Welfare Economics      **Individual and Small Group Decisions** K.J. Radford,2013-03-09 ecision making is one of the most important activities in both our profes D sional and our private lives today The literature on the subject has grown considerably over the last fifty years and it now covers many different approaches to the subject These approaches range from that of creating a mathematical model of the decision situation under consideration as in operations research and other forms of mathematical decision analysis to those that are based on human and organizational behavior Recently those working in the field have begun to combine approaches to the study of decision situations that arise in organizations in our personal lives and in the communities in which we live This book is an attempt to assist those concerned with decision making to work with this combination of approaches In the past decision problems have been considered according to the condi tions under which they arise and to some extent in terms of the approaches available for their resolution Writers on the subject who are mathematically oriented have devised a method of classifying decisions based on the type of mathematics that they suggest be used in the resolution of the problems This approach leads to the division of decision situations into the categories of cer tainty uncertainty risk and competition Deterministic models available in oper ations research have then been offered as the means of treating decision situations in the category of certainty      **The European Culture for Human Rights** Filomena Maggino,Elena Zamfir,2014-09-01 This book represents a collection of a selected papers from an international conference focusing on the right to happiness held in Bucharest in December 2012 organized by Dimitie Cantemir Christian Bucharest University the Romanian Academy s Research Institute for Quality of Life Bucharest and the Romanian Institute for Human Rights Bucharest The analysis of happiness from the perspective of the quality of life is a unique development in human rights literature This analysis is based on people having an active role in bestowing meaning on different components of their life People have the means and the power to decide whether their life is good or bad by taking into account their subjective perceptions such as how different domains such as the family professional and civic realms of their lives interact and what their meanings for their entire lives are In truth modern society faced with multiple risks of development has to be controlled by the wisdom or rationality of collective ethics principles in order to grant individual satisfaction Its means of development through cutting edge technology can contribute to human accomplishments but also to human downfalls Thus in a modern culture responsible control of technology becomes mandatory In today s world it is impossible to talk about individual satisfaction without collective morals without the collective responsibility that guides the directions of development of humankind This book discusses the issue of quality of life and sustains a pragmatic vision of the pursuit of happiness and well being based on changes aimed at the continual improvement of one s interior and exterior universe      **Tracking Global Demand for Advanced Economy Sovereign Debt** Mr.Serkan Arslanalp,Mr.Takahiro Tsuda,2012-12-03 Recent events have shown that sovereigns just like banks can be subject to runs highlighting the importance of the investor base for their liabilities This paper proposes a methodology for compiling internationally

comparable estimates of investor holdings of sovereign debt Based on this methodology it introduces a dataset for 24 major advanced economies that can be used to track US 42 trillion of sovereign debt holdings on a quarterly basis over 2004 11 While recent outflows from euro periphery countries have received wide attention most sovereign borrowers have continued to increase reliance on foreign investors This may have helped reduce borrowing costs but it can imply higher refinancing risks going forward Meanwhile advanced economy banks exposure to their own government debt has begun to increase across the board after the global financial crisis strengthening sovereign bank linkages In light of these risks the paper proposes a framework sovereign funding shock scenarios FSS to conduct forward looking analysis to assess sovereigns vulnerability to sudden investor outflows which can be used along with standard debt sustainability analyses DSA It also introduces two risk indices investor base risk index IRI and foreign investor position index FIPI to assess sovereigns vulnerability to shifts in investor behavior

A.,2008-04-21 This essay anthology offers enlightening perspectives on how East Central Europe was transformed into the other Europe during the Cold War era When the Second World War ended a new conflict arose between world powers jockeying for supremacy The Soviet Union pursued a policy of exporting its system of government in a process known as sovietization But there were also governments that sought to adopt a Soviet way of life on their own accord Dictated by ideological imperatives both styles of sovietization employed socialist strategies of state and nation building This volume not only examines the imposition of new forms of government but also the socialist response to modernity as reflected in approaches to new technology and management consumption and leisure patterns religious and educational policy political rituals and attitudes to the past The essays explore the diversity and the tensions within the sovietization process in the countries of the region This collection is a bold and timely attempt at shedding light on a rather insufficiently researched topic the diverse approaches ranging from socio cultural and economic history to psycho history Dr Dragos Petrescu University of Bucharest *Organizing Interests in Western Europe* Suzanne Berger,1983-04-29 The chapters in this volume

reconsider fundamental premises about state and society in advanced capitalist countries That social scientists in different disciplines of varying methodological and political persuasions should have found it useful to collaborate in such an undertaking is testimony to the profound social economic and political shocks experienced by all advanced capitalist nations since to late 1960s The energy crisis the end of rapid economic growth inflation high unemployment and rising social conflict challenge conventional conceptions about the functioning of industrial societies and their future course Social science theories have been unable to illuminate these realities
