Reclaiming Democracy:

Reclaiming Democracy Meta Mendel-Reyes, 2013-10-11 Meta Mendel Reyes provides a critical look at our fascination with the sixties discusses the ways in which democratic participation was at the heart of sixties politics and explores the interrelationship between the history and memory of the sixties and contemporary democratic politics Mendel Reyes stresses that if told properly the story of the sixties could help open our eyes to the possibility that ordinary people can take democratic action and do have the ability to make a difference in nineties politics In a time of cynicism about the American government's ability to solve the crises of inequality poverty and racism Mendel Reyes puts the decline of political participation in historical context and provides hope for the coming decades

We Are Not Able to Live in the Sky Mara Kardas-Nelson, 2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus's Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there's a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas Nelson's *We Are Not Able to Live in the Sky* is about unintended consequences blind optimism and the decades long ramifications of seemingly small policy choices The book is rooted in the stories of women borrowers in Sierra Leone West Africa Their narratives woven through a deep history of modern international development are set against the rise of Yunus's vision that tiny loans would put poverty in museums Kardas Nelson asks What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty Who stands to benefit and more important who gets left behind

Reclaiming Democracy Albena

Azmanova, Mihaela Mihai, 2015-03-02 Democracy is in shambles economically and politically The recent economic meltdown in Europe and the U S has substituted democratic deliberation with technocratic decisions In Athens Madrid Lisbon New York Pittsburgh or Istanbul protesters have denounced the incapacity and unwillingness of elected officials to heed to their voices While the diagnosis of our political economic illness has been established remedies are hard to come What can we do to restore our broken democracy Which modes of political participation are likely to have an impact And what are the loci of political innovation in the wake of the crisis It is with these questions that Reclaiming Democracy engages We argue that the managerial approach to solving the crisis violates a right to politics that is a right that our collective life be guided by meaningful politics by discussion of and decision among genuinely alternative principles and policies The contributors to this volume are united in their commitment to explore how and where this right can be affirmed in a way that resuscitates democracy in the wake of the crisis Mixing theoretical reflection and empirical analysis the book offers fresh insights into democracy s current conundrum and makes concrete proposals about how the right to politics can be protected [A Time of Change: A New Era for American Politics](#) Pasquale De Marco, 2025-05-18 In a time of profound change and uncertainty America stands at a crossroads The erosion of trust in government institutions the rise of political apathy and the widening partisan divide have left many Americans feeling disillusioned and disengaged from the political process This book offers a timely and insightful exploration of the challenges and opportunities facing American politics today Drawing on a deep understanding of history and current events the author argues that the Left has a critical role to play in shaping a better future for America However to do so it must undergo a period of renewal and transformation The book delves into the root causes of the Left s decline and proposes a path forward It emphasizes the importance of developing a unified and progressive agenda that addresses the concerns of all Americans regardless of race gender class or sexual orientation The book also highlights the power of civic engagement and grassroots movements in revitalizing American democracy With clarity and conviction the author argues that the Left must embrace diversity fight for economic justice protect the environment and promote a new era of ethical and transparent leadership Only then can America truly live up to its ideals of liberty equality and justice for all This book is a must read for anyone who cares about the future of American democracy It is a call to action a clarion call for all Americans to come together and work towards a better future It is a vision of a nation where every voice is heard where justice prevails and where the American Dream is within reach for all If you like this book write a review on google books *The Work of Reading* Anirudh Sridhar, Mir Ali Hosseini, Derek Attridge, 2021-05-17 The Work of Reading Literary Criticism in the 21st Century is a sustained critical examination of the developments in the field of literary studies from the early 2000s onwards within the context of the systematic problems in the humanities This volume analyzes the origins of the current methods including New Historicism empiricism New Formalism postcritique and others and posits alternatives to the present state of literary studies At a time when many aspects of current methods show a desire

to adopt values from other disciplines to solve internal crises this volume advocates a renewed focus on questions of form by means of the praxis of aesthetic study close reading and other modes of engaging directly with literary texts Historical Dictionary of the Arab Uprisings Aomar Boum, Mohamed Daadaoui, 2020-03-10 The Arab uprisings that swept the Middle East and North Africa in the period from 2011 2012 left an indelible mark on the socio political landscape of the region But that mark was not consistent across the region while some countries underwent dramatic popular social and political changes others teetered on the brink or were left with the status quo intact Street revolutions toppled despotic regimes in Tunisia Libya and momentarily in Egypt while mounting serious challenges to authoritarian regimes in Syria and Yemen Algeria's entrenched bureaucratic cum military authoritarian system proved resilient until the recent events of early 2019 which forced the resignation of President Abdelaziz Bouteflika before the end of his term on 28 April 2019 As in Algeria protestors in Sudan succeeded after months of demonstrations in overthrowing the government of Omar al Bashir Several Arab monarchies still appear stable and have managed to weather the tempest of the Arab revolutions albeit not without fissures showing in the edifice of their states accompanied by some minor constitutional changes Where Tunisians Egyptians Yemenis Syrians and Libyans demanded regime changes in their political systems protestors in the Arab monarchies have called on the kings and emirs to reform their political system from the top down indicating the sizeable monarchical advantage Historical Dictionary of the Arab Uprisings contains a chronology an introduction and an extensive bibliography The dictionary section has over 500 cross referenced entries on the terms persons and events that shaped the Arab Spring uprisings This book is an excellent resource for students researchers and anyone wanting to know more about the Arab Uprisings **The Will to Empower** Barbara Cruikshank, 2019-06-30 How do liberal democracies produce citizens who are capable of governing themselves In considering this question Barbara Cruikshank rethinks central topics in political theory including the relationship between welfare and citizenship democracy and despotism and subjectivity and subjection Drawing on theories of power and the creation of subjects Cruikshank argues that individuals in a democracy are made into self governing citizens through the small scale and everyday practices of voluntary associations reform movements and social service programs She argues that our empowerment is a measure of our subjection rather than of our autonomy from power Through a close examination of several contemporary American technologies of citizenship from welfare rights struggles to philanthropic self help schemes to the organized promotion of self esteem awareness she demonstrates how social mobilization reshapes the political in ways largely unrecognized in democratic theory Although the impact of a given reform movement may be minor the techniques it develops for creating citizens far extend the reach of governmental authority Combining a detailed knowledge of social policy and practice with insights from poststructural and feminist theory The Will to Empower shows how democratic citizens and the political are continually recreated **Constituting Economic and Social Rights** Katharine G. Young, 2012-08-23 Food water health housing and education are as fundamental to human

freedom and dignity as privacy religion or speech Yet only recently have legal systems begun to secure these fundamental individual interests as rights This book looks at the dynamic processes that render economic and social rights in legal form It argues that processes of interpretation enforcement and contestation each reveal how economic and social interests can be protected as human and constitutional rights and how their protection changes public law Drawing on constitutional examples from South Africa Colombia Ghana India the United Kingdom the United States and elsewhere the book examines innovations in the design and role of institutions such as courts legislatures executives and agencies in the organization of social movements and in the links established with market actors This comparative study shows how legal systems protect economic and social rights by shifting the focus from minimum bundles of commodities or entitlements to processes of value based deliberative problem solving Theories of constitutionalism and governance inform the potential of this approach to reconcile economic and social rights with both democratic and market principles while addressing the material inequality poverty and social conflict caused in part by law itself

Political Theory and the Enlarged Mentality Stephen Acreman, 2017-10-20 In this book Stephen Acreman follows the development and reception of a hitherto under analyzed concept central to modern and postmodern political theory the Kantian *ein erweiterte Denkungsart* or enlarged mentality While the enlarged mentality plays a major role in a number of key texts underpinning contemporary democratic theory including works by Arendt Gadamer Habermas and Lyotard this is the first in depth study of the concept encompassing and bringing together its full range of expressions A number of attempts to place the enlarged mentality at the service of particular ideals the politics of empathy of consensus of agonistic contest or of moral righteousness are challenged and redirected In its exploration of the enlarged mentality the book asks what it means to assume a properly political stance and in giving as the answer facing reality together it uncovers a political theory attentive to the facts and events that concern us and uniquely well suited to the ecological politics of our time
