CONSUMER ACTIVISM

We have, so far, learnt that there are three different Forums, one each at the National, State and District level and these are classified on the basis of territory and pecuniary value of the complaint.

Alia lives in East Delhi and therefore, she can file a complaint in the Delhi Consumer Court situated in East Delhi. If she is not satisfied with the judgement, she can go to the next higher level i.e., State Commission located in Delhi. The next appeal can go to the National Forum. Most of the small cases are decided at the district level itself and, therefore, preferring an appeal may not be required. All the awareness about consumer goods and services creates a check on the unscrupulous tradesmen and the defective products which we do not want and which we never purchased.

OBJECTIVES

After studying this lesson, you will be able to:

- understand the meaning of the term 'Consumer Activism';
- appreciate the significance of Consumer Movement in India;
- define the Objectives, Goals and Tactics of Consumer Movement in India;
- learn how to file a Complaint Petition for defective goods; and
- know how to file a Complaint Petition for deficient services;

31.1 WHAT IS CONSUMER ACTIVISM?

The 'Consumer Movement' in India as a social force originated with the necessity of protecting and promoting the interests of consumers against unethical and 'unfair trade practices'. Rampant food shortages, hoarding and the like gave birth to the 'Consumer Movement' in an organised form in the year 1960.

Nurturing Consumer Activism Sanjay Kaptan,2003 *Activism and the Policy Process* Anna Yeatman,2020-07-29

Activists protecting rainforests demanding increased childcare developing local community housing campaigning for AIDS funding or protecting consumers are as much part of the political landscape as the media parliament peak industry groups political parties or trade unions This collection explores the idea of policy activism and its relationship to the processes that not only set but implement and deliver the policy agenda Policy activists operate both inside and outside government They include community based organisers activist bureaucrats service providers and professionals Policy activism has been barely explored in existing literature This collection puts the idea on the map It is an innovative contribution to the literature using case studies across a broad range of policy areas This volume opens the window on an aspect of the policy process that rarely receives attention from students of politics or policy anywhere across the globe The framework presented and the cases included in these pages provide a glimpse of the workings of a complex democracy describing a range of actors responding creatively to the dynamics of social political and economic change It is fascinating to see how policy functions and social values appear to be more important to these processes than the formal structures of the government in which they are placed

Economy Ron Martin, 2017-11-30 Economic geographers have always argued that space is key to understanding the economy that the processes of economic growth and development do not occur uniformly across geographic space but rather differ in degree and form as between different nations regions cities and localities with major implications for the geographies of wealth and welfare This was true in the industrial phase of global capitalism and is no less true in the contemporary era of post industrial knowledge driven global capitalism Indeed the marked changes occurring in the structure and operation of the economy in the sources of wealth creation in the organisation of the firm in the nature of work in the boundaries between market and state and in the regulation of the socio economy have stimulated an unprecedented wave of theoretical conceptual and empirical enquiry by economic geographers Even economists who traditionally have viewed the economy in non spatial terms as existing on the head of the proverbial pin are increasingly recognising the importance of space place and location to understanding economic growth technological innovation competitiveness and globalisation This collection of previously published work though containing but a fraction of the huge explosion in research and publication that has occurred over the past two decades seeks to convey a sense of this exciting phase in the intellectual development of the discipline and its importance in grasping the spatialities of contemporary economic life
