Mina D. Singh, 2026-03-21 Learn how to better understand and apply research to your everyday practice with LoBiondo Wood and Haber's Nursing Research in Canada: Methods, Critical Appraisal, and Utilization 6th Edition. Written by an all-star team of educators and research experts from Canada and the US, this thoroughly updated textbook is an ideal resource to help ground you, learn the processes behind nursing research and evidence-informed practice. This edition features new research examples that reflect the most current high-quality Canadian studies, fresh vignettes that depict the work of Canadian nurse researchers, enhanced readability, and well-balanced coverage of both qualitative and quantitative research methods and of evidence-informed practice. Balanced but distinct coverage of both the qualitative and quantitative approaches to nursing research acquaints students with the processes behind research and evidence-based evidence-informed practice. Complete high-quality research examples, including four sample critiques, demonstrate how to apply the judgement and reasoning principles outlined in the text to published quantitative and qualitative research studies. Research Vignettes introduce students to real-world practitioners of nursing research and help bridge the gaps among clinical research, academia, and clinical practice. Vignettes cover timely topics facing Canadian nurses. Effective learning aids in every chapter include Key Terms, Learning Outcomes, Research Hints, Evidence-Informed Practice Tips, Appraising the Evidence, Critiquing Criteria, Critique of a Research Study, Critical Thinking Decision Paths, Critical Thinking Challenges, Critical Judgement Questions, and Key Points. Research examples are updated throughout to reflect the latest applicable high-quality literature, with an emphasis on Canadian-authored studies. NOTE: Additional changes will be identified in a Summer 2023 planning call based on planning surveys completed in late June.

Understanding Nursing Research Carol Leslie Macnee, Susan McCabe (RN.), 2008 This textbook explicitly links understanding of nursing research with evidence-based practice and focuses on how to read, critique, and utilize research reports. Organized around questions students have when reading reports, how the conclusions were reached, what types of patients the conclusions apply to, how the study was done, and why it was done that way, the text explains the steps of the research process to answer these questions. Chapters include clinical vignettes, highlighted key concepts, and out-of-class exercises. Appendices present a variety of research examples. This edition includes significant new material on evidence-based practice and more distinction between qualitative and quantitative research.
