collection of nearly 1000 parables and maxims Open at random and each will inspire you to pause and reflect With poignant humor subtle wisdom and piercing truth each will enrich your faith open your heart and challenge you to grow This new edition includes new material and a more comprehensive index Spirit Man ,1999-10 From his childhood Steiner already possessed the ability to perceive the supersensible to see the reality of the spiritual world with the same clarity and certainty as he saw the physical As he matured he felt a profound need to bring a discipline to his supersensible discoveries to develop a methodology equal to what the natural science of his day demanded While earning degrees in mathematics physics and chemistry at the Technical University in Vienna he began developing an approach to a systematic research of psychological and spiritual phenomena His doctoral thesis Truth and Knowledge was followed in 1894 by The Philosophy of Freedom a seminal work in which Steiner established a firm foundation for a science of the supersensible Most of us I believe view our day to day world through the perspective sliver of a single lifetime Some may view it from the wider window provided by written or oral history while still others may approach their reality through the broader boundaries defined by archeology My guess though is that few view their personal world through the cosmic expanse that encompasses the beginning and end of time If you are new to what Steiner presented to the world in his books essays and hundreds of lectures on the nature of humanity be prepared to make stupendous leaps to the far distant past and far distant future and into completely different dimensions of being And though you may find the material ponderous or hard to accept you can be sure that it will not leave you unaffected You may find instead that the mundane in the world begins to reveal the miraculous **The Light of the Soul** Alice Bailey,Patanjali,2012-05-14 This volume is an original paraphrase with commentary of the Yoga Sutras of Patanjali The Yoga Sutras are of ancient origin first reduced to writing by Patanjali who is considered the founder of the Raja Yoga School Control of the mind and its illumination by the soul are brought about through the practice of Raja Yoga The Sutras have a power and a timelessness about them which demonstrate the accuracy with which they pinpoint the basic truths of human evolution from subservience to personality clamours to the serene freedom of the soul Most human problems today originate in selfish desire the prostitution of the feeling nature to self centred action This is also brought out clearly in the teaching of the Lord Buddha the treading of the Noble Eight Fold path providing the only way out of the maze Right Values Right Speech Right Mode of Living Right Thinking Right Expression Right Conduct Right Effort Right Rapture or True Happiness These are attributes of the soul Patanjali explores exhaustively the means the techniques and the mental posture which create the connecting thread between the form centred personality and these stages towards spiritual achievement and soul fusion *Merging the Inner & Outer World of Man* John Brokaar,2022-07-18 THE ALCHEMICAL MAGIC EMERGES WITHIN THE CONSCIOUS MERGER OF OPPOSITES In any such merger the primary elements are fire and water applied through a process of friction and non attachment However for the magical miraculous to emerge this must be done with conscious harmony immersed in care and grounded on Truth The surreal existence of the hybrid human being is the

product of this As a physical sentient mindful yet also psychic and spiritual entity its reality seems improbable yet somehow it magically is If adding to the enigma that this being is of a finite and temporal form with an acknowledged understanding of the existant reality of infinity that exists within a timeless construct known as the Cosmos the wondrous mystery takes the next level When then considering its collective organism called civilization with all its joy beauty innovation and achievement balanced against fear based greed and destructive barbarism then certainly none of it by rights should exist and yet it does and it gets better This microscopic human being who exists for only a flash of Time within the absurdly complex yet magnificent endless and eternal Universe can within that single spark of Time become aware of the whole the All and Everything By Merging the Inner and Outer World of Man we will find that nothing is random and everything has purpose the good and bad the beautiful and ugly It contemplates WHY this is so which enables us to understand HOW to live love and accept every part unconditionally This is important as non understanding leads to fear anger greed and a cyclic realm of non existence The effects of the phenomena as described in Book I II The Inner Evolution of Man and The Outer World of Man now enable us to enhance magic and transcend out of the illusory by Merging the Inner and Outer World of Man

examination of their truth is in some respects more injurious than unquestioning credulity The perpetual lamps of alchemy stand for the incorruptible and immortal spirit The Egyptians more than any other people hoped that their ever burning lamp would help the material soul to part with its earthly dwelling and unite forever with its divine counterpart A Cypriote knight had both flax and linen made out of asbestos which were cleaned by simply throwing them in the fire A similarly made gown such as the Buddhist monks wear thrown into a large pit full of glowing coals and taken out two hours afterward was as clear as if it had been washed with soap and water Magic in prehistoric periods had a part in the mysteries The greatest phenomena the so called miracles rested on the arcane knowledge of the ancient priests of physics and all the branches of chemistry or rather alchemy The twins brothers Castor and Pollux are personifications of the twin polarity of electricity and magnetism The Dioscouri constantly die and return to life together for it is absolutely necessary that one should die that the other may live In their unbounded glorification of matter our physicists proclaim matter the sole and autocratic sovereign of a Boundless Universe If they could they would forcibly divorce matter from her consort and place the widowed queen on the great throne of nature made vacant by the exiled spirit The Platonic philosophy was one of order system and proportion It embraced the evolution of worlds and species the correlation and conservation of energy the transmutation of material form and the indestructibility of matter and of spirit Plato s method like that of geometry was to descend from universals to particulars In the same manner as lovers gradually advance from that beauty which is apparent to that which is divine so the ancient priests attributed the alliance and sympathy between natural things to the underlying interconnectedness of all things The Divine Proclus pointed out certain mysterious peculiarities of plants minerals and animals all of which are well known to our naturalists but none of which are explained Proclus who combined Theosophy and Theurgy also advocated a divine science that is firmly and solely based on the mysterious affinities between organic and inorganic bodies the visible productions of the four kingdoms and the invisible powers of the universe Persons have been known to fall sick simultaneously with the uprooting of a tree planted upon their natal day and dying when the tree died Alas The divine intellect is veiled in man his animal brain alone philosophises In spiritually fertile periods the occult powers of plants animals and minerals magically sympathize with the superior natures and the divine soul of man is in perfect rapport with these inferior ones Formerly magic was a universal science entirely in the hands of the sacerdotal savant Though the focus was jealously guarded in the sanctuaries its rays illuminated the whole of mankind There is nothing new under the Sun Yet modern scientists have reaped more palms and laurels for their great discoveries than Lucretius Cicero Plutarch and Seneca had hairs on their heads Plutarch said that an idea has no subsistence by itself but gives figure and form to shapeless matter and becomes the cause of its manifestation
