The New African American Urban History Kenneth W. Goings, Raymond A. Mohl, 1995      African American Urban History since World War II Kenneth L. Kusmer, Joe W. Trotter, 2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period especially compared with earlier decades Correcting this imbalance African American Urban History since World War II features an exciting mix of seasoned scholars and fresh new voices whose combined efforts provide the first comprehensive assessment of this important subject The first of this volume's five groundbreaking sections focuses on black migration and Latino immigration examining tensions and alliances that emerged between African Americans and other groups Exploring the challenges of residential segregation and deindustrialization later sections tackle such topics as the real estate industry's discriminatory practices the movement of middle class blacks to the suburbs and the influence of black urban activists on national employment and social welfare policies Another group of contributors examines these themes through the lens of gender chronicling deindustrialization's disproportionate impact on women and women's leading roles in movements for social change Concluding with a set of essays on black culture and consumption this volume fully realizes its goal of linking local transformations with the national and global processes that affect urban class and race relations

**Encyclopedia of American Urban History** David Goldfield, 2007 Publisher description

**Black Urban History at the Crossroads** Leslie M. Harris, Clarence Lang, Rhonda Y. Williams, Joe William Trotter Jr., 2024-10-22 Drawing on significant recent scholarship on African American urban life over three centuries Black Urban History at the Crossroads bridges disparate chronological regional topical and thematic perspectives on the Black urban experience beginning with the Atlantic slave trade Across ten cutting edge chapters leading scholars explore the many ways that urban Black people across the United States built their own communities crafted their own strategies for self determination and shaped the larger economy culture and politics of the urban environment and of their cities regions and nation This volume not only highlights long running changes over time and space from preindustrial to emerging postindustrial cities but also underscores the processes by which one era influences the emergence of the next moment in Black urban history

**The African American Urban Experience** J. Trotter, E. Lewis, T. Hunter, 2004-03-17 From the early years of the African slave trade to America blacks have lived and laboured in urban environments Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon only during World War One did African Americans move into cities in large numbers and only during World War Two did more blacks reside in cities than in the countryside By the early 1970s blacks had not only made the transition from rural to urban settings but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other In their quest for full citizenship rights economic democracy and release from an oppressive rural past black southerners turned to urban migration and employment in the nation's industrial sector as a new Promised Land or Flight from Egypt In order to

illuminate these transformations in African American urban life this book brings together urban history contemporary social cultural and policy research and comparative perspectives on race ethnicity and nationality within and across national boundaries America's Urban History Lisa Krissoff Boehm, Steven H. Corey, 2023-07-26 In this second edition America's Urban History now includes contemporary analysis of race immigration and cities under the Trump administration and has been fully updated with new scholarship on early urbanization mass incarceration and cities the Great Society the diversification of the suburbs and environmental justice The United States is one of the most heavily urbanized places in the world and its urban history is essential to understanding the fundamental narrative of American history This book is an accessible overview of the history of American cities including Indigenous settlements colonial America the American West the postwar metropolis and the present day landscape of suburban sprawl and an urbanized population It examines the ways in which urbanization is connected to divisions of society along the lines of race class and gender but it also studies how cities have been sources of opportunity hope and success for individuals and the nation Images maps tables and a guide to further reading provide engaging accompaniment to illustrate key concepts and themes Spanning centuries of America's urban past this book's depth and insight make it an ideal text for students and scholars in urban studies and American history

The Harvard Guide to African-American History Evelyn Brooks Higginbotham, 2001 This massive guide sponsored by the W E B Du Bois Institute for Afro American Research at Harvard University and compiled by renowned experts offers a compendium of information and interpretation on over 500 years of black experience in America **The Making of Urban America** Raymond A. Mohl, 1997-06 This second edition is designed to introduce students of urban history to recent interpretive literature in this field Its goal is to provide a coherent framework for understanding the pattern of American urbanization while at the same time offering specific examples of the work of historians in the field **Historical Roots of the Urban Crisis** Henry L. Taylor Jr., Walter Hill, 2013-06-17 This collection of 12 new essays will tell the story of how the gradual transformation of industrial society into service driven postindustrial society affected black life and culture in the city between 1900 and 1950 and it will shed light on the development of those forces that wreaked havoc in the lives of African Americans in the succeeding epoch The book will examine the black urban experience in the northern southern and western regions of the U S and will be thematically organized around the themes of work community city building and protest the analytic focus will be on the efforts of African Americans to find work and build communities in a constantly changing economy and urban environments tinged with racism hostility and the notions of white supremacy Some chapters will be based on original research while others will represent a synthesis of existing literature on that topic The Challenge of American History Louis P. Masur, 1999-05-20 In The Challenge of American History Louis Masur brings together a sampling of recent scholarship to determine the key issues preoccupying historians of American history and to contemplate the discipline's direction for the future The fifteen summary essays included in this volume allow professional historians history

teachers and students to grasp in a convenient and accessible form what historians have been writing about Globalization and the Changing U.S. City David Wilson, 1997 The contributors show how US city politics is adapting to the new globalization accelerated by the ever growing proportion of immigrants and how the problems of the urban underclass racial segregation housing and education are being redefined **Sociological Abstracts**, 2001 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers **Unfair Housing** Mara S. Sidney, 2003 It is difficult to ignore the fact that even as the United States becomes much more racially and ethnically diverse our neighborhoods remain largely segregated The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination yet for millions of Americans housing options remain far removed from the American Dream Why do most neighborhoods in American cities continue to be racially divided The problem suggests Mara Sidney lies with the policies themselves She contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them In *Unfair Housing* she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated As a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued A former undercover investigator for a fair housing advocacy group Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works She examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy Sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national policies interact with local politics In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations Sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation As battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory Urban Planning and the African-American Community June Manning Thomas, Marsha Ritzdorf, 1997 How have urban planning policies contributed to racial injustices in American cities Does contemporary urban planning really address and attempt to solve the social and economic problems of African Americans in cities or does it just perpetuate ghetto conditions What have African Americans done to confront injustices in planning

Historically race and city design are linked and Urban Planning and the African American Community aims to clarify the historical connections between the African American population and the urban planning profession and to suggest means by which cooperation and justice may be increased The book focuses on the areas of zoning and real estate planning and public policy African American initiatives and responses to urban planning and urban planning education Individual chapters examine the racial origins of zoning in American cities how Eurocentric family models have shaped planning policies applied to African American families the rise of equity planning and its effects the role of race and empowerment in the Model Cities experiment African American experiences with shaping the planning of such cities as Los Angeles Greensboro and Birmingham and provides a plan for diversifying planning education in order to advance the profession The editors also include a chapter of excerpts from important court cases and government reports that have shaped or reflected the racial aspects of urban planning This important new volume bridges the gap between urban planning and issues of race and will be an essential resource for academics and students in urban studies urban planning and race ethnic studies
