Number Problems and Computers Donald D. Spencer, 1988-01-01 Computer-Based Learning Environments and Problem Solving Erik De Corte, Marcia C. Linn, Heinz Mandl, Lieven Verschaffel, 2013-06-29 Most would agree that the acquisition of problem solving ability is a primary goal of education. The emergence of the new information technologies in the last ten years has raised high expectations with respect to the possibilities of the computer as an instructional tool for enhancing students' problem solving skills. This volume is the first to assemble, review and discuss the theoretical, methodological and developmental knowledge relating to this topical issue in a multidisciplinary confrontation of highly recommended experts in cognitive science, computer science, educational technology and instructional psychology. Contributors describe the most recent results and the most advanced methodological approaches relating to the application of the computer for encouraging knowledge construction, stimulating higher order thinking and problem solving and creating powerful learning environments for pursuing those objectives. The computer applications relate to a variety of content domains and age levels.
