Riding the Black Ship Aviad E. Raz, 2020-03-23 In 1996 over 16 million people visited Tokyo Disneyland making it the most popular of the many theme parks in Japan Since it opened in 1983 Tokyo Disneyland has been analyzed mainly as an example of the globalization of the American leisure industry and its organizational culture particularly the company manual By looking at how Tokyo Disneyland is experienced by employees management and visitors Aviad Raz shows that it is much more an example of successful importation adaptation and domestication and that it has succeeded precisely because it has become Japanese even while marketing itself as foreign Rather than being an agent of Americanization Tokyo Disneyland is a simulated America showcased by and for the Japanese It is an America with a Japanese meaning **The Playful Crowd** Gary S. Michael Schiltz, 2020-03-17 Money and finance have been among the most potent tools of colonial power This study investigates the Japanese experiment with financial imperialism or yen diplomacy at several key moments between the acquisition of Taiwan in 1895 and the outbreak of the Sino Japanese War in 1937 Through authoritarian monetary reforms and lending schemes government officials and financial middlemen served as money doctors who steered capital and expertise to Japanese official and semi official colonies in Taiwan Korea China and Manchuria Michael Schiltz points to the paradox of acute capital shortages within the Japan's domestic economy and aggressive capital exports to its colonial possessions as the inevitable but ultimately disastrous outcome of the Japanese government's goal to exercise macroeconomic control over greater East Asia and establish a self sufficient yen bloc Through their efforts to implement their policies and contribute to the expansion of the Japanese empire the money doctors brought to the colonies a series of banking institutions and a corollary capitalist ethos which would all have a formidable impact on the development of the receiving countries eventually affecting their geopolitical position in the postcolonial world *The Palgrave Handbook of*

Vogel, Ming Yuan, Akihiko Tanaka, 2020-03-23 A collaborative effort by scholars from the United States China and Japan this volume focuses on the period 1972-1989 during which all three countries brought together by a shared geopolitical strategy established mutual relations with one another despite differences in their histories values and perceptions of their own national interest Although each initially conceived of its political and security relations with the others in bilateral terms the three in fact came to form an economic and political triangle during the 1970s and 1980s But this triangle is a strange one whose dynamics are constantly changing Its corners the three countries and its sides the three bilateral relationships are unequal while its overall nature the capacity of the three to work together has varied considerably as the economic and strategic positions of the three have changed and post Cold War tensions and uncertainties have emerged
