like those presented here are needed A tutorial introduction by the editors prepares the reader for the chapters that follow written by leading researchers including some of the early pioneers They provide a comprehensive treatment showing how the functional approach provides for modeling analysis and optimization in databases and also data integration and interoperation in heterogeneous environments Several chapters deal with mathematical results on the transformation of expressions fundamental to the functional approach The book also aims to show how the approach relates to the Internet and current work on semistructured data XML and RDF The book presents a comprehensive view of the functional approach to

data management bringing together important material hitherto widely scattered some new research and a comprehensive set of references It will serve as a valuable resource for researchers faculty and graduate students as well as those in industry responsible for new systems development Innovations in Database Design, Web Applications, and Information Systems Management Siau, Keng, 2012-09-30 New techniques and tools for database and database technologies are continuously being introduced These technologies are the heart of many business information systems and can benefit from theories models and research results from other disciplines Innovations in Database Design Web Applications and Information Systems Management presents ideal research in the areas of database theory systems design ontologies and many more Including examples of the convergence of ideas from various disciplines aimed at improving and developing the theory of information technology and management of information resources this book is useful for researchers and practitioners in the IT field *Advances in Databases* Barry Eaglestone, Siobhan North, Alexandra Poulouvasilis, 2003-08-02 This book constitutes the refereed proceedings of the 19th British National Conference on Databases BNCOD 2002 held in Sheffield UK in July 2002 The 10 revised full papers and 9 posters presented together with one invited paper were carefully reviewed and selected for inclusion in the volume The book offers topical sections on query processing data warehousing and data mining quality and integrity and web and distributed databases Electronic Services: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2010-05-31 With the increasing reliance on digital means to transact goods that are retail and communication based e services continue to develop as key applications for business finance industry and innovation Electronic Services Concepts Methodologies Tools and Applications is an all inclusive research collection covering the latest studies on the consumption delivery and availability of e services This multi volume book contains over 100 articles making it an essential reference for the evolving e services discipline Advances in Web-Age Information Management Quing Li, Guoren Wang, Ling Feng, 2011-04-05 This book constitutes the refereed proceedings of the 5th International Conference on Web Age Information Management WAIM 2004 held in Dalian China in July 2004 The 57 revised full papers and 23 revised short and industrial papers presented together with 3 invited contributions were carefully reviewed and selected from 291 submissions The papers are organized in topical sections on data stream processing time series data processing security mobile computing cache management query evaluation Web search engines XML Web services classification and data mining **Encyclopedia of Information Science and Technology** Mehdi Khosrow-Pour, Mehdi Khosrowpour, 2009 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher **Journal on Data Semantics VII** Stefano Spaccapietra, 2006-11-03 The LNCS Journal on Data Semantics is devoted to the presentation of notable work that addresses research and development on issues related to data semantics Based on the publication platform Lecture Notes in Computer Science this new journal is widely disseminated and available worldwide The

scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain specific applications of semantic knowledge **Electronic Commerce and Web Technologies** Kurt Bauknecht, Sanjay K.

Madria, Günther Pernul, 2003-06-30 We welcome you to the Second International Conference on E commerce and Web Technology ECWEB 2001 held in conjunction with DEXA 2001 in Munich Germany This conference now in its second year is a forum to bring together researchers from academia and commercial developers from industry to discuss the state of the art in E commerce and web technology and explore new ideas We thank you all for coming to Munich to participate and debate the new emerging advances in this area The research presentation and discussion during the conference will help to exchange new ideas among the researchers developers and practitioners The conference program consists of an invited talk by Hannes Werthner University of Trento Italy as well as the technical sessions The regular sessions cover topics from XML Transformations and Web Development to User Behavior and Case Studies The workshop has attracted more than 80 papers and each paper has been reviewed by at least 3 program committee members for its merit The program committee have selected 31 papers for presentation We would like to express our thanks to the people who helped put together the technical program the program committee members and external reviewers for their timely and rigorous reviews of the papers the DEXA organizing committee for their help in administrative work and support and special thanks to Gabriela Wagner for always responding promptly **Electronic Commerce** Makoto Yokoo, Takayuki Ito, Minjie Zhang, Juhnyoung Lee, Tokuro

Matsuo, 2008-05-28 This book covers recent advances in electronic commerce research activities It aims to encourage activities in this field and to serve researchers with an interest in electronic commerce This book is edited from some aspects of e commerce researches including theoretical mechanism design of trading based on auctions allocation mechanism based on negotiation among multi agent case study and analysis of e trading data engineering issues in e commerce and so on

Research and Practical Issues of Enterprise Information Systems II Volume 2 Li Xu, A. Min Tjoa, Sohail S.

Chaudhry, 2007-12-29 Enterprise information systems EIS have become increasingly popular over the last 15 years 1 2 EIS integrate and support business processes across functional boundaries in a supply chain environment 3 5 In recent years more and more enterprises world wide have adopted EIS such as Enterprise Resource Planning ERP for running their businesses Previously information systems such as CAD CAM MRPn and CRM were widely used for partial functional integration within a business organization With global operation global supply chain and fierce competition in place Acre is a need for suitable EIS such as ERP E Business or E Commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency competency and competitiveness As an example the global economy has forced business enterprises such as Dell and Microsoft to adopt ERP in order to take the advantage of strategic alliances within a global supply chain environment Today not only the large companies but also the medium companies are quickly learning that a highly integrated EIS is more and more a required element of doing business Businesses all over the world

are investing billions of dollars in acquiring and implementing EIS in particular ERP systems by SAP and Oracle. As a result, there is a growing demand for researching EIS to provide insights into challenges, issues, and solutions related to the design, implementation, and management of EIS. *Advances and Innovations in Systems, Computing Sciences and Software Engineering* Khaled Elleithy, 2007-08-28. *Advances and Innovations in Systems, Computing Sciences and Software Engineering* includes a set of rigorously reviewed world-class manuscripts addressing and detailing the state of the art research projects in the areas of Computing Sciences, Software Engineering, and Systems. *Advances and Innovations in Systems, Computing Sciences and Software Engineering* includes selected papers from the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS) 2006, which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering (CISSE) 2006. All aspects of the conference were managed online, not only the reviewing, submissions, and registration processes, but also the actual conference. Conference participants, authors, presenters, and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. The online structure of this high-quality event allowed academic professionals and industry participants to contribute work and attend world-class technical presentations based on rigorously refereed submissions, live, without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 70 countries, for whose researchers this opportunity presented a much more affordable, dynamic, and well-planned event to attend and submit their work to, versus a classic on-the-ground conference. The CISSE conference audio room provided superb audio, even over low-speed internet connections, the ability to display PowerPoint presentations, and cross-platform compatibility; the conferencing software runs on Windows, Mac, and any other operating system that supports Java. In addition, the conferencing system allowed for an unlimited number of participants, which in turn granted CISSE the opportunity to allow all participants to attend all presentations, as opposed to limiting the number of available seats for each session.

Distributed Computing and Artificial Intelligence Sigeru Omatu, José Neves, Juan M. Corchado Rodríguez, Juan F. Paz Santana, Sara Rodríguez González, 2013-06-25. The International Symposium on Distributed Computing and Artificial Intelligence 2013 (DAI 2013) is a forum in which applications of innovative techniques for solving complex problems are presented. Artificial intelligence is changing our society. Its application in distributed environments such as the internet, electronic commerce, environment monitoring, mobile communications, wireless devices, distributed computing, to mention only a few, is continuously increasing, becoming an element of high added value with social and economic potential in industry, quality of life, and research. This conference is a stimulating and productive forum where the scientific community can work towards future cooperation in Distributed Computing and Artificial Intelligence areas. These technologies are changing constantly as a result of the large research and technical effort being undertaken in both universities and businesses. The

exchange of ideas between scientists and technicians from both the academic and industry sector is essential to facilitate the development of systems that can meet the ever increasing demands of today's society. This edition of DCAI brings together past experience, current work and promising future trends associated with distributed computing, artificial intelligence and their application in order to provide efficient solutions to real problems. This symposium is organized by the Bioinformatics Intelligent System and Educational Technology Research Group, <http://bisite.usal.es> of the University of Salamanca. The present edition was held in Salamanca, Spain from 22nd to 24th May 2013.

Semantic Web Gang Wu, 2010-01-01 Having lived with the World Wide Web for twenty years, surfing the Web becomes a way of our life that cannot be separated from latest news, photo sharing, social activities, to research collaborations and even commercial activities and government affairs. Almost all kinds of information are available and processible via the Web. While people are appreciating the great invention, the father of the Web, Sir Tim Berners-Lee, has started the plan for the next generation of the Web, the Semantic Web. Unlike the Web that was originally designed for reading, the Semantic Web aims at a more intelligent Web, serving machines as well as people. The idea behind it is simple: machines can automatically process or understand the information if explicit meanings are given to it. In this way, it facilitates sharing and reuse of data across applications, enterprises and communities. According to the organisation of the book, the intended readers may come from two groups: i.e. those whose interests include Semantic Web and want to catch on the state of the art research progress in this field, and those who urgently need or just intend to seek help from the Semantic Web. In this sense, readers are not limited to the computer science. Everyone is welcome to find their possible intersection of the Semantic Web.

Advances in Databases, 2002 **Advances in Web-age Information Management**, 2004 *Advanced Information Systems Engineering*, 2003 *Index of Conference Proceedings* British Library Document Supply Centre, 2003 **Handbook of Research on Web Log Analysis** Bernard J. Jansen, Amanda Spink, Isak Taksai, 2009 This book reflects on the multifaceted themes of Web use and presents various approaches to log analysis. Provided by publisher.
