The Role of Business in Global Governance A.

Flohr, L. Rieth, S. Schwindenhammer, K. Wolf, 2010-01-13 The Role of Business in Global Governance offers an empirically rich analysis of the new political role of corporations in the co performance of governance functions beyond the state Within comparative case studies potential explanations of the political role of transnational corporations are systematically tested

The Performance of European Business in the Twentieth Century Youssef Cassis, Andrea Colli, Harm Schröter, 2016-07-21

This book originated from the idea that performance is what really matters in business and thus in business history Yet surprisingly the analysis of performances has been neglected by economic and business historians This book is a first attempt to fill this gap and in doing so provides a totally new approach to European business history Rather than bringing together national studies it is based on a single database measuring performance in eight European countries according to identical criteria The study spans the entire twentieth century with particular attention to five benchmark moments the height of the first globalisation on the eve of the First World War the late 1920s boom preceding the Great Depression the European reconstruction of the mid 1950s the end of Golden Age in the early 1970s and the height of the second globalisation at the turn of the twenty first century The analysis is based on a sample of 1 225 companies belonging to the three major European economies Britain France and Germany two large south European latecomers Italy and Spain two smaller north western countries Belgium and Sweden and one small Nordic country Finland Performance has been measured using two ratios of profitability return on equity ROE and holding return HR thus providing a complementary measure of profitability the former as seen from the firm s perspective the latter from the investor s perspective The book s findings at times surprising at once confirm and infirm widely held assumptions regarding business performance regarding strategy and structure ownership and control old and new industries emerging and advanced economies

International Financial History in the Twentieth

Century Marc Flandreau, Carl-Ludwig Holtfrerich, Harold James, 2003 The essays written by leading experts examine the history of the international financial system in terms of the debate about globalization and its limits In the nineteenth century international markets existed without international institutions A response to the problems of capital flows came in the form of attempts to regulate national capital markets for instance through the establishment of central banks In the inter war years there were largely unsuccessful attempts at designing a genuine international trade and monetary system and at the same time coincidentally the system collapsed In the post 1945 era the intended design effort was infinitely more successful The development of large international capital markets since the 1960s however increasingly frustrated attempts at international control The emphasis has shifted in consequence to debates about increasing the transparency and effectiveness of markets but these are exactly the issues that already dominated the nineteenth century discussions

Business in Britain in the Twentieth Century Richard Coopey, Peter Lyth, 2009-08-13 This collection of fresh incisive

scholarship by some of the leading business historians critically examines the nature of economic recovery in Britain in recent years. Covering the key issues for business history in this period, the book confronts the traditional literature on conclusions of relative decline and monocausal simplistic explanations. It provides an impressive range of studies forming a platform for a new debate on the nature of British business in the 20th century. Themes include productivity, management research and development, marketing, regional clusters and networks, industrial policy, the use of technology and gender. Sector studies include newer post-war hopefuls and successes including aerospace, IT, retail banking, overseas investment, the creative industries. The book demonstrates that our understanding of the historic strengths and weaknesses of business in Britain and the shifting balance between sectors of the economy has until now been poorly understood and that British business history needs a fundamental reappraisal.

A History of the Global Stock Market B. Mark Smith, 2004-10
Resource added for the Financial Institutions Management program 101144 Multinational Corporations Paz Estrella Tolentino, 2003-09-02. This work presents case studies of the emergence and evolution of Multinational Corporations (MNCs) based in eleven developed and developing countries of widely divergent patterns of national development. From this analysis, Tolentino develops a comprehensive theory of the emergence and evolution of MNCs from a macroeconomic perspective.

Minerals, Metals and Sustainability W. J. Rankin, 2011-09. *Minerals, Metals and Sustainability* examines the exploitation of minerals and mineral products and the implications for sustainability of the consumption of finite mineral resources and the wastes associated with their production and use. It provides a multi-disciplinary approach that integrates the physical and earth sciences with the social sciences, ecology and economics. Increasingly, graduates in the minerals industry and related sectors will not only require a deep technical and scientific understanding of their fields such as geology, mining, metallurgy, but will also need a knowledge of how their industry relates to and can contribute to the transition to sustainability. Chapters 1 to 3 introduce the concept of materials, how they are used in society and the environmental basis of our existence. Chapter 4 introduces the concept of sustainability and the issues it raises for the use of non-renewable resources. Chapter 5 discusses the geological basis of the minerals industry and Chapter 6 describes the structure and nature of the industry. Chapters 7 and 8 review the technologies by which mineral resources are extracted from the Earth's crust and processed. Chapters 9 and 10 examine the usage of energy and water. Chapters 11 and 12 survey the wastes resulting from the production of mineral and metal commodities, the human and environmental impacts of these and how they are managed. Chapter 13 examines the recycling of mineral-derived materials and the role of secondary materials in meeting material needs. Chapter 14 surveys the potential future sources of minerals and the factors that determine long-term supply. Chapter 15 surveys the socio-economic and technological factors that determine the long-term demand for mineral-derived materials and future trends. Chapter 16 discusses how waste can be reduced or eliminated through technological developments and socio-political changes. Finally, Chapter 17 addresses the concept of stewardship and the role the minerals industry should play in the ongoing transition to
