Lost Causes Jason B. Jones, 2006 What if we didn't always historicize when we read Victorian fiction *Lost Causes* shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from *The French Revolution* to *Middlemarch* that literature's engagement with history has to be read otherwise Perhaps perversely *Lost Causes* suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot *Lost Causes* demonstrates that history can carry an ontological as well as an epistemological charge one that suggests a condition of being in the world as well as a way of

knowing the world as it really is From this point of view Victorian fiction that addresses the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history *Christian Examiner and Theological Review* ,1844 *The City* Andrew Lees,2015 The City A World History tells the story of the rise and development of urban centers from ancient times to the twenty first century It begins with the establishment of the first cities in the Near East in the fourth millennium BCE and goes on to examine urban growth in the Indus River Valley in India as well as Egypt and areas that bordered the Mediterranean Sea Athens Alexandria and Rome stand out both politically and culturally With the fall of the Roman Empire in the West European cities entered into a long period of waning and deterioration But elsewhere great cities among them Constantinople Baghdad Chang an and Tenochtitl n thrived In the late Middle Ages and the Early Modern period urban growth resumed in Europe giving rise to cities like Florence Paris and London This urban growth also accelerated in parts of the world that came under European control such as Philadelphia in the nascent United States As the Industrial Revolution swept through in the nineteenth century cities grew rapidly Their expansion resulted in a slew of social problems and political disruptions but it was accompanied by impressive measures designed to improve urban life Meanwhile colonial cities bore the imprint of European imperialism Finally the book turns to the years since 1914 guided by a few themes the impact of war and revolution urban reconstruction after 1945 migration out of many cities in the United States into growing suburbs and the explosive growth of megacities in the developing world **Qualitative Methods in Africana Studies** James L. Conyers Jr.,2016-07-20 This survey of methodology provides a framework for understanding Africana Studies Correlating this book to research and writing in Africana Studies helps to extend the perplexity paradox and parley of social science and humanistic research This book attempts to answer what is Africana Studies with reference to an interdisciplinary body of knowledge Africana Studies is the global Pan Africanist study of African phenomena interpreted from an Afrocentric perspective Among those scholars who contribute to this interdisciplinary body of knowledge perspective signals the commonality in the school of thought This book offers general definitions and descriptions of the qualitative and quantitative research The Misiri Legend Explored araap Sambu, Kipkoech,2015-03-16 How can a black people who do not even profess to Islam claim to have originated from Egypt which is such an Arabic and Islamic geographical setting But the Kalenjin people of Kenya have held on fast to a tradition that their ancestors in antiquity were part of ancient Pharaonic Egypt which they variously call Tto and Misiri As unlikely as it may sound the persistence in keeping this oral tradition alive does not seem to be dying with time and distance from the claimed place of origin The Misiri Legend Explored A Linguistic Inquiry into the Kalenjin People s Oral Tradition of Ancient Egyptian Origin establishes the Kalenjin oral tradition of Misirian origin on the basis of linguistic evidence a genuine tool which Egyptology scholars and researchers need to have relied on much more to bring greater and more final results to their investigations Students of ancient Egypt willing to accept that there is an irrational prejudice against the concept of ancient black African ingenuity will upgrade their stock of knowledge

regarding ancient Egypt with the numerous discoveries laid out here They will discover a powerful new tool for their trade in the form of the African languages and cultures that now lie South of the Sahara *Get Wisdom* Ernest Verity,2003-06
