New Approaches To Management:

The SAGE Handbook of New Approaches in Management and Organization Daved Barry, Hans Hansen, 2008-04-30
Ten years ago critical theory and postmodernism were considered new and emerging theories in business and management. What will be the next new important theories to shape the field? In one edited volume Daved Barry and Hans Hansen have commissioned new chapters that will allow readers to stay one step ahead of the latest thinking. Contributors draw on research and practice to introduce ideas that are considered fringe and controversial today but may be key theoretical contributions tomorrow. Each chapter sets these ideas in their historical context, lays out the key theoretical positions taken by each new approach, and makes it clear why these approaches are different to more mainstream concepts. Throughout contributors refer to existing studies that show how these developing themes will change the business and management arena. Researchers, teachers, and advanced students who are interested in the future of Business and Management scholarship will want to read this Handbook.
