EBOOK: Nursing In Child And Adolescent Mental Health Nisha Dogra, Sharon Leighton, 2009-10-16 This book considers the range of skills and roles that nurse s now undertake within specialist CAMHS it provides a good basic introduction for nurses and clinicians from other disciplines Discussion around medication management as part of a nurse s extended role is timely and will be of particular use to those considering this option within their practice The text is easily accessible utilising case studies to enhance learning The inclusion of research and audit helps raise the need not only for nurses to be more involved in research but also the need for clinicians to evaluate their practice I would recommend this text to clinicians new to CAMHS Sharon Pagett Senior Lecturer Mental Health CAMHS Department of Nursing University of Central Lancashire Nurses have a key role to play within the Child and Adolescent Mental Health Team

Yet there are few textbooks devoted to the specialist and advanced roles which many undertake within this field of practice. This text will fill the void addressing legal and ethical issues while focusing upon clinical practice and the application of theoretical concepts. Fiona Smith, Adviser in Children's and Young People's Nursing, Royal College of Nursing. This book focuses on child and adolescent mental health (CAMH) for nurses training and working in this field. The authors explore the various roles CAMH nurses fulfil and consider how these roles might be undertaken with confidence. Drawing upon both the academic evidence available and grounded in the reality of clinical practice, the book looks at how to assess the different issues and the various interventions used in practice. The authors consider the effect of child and family development on mental health as well as broader factors influencing mental health and well-being. Among the core issues considered are: Definitions and consequences of mental health illness and stigma; Child development; Legislative frameworks; Assessment skills; Therapeutic work: individual counselling, cognitive behavioural therapy, family work and medication; Clinical governance and supervision; Research. Chapters include case scenarios, clinical applications and boxes highlighting the key context issues. Nursing in Child and Adolescent Mental Health is relevant to nurses at all levels but is especially useful to postgraduate nurses and nurses in specialist child and adolescent mental health services (SCAMHS). Other professional staff will also find it useful. Contributors: Laurence Baldwin, P. Mani Das, Gupta Clay Frake, Neil Hemstock, Michael Hodgkinson, Sarah Hogan, Cath Kitchen, Peter Nolan, Theresa Norris, Ged Rogers, Noreen Ryan, Mervyn Townley, Panos Vostanis and Richard Williams.

Task Force on Standards of Child and Adolescent Psychiatric and Mental Health Nursing Practice, 1985. *Nursing Skills for Children and Young People's Mental Health* Laurence Baldwin, 2019-08-02. This book focuses on those nursing skills that are truly valued and needed by children and young people with mental health problems. Whilst other books have chiefly focused on mental health conditions and treatments, this book moves away from this formulaic approach and considers what children and youth themselves need most from health professionals. It shows why nursing skills are among the most precious values for patients. This focus on therapeutic relationships, establishing trust-based forms of nursing and empowering children and young people to develop into healthy and resilient young adults, has largely been neglected despite the feedback from those who urgently need help but often struggle to find it or are wary of seeking help and reluctant to engage. This book focuses on the places where nurses encounter young people and seek to help them. It examines the role nurses play in specialist child and adolescent mental health settings such as inpatient and community as psychotherapists and on self-harm teams and where paediatric nurses work with troubled young people in emergency departments, paediatric wards and primary care. It also considers two specific

areas namely eating disorder services and consent seeking that could benefit from nursing skills that are currently undervalued but are in fact invaluable Its focus on those skills that nurses already have but may not be consciously using will make this book uniquely appealing to all nurses who work with children and young people with mental health problems regardless of the setting and an essential guide for students and experienced professionals alike **Child Psychiatric Nursing** Patricia A.
