Mental Retardation in the Year 2000 Louis Rowitz,2012-12-06 When you look at the advances in the field of mental retardation over the past 30 years it is hard to imagine that more change is inevitable Yet I think back to the time when early in his presidency President Kennedy called together the brightest scientists researchers doctors and educators to develop a comprehensive plan for the nation to effectively care for treat educate and house persons with mental retardation In the early 1960s the call for new research into the causes and the amelioration of mental retardation the development of community based programs and the development of family care for appropriate education vocational training and jobs were seen as revolutionary But in the 30 years since then we have seen time and time again that it is persons with mental retardation themselves who have led the way When the schools were opened to them they learned more than any one ever thought possible when vocational training was provided they learned skills that led to jobs when employment became available they proved to be good steady workers who earned money and paid taxes When the playing fields were made available to them through programs such as Special Olympics they showed the world they could train and compete and WIN in the sports of the Olympics When communities welcomed them they became our neighbors They have earned the right to play on any field to study in any school to hold a paying job and to be anyone s neighbor *Harvard Business School Core Collection* 1995 Baker Library,1995 **Harvard Business School Core Collection** Baker Library,1993 **Recollecting the Future** Hugh B.
