Semantics A Bibliography Nineteen Sixty Five To Nineteen Seventy Eight:

Subject Guide to Books in Print, 1993 **Linguistic Semantics** John Lyons, 1995-11-30 This successor to *Language Meaning and Context* provides an invaluable introduction to linguistic semantics **Books in Print**, 1987 Semantic Theory Ruth M. Kempson, 1977-09-15 An introduction to the central topics of linguistic semantics and the philosophy of language assuming no special knowledge of philosophy or logic **The Structure Underlying Measure Phrase Sentences** W.G. Klooster, 2012-12-06 I should like to express my gratitude to my supervisor Professor H Schultink whose criticisms and careful reading helped me to improve considerably upon the clarity of exposition while I wrote this study and whose seemingly innocent requests to elaborate confronted me time and again with the need of revising or abandoning ideas I thought stood on firm ground His support and Dr M C van den Toom's gratefully acknowledged willingness to read and evaluate the manuscript enabled me to present this work as a thesis in the University of Utrecht In more than one way I owe a debt to Albert Kraak Professor of Linguistics in the University of Nijmegen His inspiring enthusiasm awakened my interest in linguistics when I was a student of his He introduced me to transformational grammar at a time when it seemed almost improper to talk about it and the stimulating experience of writing a book on Dutch syntax together with him taught me invaluable lessons I should also like to thank my friend and colleague Henk Verkuyl together with whom I prepared an article on the subject of measuring duration in Dutch Without our stimulating discussions on the subject the fourth chapter of this study could never have been written in the present form I am also indebted to him for criticisms and helpful suggestions At an early stage I profited greatly from discussions with Pieter A M *Robert K. Merton* Craig Calhoun, 2010-09-14 Includes bibliographical references p and index **Catalog of the Communications Library, University of Illinois** University of Illinois at Urbana-Champaign. Library, 1975 **Semantik / Semantics** Arnim von Stechow, Dieter Wunderlich, 2008-07-14 During the past 20 years the investigation into meaning of natural languages has emerged into one of the most active disciplines in theoretical linguistics The different traditions of linguistics philosophy of language and philosophical logic converged in the paradigm of truth conditional semantics which now plays a central role in the cognitive sciences From empirical research in particular languages more principal questions arise of how the speaker succeeds in expressing particular types of meaning by use of formal combination of signs The theories developed to cope with the question assume that for a hearer the meaning of a complex expression must be computable and therefore modern theoretical semantics uses formal algebraic methods to construct the meaning compositionally in view of syntactic structure Furthermore meaning need to be anchored in the experience available to hearer In order to deal with this theoretical semantics extensively uses the concept of truth conditions which roughly explain how a world must be structured in order to be matched by certain linguistic expressions Semantic analyses are complemented by context theory and the theory of speech acts Thus linguistic meaning must be related to human cognitive capacities and therefore theoretical semantics is

tightly connected with philosophical logic as well as cognitive sciences in general The aim of this handbook is to represent the body of theoretical knowledge which has evolved in the international research of the last two decades Some of the theories can now be termed classical in that they belong to the commonly accepted base of theoretical semantics Other theories are still disputed and there are problems still to be solved as normal in a more developed science The authors who are leading experts in the field of semantics try to balance the accepted and the questionable results It goes without saying that each author holds a particular position in this respect Some articles are written in English some in German Since semantics is considered to be a subfield of linguistics the articles are arranged due to linguistic points of view In the first 5 chapters comprising 15 articles the common principles of semantics are presented ontological foundations of semantics composition of meaning problems of use context speech acts and lexical base of meaning The next 5 chapters comprising 25 articles are concerned with semantic phenomena theories and problems which are specific for a particular class of linguistic expressions These are arranged according to parts of speech nouns functional categories verbs adjectives and so on This division does not reflect a theoretical position by itself however it allows one to recognize problems connected with one another Some more general questions are discussed in more than one article in different perspective and vicinity The Handbook is complemented by a service article on formal methods in semantics followed by a comprehensive bibliography including about 1700 entries and both a subject and a name index This handbook is indispensable for all research in linguistics and neighboring disciplines philosophy of language cognitive sciences Some of the articles can serve as basic literature for classes of advanced students
