Reclaimed Powers David Gutmann,1988 Handbook of Emotional Disorders in Later Life Ken Laidlaw,Bob Knight,2008
Although the perceptions and realities of ageing have changed markedly over the last few decades for practitioners working with older people emotional problems remain a major factor of health and happiness in later life This handbook provides a concise authoritative and up to date guide to best practice in therapy for older people for a wide range of mental health professionals The editors bring together chapters by experienced trainers and clinicians that cover all the significant problems and issues in the assessment and treatment of emotional disorders in later life The introductory chapters examine the individual social cultural and physical experience of ageing and provide an essential background for a caring and professional understanding of related emotional disorders and their effective treatment Throughout the book key research and clinical experience is reported as underlying evidence based treatment but the emphasis is on practical guidance for assessment and interventions rather than detailed discussion of methodological issues With each chapter written by a specialist in their field a range of expertise is provided in a single source making this book an invaluable resource for anyone dealing with the mental health needs of older people *Handbook of Adult Development* Jack Demick,Carrie Andreoletti,2003-01-31 The Handbook of Adult Development is an overview of the major theories and research in the field Included are sections on introductory theory and method biocognitive development in adulthood and social development in adulthood in addition to an introduction and epilogue by the editors This content will be useful for years to come By soliciting contributions from current leading theoreticians and researchers in the field of adult development the volume will present state of the art theory and research on this burgeoning subfield of developmental psychology Professionals clinicians researchers and academics in the larger field of development psychology will find the book an invaluable resource as will graduate students in the same field Longevity and Social Change in Australia Allan Borowski,Sol Encel,Elizabeth Ozanne,2007 Covers a wide range of issues including health retirement incomes aged care family relations employment housing and town planning special attention is given to the particular structural disadvantages affecting women Aboriginal Australians and ethnic minorities **Authoritative Communities** Kathleen Kovner Kline,2007-11-25 Authoritative Communities The Scientific Case for Nurturing the Whole Child introduces innovative solutions based firmly in the children s mental health and resilience literature and in the hypothesis that humans are hardwired to connect These authoritative communities consist of such individuals and institutions as parents teachers coaches elders and a variety of organizations that are committed to each other s well being over the long term and who instill children with prosocial values such as empathy and compassion Living within these communities enables children and youth to develop a consistent sense of

purpose and meaning so that they in turn are able to grow up to be responsible productive and nurturing adults The comprehensive coverage in this volume bring new insights and evidence to the nature nurture debate from developmental attachment neurobiological spiritual and community perspectives including Nurturing as a protective factor against genetic predispositions Counteracting the adverse influence of the media on children Promoting a sense of community in disadvantaged youth Spiritual approaches from the Buddhist minding children with mindfulness to traditional young men s rites of passage Adolescent development from psychobiology to the formation of conscience Dispatches from the civil society movement the School Development Program and the motherhood movement This volume is essential reading for researchers and practitioners as well as graduate level students in developmental clinical and social psychology as well as related fields such as sociology social work education and religious studies *Your One Wild and Precious Life* Maureen

Women Sheila Greene,2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene s original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women s lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical

framework that emphasizes temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women s studies **Women & Aging** Helen Rippier Wheeler,1997 Guide with more than two thousand bibliographic entries and cross references It includes journal articles book chapters essays and doctoral dissertations as well as complete books
